Ms. Daisy Crockron - Chief  
Docketing Department  
The Public Utilities Commission of Ohio  
180 East Broad Street - 10th Floor  
Columbus, OH 43215-3793

Transmittal Letter  
Revised Tariff Sheets Filed Pursuant to the  
Commission's Order in Case No. 83-464-TP-COI  
and  
Case No. 90-5023-TP-TRF

Dear Ms. Crockron:

Revised tariff sheets have been filed with the FCC to amend GTOC Tariff FCC No. 1, Facilities for Interstate Access, in which GTE North Incorporated concurs for intrastate applications.

In accordance with your Commission's Order in Case No. 83-464-TP-COI, we are filing four (4) copies of these revised tariff sheets.

Transmittal No. 1254 - Effective May 6, 2000

This filing proposes to establish ADSL Service in Alabama and South Carolina under Section 16, Advanced Communications Networks and makes text changes.

Acknowledgement and date of receipt of this filing is requested.

Sincerely,

John W. Kennedy  
Assistant Vice President-Regulatory  
and Governmental Affairs

## FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.8 High Capacity Broadband Access Cloud (HiBAC) Service(A) Service Description

High Capacity Broadband Access Cloud (HiBAC) Service is a multi-protocol network that transparently transports a combination of Asynchronous Transfer Mode (ATM), frame relay, and TCP/IP Data Aggregation Services (CyberPOP, CyberWAN) technologies over a single network facility. HiBAC Service is made available to network service providers for provision of high speed data service to their customers, and provides subject to the terms and conditions set forth herein, for the establishment of a point-to-point virtual circuit between two customer designated locations (CDLs). HiBAC Service is comprised of a Broadband Access Point, Frame Relay and ATM User Network Interfaces (UNIs) and Permanent Virtual Circuits (PVCs) in various Quality of Service (QoS) connections. QoS refers to priorities given to cell transmissions and sensitivity of cells to delay variation and loss within the network.

HiBAC Service combines multiple Telephone Company wire centers equipped for ATM Service, Frame Relay Service, ADSL Service, CyberPOP<sup>sm</sup> and CyberWAN<sup>sm</sup> services in Telephone Company designated areas which consist of a specific geographic grouping of these wire centers.

HiBAC Service offers simplified customer to customer connectivity, service/network interworking, data aggregation and data delivery by means of a single ATM NNI connection.

HiBAC Service is available where facilities and conditions permit in those locations as specified in Section 16.8(F). For locations where a customer requests HiBAC Service and digital or SONET facilities are not available, special construction charges may apply as set forth in Section 10.

The regulations and rates specified herein are in addition to the applicable regulations and rates specified in other sections of this tariff.

(B) Service Provisioning

The Broadband Access Point is an ATM protocol arrangement between the customer's designated network service (C) provider (i.e., Interexchange Carrier or Internet Service Provider) and the point of connection into the HiBAC Service network. The Broadband Access Point is available in DS3, OC3c and OC12c bandwidths. Once connected, the network service provider obtains access to their end user customers in a method that is independent of the originating protocol. Access to the Broadband Access Point may be provided via digital special access lines from Section 5 or via Optical Networking facilities from Section 20. The associated regulations, rates and charges from Section 5 and Section 20 apply in addition to the rates and charges associated with HiBAC Service rate elements.

A connection from the end user to HiBAC Service is provisioned as either a UNI Port and Access Line or as an UNI Port Only. The HiBAC Service UNI Port and Access Line is the facility that provides the customer access to the customer's serving wire center and/or interoffice transport from the customer's serving wire center to a physical interface (UNI Port) on the Telephone Company's Frame Relay or ATM switch. HiBAC UNI Ports and Access Lines are provided for digital special access lines with frame relay protocol in bandwidth levels of 56Kbps, 128Kbps, 256 Kbps, 384Kbps, DS1 and DS3 as well as with ATM protocol in DS1, DS3 or OC3c bandwidths. For UNI Port Only terminations, digital special access lines are available from Section 5 and Access Lines with OC3c bandwidth are available from Section 20. For UNI Port Only, both the port and the digital special access line must be ordered by and billed to one customer.

## FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.8 High Capacity Broadband Access Cloud (HiBAC) Service (Cont'd)(E) Rate Regulations(2) Rate Elements (Cont'd)

## (d) HiBAC PVC CIR Capacity and Sustained Cell Rate (Cont'd)

Constant Bit Rate (CBR) - Supports connections that depend on precise timing (clocking) to ensure undistorted delivery, i.e., voice and some types of video.

(3) Application of Rates and Charges

A customer may access HiBAC Service via a Broadband Access, a HiBAC UNI Port and Access Line or (C) UNI Port Only. A customer may also utilize Telephone Company provided digital access facilities offered under Section 5 or Optical Networking Access Service under Section 20.

The HiBAC UNI Port (unbundled or bundled with an access line) and its associated PVC segment(s) may be ordered and billed separately from the associated Broadband Access Point. A request by the customer to discontinue a PVC does not result in the disconnection of the HiBAC UNI Port and Access Line.

An ASR is required for the programming and activation of PVCs. If the sum of the port bandwidth utilized by existing and additional PVCs for CBR and VBR-rt services exceeds the bandwidth allotted for these services within the subscribed bandwidth level for that port, additional PVCs will not be added.

The nonrecurring charge will be applied whenever a change is made to a customer's HiBAC Service configuration (including changes to CIR or remapping PVCs), at the customer's request. Such changes are defined as those rearrangements necessary to add or rearrange the customer's configuration, including changes to a customer's selected network service provider.
