180 East Broad Street
Columbus, Ohio 43215

Re: Case No. 83-464-TP-COI (Docket No. 90-5041-TP-TRF)

Dear Ms. Crockron:

Enclosed are one original and four copies of the following tariff sheets being filed in compliance with the May 21, 1984 Opinion and Order in the above case. That Order requires a Notice of Adoption when modifications are made to the Sprint Local Telephone Companies Tariff F.C.C. No. 1, which are to be mirrored in the United Telephone Company Access Tariff, P.U.C.O. No. 1.

Check Sheets Effective April 1, 2000 for Transmittal 104:

16th Revised Page 1.7		

Sprint Local Telephone Companies FCC Transmittal No. 104 became effective April 1, 2000. The filing adds rates and regulations for the provision of Multiplexed Access Service Connections (MASC) at DS3, OC3 and OC12 levels. In addition, the filing clarifies existing language and removes obsolete language. Also included are changes that are not applicable in Ohio's intrastate jurisdiction.

Please return a date-stamped copy of this transmittal letter in the enclosed self-addressed stamped envelope for our files. A duplicate is enclosed for that purpose. If you have questions or need additional information regarding this filing, please call Becky Donahue at (614) 220-8624.

Best regards,

Rudolph R. Povirk, Jr.

EFFECTIVE DATE:
April 1, 2000

ACCESS SERVICE

2. General Regulations (Cont'd)2.4 Payment Arrangements and Credit Allowances (Cont'd)2.4.8 Ordering, Rating and Billing of Access Services Where More Than One
Exchange Telephone Company or Rate Schedule is Involved (Cont'd)(B) Multiple Company (Interconnection Point) Billing (Cont'd)

(7) (Cont'd)

have different rate schedules, the Exchange Telephone Company will accept the order in either state except for orders involving Hubs. For orders involving Hub the order must be placed in the state where the Hub is located. An interconnection point will be determined by the Exchange Telephone Company and will be used to determine the billing for each state. All appropriate charges in each state rate schedule are applicable. The rate for the Channel Mileage element will be determined as set forth in (8) following. (Z)

(8) The rate for the Switched Access Direct-Trunked Transport and Tandem-Switched Transport or Special Access Channel Mileage per mile element for services provided as set forth in (1) through (7) preceding is determined as follows: (T)

- (a) Determine the appropriate switched transport or channel mileage by computing the airline mileage between the two ends of the switched transport or channel mileage. Determine the airline mileage for the Tandem-Switched Transport per mile element using the V & H method as set forth in 6.7.12 following. Determine the airline mileage for the Direct-Trunked Transport and Channel Mileage per mile element using the V & H method as set forth in 7.4.6 following.

ISSUE DATE:

April 1, 2000

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service(Cont'd)5.2 Access Order (Cont'd)5.2.3 Access Order Modifications

The customer may request a modification of its Access Order at any time prior to notification by the Telephone Company that service is available for the customer's use. The Telephone Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Telephone Company will notify the customer. If the customer still desires the Access Order modification, the Telephone Company will schedule a new service date. All charges for Access Order modifications will apply on a per access order basis.

When Telephone Company personnel are dispatched to install a customer's service on the requested service date, and the customer advises the Telephone Company personnel that service cannot be accepted at that time, the customer shall be responsible for payment of additional labor charges for the time incurred by Telephone Company personnel. The additional labor charges will be applied on per half hour, per technician basis as set forth in 13.2 following.

(N)
|
(N)

Any increase in the number of Special Access Service channels or Switched Access Service lines, trunks, CCS/SS7 port terminations or LIDB originating point codes (OPCs) will be treated as a new Access Order (for the increased amount only).

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangements(Cont'd)6.2.1 Feature Group A (FGA)(A) Description

- (1) FGA is provided in connection with Telephone Company electronic end offices. At the option of the customer, FGA is provided on a single or multiple line group basis and is arranged for originating calling only, terminating calling only, or two-way calling. (D)
- (2) FGA provides a line side termination at the first point of switching. The line side termination will be provided with either ground start supervisory signaling or loop start supervisory signaling. The type of signaling is at the option of the customer.
- (3) The Telephone Company shall select the first point of switching, within the selected LATA, at which the line side termination is to be provided unless the customer requests a different first point of switching and Telephone Company facilities and measurement capabilities, where necessary, are available to accommodate such a request.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)6.2.2 Feature Group B (FGB)(A) Description

(1) FGB, when directly routed to an end office (i.e., provided without the use of an access tandem switch), is provided at appropriately equipped Telephone Company electronic end office switches. When provided via Telephone Company designated electronic access tandem switches, FGB switching is provided at Telephone Company electronic end office switches. (D)

(2) FGB is provided as trunk side switching through the use of end office or access tandem switch trunk equipment. The switch trunk equipment is provided with wink start start-pulsing signals and answer and disconnect supervisory signaling.

ACCESS SERVICE

6. Switched Access Service(Cont'd)6.2 Provision and Description of Switched Access Service Arrangements(Cont'd)6.2.3 Feature Group C (FGC) (Cont'd)(A) Description (Cont'd)

- (3) FGC is provided with multifrequency address signaling. Up to 12 digits of the called party number dialed by the customer's end user using dual tone multifrequency or dial pulse address signals will be provided by Telephone Company equipment to the customer's premises where the Switched Access Service terminates. Such called party number signals will be subject to the ordinary transmission capabilities of the Switched Transport provided.
- (4) No access code is required for FGC switching. The telephone number dialed by the customer's end user shall be a seven or ten digit number for calls in the North American Numbering Plan (NANP). For inter-national calls outside the NANP, a seven to twelve digit number may be dialed. The form of the numbers dialed by the customer's end user is NXX-XXXX, 0 or 1 + NXX-XXXX, NPA + NXX-XXXX, 0 or 1 + NPA + NXX-XXXX, and, when the end office is equipped for International Direct Distance Dialing (IDDD), 01 + CC + NN or 011 + CC + NN.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.3 Optional Features

Following are descriptions of the various optional features that are available in lieu of, or in addition to, the standard features provided with the Feature Groups.

(A) Call Denial on Line or Hunt Group

This option allows for the screening of terminating calls within the exchange, and for the completion only of calls to 411, 611, 911, TFC, 555-1212, and a Telephone Company specified set of NXXs within the Telephone Company local exchange calling area of the dial tone office in which the arrangement is provided. All other calls are routed to a reorder tone or recorded announcement. This feature is provided in all electronic end offices. It is available with Feature Group A.

(D)

(B) Service Code Denial on Line or Hunt Group

This option allows for the screening of terminating calls within the exchange, and for disallowing completion of calls to 0-, 555 and N11 (e.g., 411, 611, and 911). This feature is provided where available in all Telephone Company electronic end offices. It is available with Feature Group A.

(D)

(C) Hunt Group Arrangement

This option provides the ability to sequentially access one of two or more line side connections in the originating direction, when the access code of the line group is dialed. This feature is provided in all Telephone Company end offices. It is available with Feature Group A.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.3 Optional Features (Cont'd)(O) Alternate Traffic Routing (Cont'd)(2) End Office Alternative Routing When Ordered in Trunks

This option provides an alternate routing arrangement for customers who order in trunks and have access for a particular Feature Group to an end office via two routes one route via an access tandem and one direct route. The feature allows the customer's originating traffic from the end office to be offered first to the direct trunk group and then overflow to the access tandem group. It is provided in suitably equipped end offices and is available with Feature Groups B and D.

(P) Trunk Access Limitation

This option provides for the routing of originating 900 service calls to a specified number of transmission paths in a trunk group, in order to limit (choke) the completion of such traffic to the customer. Calls to the designated service which could not be completed over the subset of transmission paths in the trunk group, i.e., the choked calls, would be routed to reorder tone.

It is provided in all Telephone Company electronic end offices. It is available with Feature Groups C and D.

(D)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.8 High Capacity Service (Cont'd)(D) Optional Features and Functions (Cont'd)(6) Multiplexed Access Service Connection (MASC)

MASC is an arrangement that allows one channel of a multiplexed Telephone Company service to be connected to one channel of the same bit rate and like signaling of another multiplexed Telephone Company service. For example, the lesser speed may be a DS1 channel between two multiplexed DS3 services, or an OC3 channel between OC12 and OC48 services. MASC will be provided at all Telephone Company locations where multiplexing is performed or between two Telephone Company locations where multiplexing is performed. MASC is available at DS0 or voice, DS1, DS3, OC3 and OC12 levels.

(C)

(C)

(7) Extended Superframe Format (ESF)

The ESF optional feature is available at suitably equipped end offices, and passes a customer provided framing format for 1.544 Mbps high capacity service. ESF extends the customer's 1.544 Mbps framing structure from 12 to 24 frames and divides the 8 Kbps 193rd bit position pattern into three distinct functionalities: 2 Kbps for frame synchronization, 2 Kbps for cyclic redundancy checking, and 4 Kbps used primarily for performance monitoring information.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.11 Special Access Term Discount Plan (Cont'd)(D) Service Rearrangements

When a circuit committed to a TDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 preceding, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service. (C)

(E) 90 Day Review Period

No adjustments in monthly billing for a TDP, for being above or below the commitment threshold described in (B) preceding, will take place until 90 days after Telephone Company written notification to the customer that the commitment threshold has been exceeded or has not been met. This will ensure that customers will not be penalized for aberrations in channel termination and/or multiplexer counts caused by timing differentials in disconnection and installation.

Customer's bills will not be adjusted for being outside the threshold described in 7.4.11(B) preceding during the 90 day review period. Additionally, customers will continue to be billed the adjustments (following the 90 day review period) for being outside the described threshold until the commitment level is met or re-established. A new 90 day review period will be initiated if the customer's actual in-service level subsequently falls outside the described threshold.

ISSUE DATE:
March 17, 2000

ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.13 Multiplexed Access Service Connection (MASC)

Multiplexed Access Service Connection (MASC) will be charged per connection per central office where the service is performed. If MASC is provided between two Telephone Company offices where multiplexing is performed, channel mileage (termination and per mile) for the lower speed service will apply between the two central offices, along with one MASC charge per connection per central office.

(C)

If two customers are involved, one customer will be responsible for the entire billing of the MASC. The responsible customer must obtain a Letter of Authorization (LOA) from the second customer and submit it to the Telephone Company along with the channel assignment information for the lower speed services being connected.

Termination Liability:

The minimum service period is 60 months. If the customer disconnects service prior to the end of the 12th month, termination liability charges equal to 100% of the remaining monthly payments for the first 12 months and 50% of the remaining monthly payments for the 60 month term will apply. If the customer disconnects service after the end of the 12th month, termination liability charges equal to 50% of the remaining monthly payments for the 60 month term will apply.

** Should a general tariff offering for this service become available prior to the end of the minimum service period set forth above, the customer will be required to convert to the general tariff service and rates, or discontinue service without termination liability.

12.4 Voice Link Service

(A) Type and Description

Voice Link Service provides private line service from the End User premises to the Customer designated premises. The End User may originate calls, but cannot receive calls from the Customer designated premises.

Voice Link Service also converts End User call signals from analog to digital through Telephone Company digital switching equipment at the end office serving the End User.

This service is available in Nevada only.
