Re: Case No. 83-464-TP-COI (Docket No. 90-5041-TP-TRF)

Dear Ms. Crockron:

Enclosed are one original and four copies of the following tariff sheets being filed in compliance with the May 21, 1984 Opinion and Order in the above case. That Order requires a Notice of Adoption when modifications are made to the Sprint Local Telephone Companies Tariff F.C.C. No. 1, which are to be mirrored in the United Telephone Company Access Tariff, P.U.C.O. No. 1.

Sprint Local Telephone Companies FCC Transmittal No. 99 became effective February 5, 2000. This filing adjusted the level of access service rates in compliance with the FCC's access reform, pricing flexibility, and universal service decisions.

Transmittal No. 101, filed with the FCC on February 4, 2000, and scheduled to become effective on February 5, 2000, was filed on one day's notice and amended tariff revisions originally filed by Sprint LTC on January 21, 2000 under Transmittal No. 99. The amended filing clarifies the tariff language referencing the application of the service upgrade charge for OptiPoint services and the service rearrangement provisions for the Special Access and Premier Term Discount Plans. The filing also included a corrected rate for the state of Wyoming.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

Transmittal No. 101

Secretary  
Federal Communications Commission  
Washington, DC 20554

Attention: Common Carrier Bureau

The accompanying tariff material, issued on behalf of the Sprint local telephone companies (Sprint LTC) and bearing Tariff F.C.C. No. 1, Access Service, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended.

These revisions, scheduled to become effective February 5, 2000, consist of tariff pages as indicated on the following check sheets:

<u>Tariff F.C.C. No.</u>	<u>Check Sheet</u>
1	99th Revised Page 1 27th Revised Page 1.5 20th Revised Page 1.6 21st Revised Page 1.8

This filing is being made on not less than one day's notice under authority of Special Permission No. 00-0006, of the Federal Communications Commission, and amends the tariff revisions originally filed by Sprint LTC on January 21, 2000, under Transmittal No. 99. The proposed revisions clarify the tariff language referencing the application of the service upgrade charge for OptiPoint services and the service rearrangement provisions for the Special Access and Premier Term Discount Plans. In addition, the revisions correct the 3-year monthly rate for the OptiPoint-48 DS1 configuration card for the state of Wyoming.

Transmittal No. 101

Page 2

February 4, 2000

The original transmittal letter, along with FCC Form 159 and filing fees in the amount of \$630, is concurrently being delivered via Federal Express to the Wholesale Lockbox Shift Supervisor-Mellon Bank, pursuant to Section 61.32(b) of the Commission's Rules. Acknowledgment and date of receipt of this filing by the Mellon Bank are requested. A duplicate copy of the letter of transmittal is provided for this purpose.

All correspondence and inquiries in connection with this filing should be addressed to Mr. Pete Sywenki, Director - Federal Regulatory Relations, for Sprint's Local Telecommunications Division, 401 9th Street, N.W., Suite 400, Washington, D.C. 20004, (202) 585-1921.

A handwritten signature in cursive script, appearing to read "Rudolph R. Povirk, Jr.", is positioned above the printed name.

Rudolph R. Povirk, Jr.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.6(E) preceding or a change in the physical location of the point of termination at a customer designated premises. Changes in the type of service or service termination are treated as disconnects and starts. Changes in the physical location of the point of the termination are treated as moves and are described and charged for as set forth in 7.4.5 following.

The nonrecurring charges associated with upgrades in capacity (i.e., multiple DS0s converting to DS1s or multiple DS1s converting to DS3s) will not apply when the customer maintains the same customer premises location. Requests to add or change optional features will be subject to the nonrecurring charges associated with the features requested.

A nonrecurring service upgrade charge, as set forth in Section 7.5.8 following, will apply per DS1 or DS3 upgraded when converting existing high capacity services to OptiPoint service. The charge does not apply when OptiPoint is ordered as new service and no existing high capacity services are being relocated to the OptiPoint service. For orders for new services submitted after February 5, 2000, the nonrecurring service upgrade charge will apply for each DS1 or DS3 channel connected to new OptiPoint service when existing DS1 or DS3 facilities between the same points of termination as the new OptiPoint service are disconnected within 30 days of the order for new services.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.11 Special Access Term Discount Plan (Cont'd)(D) Service Rearrangements

When a circuit committed to a TDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 following, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

(S)(y)  
|  
|  
(S)(y)  
(C)(x)  
(S)(x)

(E) 90 Day Review Period

No adjustments in monthly billing for a TDP, for being above or below the commitment threshold described in (B) preceding, will take place until 90 days after Telephone Company written notification to the customer that the commitment threshold has been exceeded or has not been met. This will ensure that customers will not be penalized for aberrations in channel termination and/or multiplexer counts caused by timing differentials in disconnection and installation.

Customer's bills will not be adjusted for being outside the threshold described in 7.4.11(B) preceding during the 90 day review period. Additionally, customers will continue to be billed the adjustments (following the 90 day review period) for being outside the described threshold until the commitment level is met or re-established. A new 90 day review period will be initiated if the customer's actual in-service level subsequently falls outside the described threshold.

(x) Issued on not less than one day's notice under authority of Special Permission No. 00-0006 of the Federal Communications Commission.

(y) Original effective date February 5, 2000.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Premier Term Discount Plan(Cont'd)(G) Renewal of a PTDP

At the end of the PTDP service commitment period, the customer will have 90 days to subscribe to a new PTDP at the prevailing rates set forth in Section 7.5.14 following. If the customer does not select a new PTDP, the rates will convert to the prevailing month-to-month special access rates set forth in Section 7.5 following, and will be effective as of the expiration date of the PTDP.

(H) Service Rearrangements

When a circuit committed to a PTDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 preceding, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

(I) Cancellation Charges

When a customer cancels an order for special access service being provided under a PTDP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.

## Streamlined Filing

Certain portions of this filing are being made on 15 days' notice in accordance with streamlined filing provisions set forth in Section 204(a)(3) of the Communications Act.

*Local Telecommunications Division  
Revenues Department*

January 21, 2000

Transmittal No. 99

Secretary  
Federal Communications Commission  
Washington, DC 20554

Attention: Common Carrier Bureau

The accompanying tariff material, issued on behalf of the Sprint local telephone companies (Sprint LTC) and bearing Tariff F.C.C. No. 1, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended. The first part of this filing is being made on not less than one day's notice under the Federal Communications Commission's pricing flexibility guidelines. The second part of this filing is being made on 15 days' notice under the Commission's streamlined filing procedures.

These revisions, scheduled to become effective February 5, 2000, consist of tariff pages as indicated on the following check sheets:

Tariff F.C.C. No.

Check Sheet No.

Original Page 1.16

The first part of this filing is being made on not less than one day's notice under the Federal Communications Commission's price flexibility guidelines, and adds rates and regulations establishing OptiPoint-48 switched and special access services. OptiPoint-48 services are designed to offer customers additional options for the transmission of high volume voice and data communications, and provide point to point high speed synchronous fiber optic data transmission capabilities at a terminating bit rate of 2488.32 Mbps. Description and justification is provided for this filing, however, pursuant to Section 61.49(f)(3) of the Commission's rules, supporting cost information is not required.

The second part of this filing is being made on 15 days' notice under the Commission's streamlined filing procedures, and includes the following revisions:

- (1) Elimination of the restriction requiring that both ends of an OptiPoint entrance facility or channel termination be configured identically;
- (2) Elimination of the restriction requiring that OptiPoint services configured with DS3 or DS1 channels terminating at Sprint central offices be connected to other DS3, DS1 or DS0 services provided by the Telephone Company at the time the OptiPoint service is ordered;
- (3) Addition of regulations clarifying that the service rearrangement and cancellation charges for Term Discount Plans and Premier Term Discount Plans are calculated based on the month-to-month rates for the associated service;
- (4) Removal of obsolete tariff language referencing Primary Exchange Carrier and Secondary Exchange Carrier billing arrangements;
- (5) Removal of Individual Case Basis filings in the states of Nevada and North Carolina that are no longer in service; and
- (6) Minor tariff language changes designed to clarify the provision of interstate access services.

The original transmittal letter, along with FCC Form 159 and filing fees in the amount of \$630, is concurrently being delivered via Federal Express to the Wholesale Lockbox Shift Supervisor - Mellon Bank, pursuant to Section 61.32(b) of the Commission's Rules. Acknowledgment and date of receipt of this filing by the Mellon Bank is requested. A duplicate copy of the letter of transmittal is provided for this purpose.

Transmittal No. 99  
Page 3  
January 21, 2000

All correspondence and inquiries in connection with this filing should be addressed to Mr. Pete Sywenki, Director - Federal Regulatory Relations, for Sprint's Local Telecommunications Division, 401 9th Street, N.W., Suite 400, Washington, DC 20004, (202) 585-1921.

Rudolph R. Povirk, Jr.  
Director - Access Management

ACCESS SERVICE

2. General Regulations(Cont'd)

2.3 Obligations of the Customer(Cont'd)

2.3.11 Jurisdictional Report Requirements(Cont'd)

(A) Jurisdictional Reports(Cont'd)

- (6) Except where Telephone Company measured access minutes are used as set forth in (4) preceding, the customer reported number of interstate services or interstate percentage of use as set forth in (1), (4) or (5) preceding will be used until the customer reports a different projected interstate percentage for an in service end office. When the customer adds or discontinues lines or trunks to an existing end office, the customer shall furnish an updated projected interstate percentage that applies to the end office. The revised report will serve as the basis for future billing and will be effective on the next bill date. No prorating or back billing will be done based on the report.

2. General Regulations(Cont'd)

2.3 Obligations of the Customer(Cont'd)

2.3.11 Jurisdictional Report Requirements(Cont'd)

(A) Jurisdictional Reports(Cont'd)

(7) (c) (Cont'd)

APPLICABLE TO THE STATE OF TEXAS ONLY

quarterly update report is not received within 30 calendar days of the receipt of the notice, the Telephone Company will designate a PIU factor of 50% for each service arranged for interstate use. This factor will be applied to the next billing cycle following the 30 day notice period and will be utilized until the customer provides a quarterly update report. When the customer does provide the quarterly report, the Telephone Company will update the customer's PIU factors within 15 business days utilizing the most current PIU factor reported by the customer.

2.3 Obligations of the Customer(Cont'd)

2.3.11 Jurisdictional Report Requirements(Cont'd)

(A) Jurisdictional Reports(Cont'd)

(D)

(D)

- (8) When a customer orders Common Channel Signaling/ Signaling System 7 (CCS/SS7) Interconnection Service, the customer shall provide to the Telephone Company in its order for the service, a CCS/SS7 Interconnection Service Percent Interstate Usage (PIU) Report.

Customers who provide the CCS/SS7 Interconnection Service PIU Report shall supply the Telephone Company with an interstate percentage, of 0 through 100, per Signaling Transfer Point (STP) Port Termination. This STP Port Termination PIU will be an average PIU based upon the jurisdiction (interstate versus intrastate) of those originating end user calls that require use of the specified STP Port Termination for signaling purposes.

## ACCESS SERVICE

2. General Regulations(Cont'd)2.6 Definitions(Cont'd)On-hook

The term "On-hook" denotes the idle condition of Switched Access or a Telephone Exchange Service line.

Open Circuit Test Line

The term "Open Circuit Test Line" denotes an arrangement in an end office which provides an ac open circuit termination of a trunk or line by means of an inductor of several Henries.

Operator Service System (OSS)

The term "Operator Service System" (OSS) denotes the group of interacting hardware (switching equipment, data links, and operator terminals) and software components for the provision of operator service functionality.

Optical Carrier Level (n) (OC n)

The term "Optical Carrier Level (n)" denotes the physical line connection (aka facility) between two locations that uses optical signaling equipment for transmitting information over fiber optics. A level of bit rate speed transmission is indicated by "n". OC1 optical transmissions are at 51.84 Mbps; OC3 at 155.52 Mbps; OC12 at 622.08 Mbps; and OC48 at 2488.32 Mbps.

(N)

Optical Carrier Level n Concatenated (OCnc)

The term "Optical Carrier Level n Concatenated" denotes the physical line or clear channel connection (aka facility) between two locations that is capable, using optical signaling equipment, of replacing multiple payload groupings into one larger payload grouping, resulting in a single communications channel.

## ACCESS SERVICE

2. General Regulations(Cont'd)2.6 Definitions(Cont'd)Optical Carrier Rate (OC#)

The term "Optical Carrier Rate" denotes a SONET transmission signal/speed, line rate or service. The rate is in multiples of an OC1, which is equivalent to a Synchronous Transport Signal (STS1), 51.84 Mbps, SONET's basic rate. OC# rate bandwidth capacity is 155.52 Mbps for OC3, 622.08 Mbps for OC12, and 2488.32 Mbps for OC48.

(N)

(N)

Optical Carrier Rate Concatenated (OC#c)

The term "Optical Carrier Rate Concatenated" denotes a clear channel SONET transmission using only one framing format. For example, an OC3 signal provides three STS1 frame formats with 3 overheads for a total capacity of 2322 bytes per Synchronous Payload Envelope (SPE); in an OC3c signal, one STS3c frame format is used with one overhead, increasing the total payload capacity to 2340 bytes per SPE.

Originating Direction

The term "Originating Direction" denotes the use of Access Service for the origination of calls from an end user premises to a customer premises.

Originating Point Code

An originating point code is assigned to identify each Operator Service System (OSS) location.

Other Tariffed Services

As used for Expanded Interconnection in Section 15 this denotes specific rate elements of Tariff FCC No. 1, offered by the Company, which may be interconnected to Customer Transport Facilities using Special Access Expanded Interconnection. Such rate elements are specified in Section 15.9.

## ACCESS SERVICE

6. Switched Access Service(Cont'd)6.2 Provision and Description of Switched Access Service Arrangement(Cont'd)6.2.9 OptiPoint Services(A) Basic Service Description

OptiPoint services provide point-to-point high speed synchronous optical fiber-based full duplex data transmission capabilities. There are three levels of OptiPoint services. OptiPoint-3 (OC3) is provided at a terminating bit rate of 155.52 Mbps; OptiPoint-12 (OC12) is provided at a terminating bit rate of 622.08 Mbps; and OptiPoint-48 is provided at a terminated bit rate of 2488.32 Mbps. (N)

OptiPoint services are provided for periods of three or five years. When a customer orders OptiPoint service, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the OptiPoint circuits. (N)

(1) Entrance Facilities

OptiPoint entrance facility channels may be used to connect the following: (N)

- a customer designated premises to another customer designated premises, configured at wire center locations between the two premises; or
- a customer designated premises to a Telephone Company location where service configuration is performed.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)6.2.9 OptiPoint Services (Cont'd)(A) Basic Service Description (Cont'd)(1) Entrance Facilities (Cont'd)

(a) Based on customer requirements, OC3 service may be provisioned in the following configurations: (T)

(i) OC3 - three Synchronous Transport Signals (STS1) channels which contain the following: (T)

- one DS3 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network; or

(ii) A single concatenated STS3c channel. (T)

(b) Based on customer requirements, OC12 service may be provisioned in the following configurations: (T)

(i) OC12 - twelve STS1 channels which each contain: (T)

- one DS3 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network;

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangement (Cont'd)6.2.9 OptiPoint Services (Cont'd)(A) Basic Service Description (Cont'd)(1) Entrance Facilities (Cont'd)

(b) (Cont'd) (T)

(ii) Up to four concatenated STS3c channels; (C)

(iii) From one to three STS3c channels mixed with from three to nine STS1 channels subject to utilization of the total OC12 capacity; or (T)

(iv) A single concatenated STS12c channel. (T)

(c) Based on customer requirements, OC48 service may be provisioned in the following configurations: (N)

(i) OC48 – forty-eight STS1 channels which each contain:

- one DS3 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network;

(ii) Up to four concatenated STS12c channels; (N)

## ACCESS SERVICE

6. Switched Access Service (Cont'd)

(N)

6.2 Provision and Description of Switched Access Service Arrangement (Cont'd)6.2.9 OptiPoint Services (Cont'd)(A) Basic Service Description (Cont'd)(1) Entrance Facilities (Cont'd)

## (c) (Cont'd)

(iii) Up to sixteen concatenated STS3c channels;

(iv) From one to three STS3c channels mixed with from 39 to 45 STS1 channels subject to utilization of the total OC48 capacity; or

(v) From one to three STS12c channels mixed with from four to twelve OC3 channels subject to utilization of the total OC48 capacity.

(N)

Upon ordering OptiPoint service, the customer is responsible for identifying the STS signal configuration to be contained in each OC3, OC12, or OC48 service connection and each STS1, STS3, and/or STS12 payload content. This information is used in determining the route and connection in the network. If a new configuration is requested subsequent to the initial activation, the applicable configuration and/or additional labor charges, as set forth in Sections 6.8.2 and 13 following will apply on a per service basis.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangement (Cont'd)6.2.9 OptiPoint Services (Cont'd)(A) Basic Service Description (Cont'd)(1) Entrance Facilities (Cont'd)

OptiPoint service is provided with electronics that automatically activate in case of failure of the primary electronics. Since OptiPoint is a point-to-point service, SONET ring survivability will not be available. Rates for additional protection options requested by the customer will be quoted on an individual case basis and are in addition to the rates for OC3, OC12 and OC48 service.

(N)

OptiPoint entrance facilities provided to a customer's designated premises will be installed in a single, common space under Telephone Company control. An OptiPoint entrance facility may not be split between premises or terminated in multiple locations within a premises. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the OptiPoint entrance facility at the customer's premises location.

OptiPoint entrance facilities will be provided with or without Telephone Company provided terminal equipment at the customer's premises. When a customer elects to furnish its own terminal equipment at the customer's premises, the customer will work cooperatively with the Telephone Company to provide a compatible physical interface, and will identify approved equipment types for use in conjunction with Telephone Company provided equipment. The customer is responsible for providing all facilities and cabling necessary to connect customer provided equipment to this interface.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangement (Cont'd)6.2.9 OptiPoint Services (Cont'd)(A) Basic Service Description (Cont'd)(1) Entrance Facilities (Cont'd)

When entrance facilities are ordered in conjunction with special access high capacity services provisioned without terminating equipment at the customer's premises as set forth in Section 7 following, a common interface will be provisioned in accordance with the regulations governing shared use of facilities as set forth in Section 7.4.8 following. Switched access rates and charges as set forth in Section 6.8.2(A)(4) following will apply for each channel of the shared use facility that is used to provide switched access service.

OC3, OC12, and OC48 services may be configured for lower bandwidth services, at suitably equipped wire centers, by using appropriate OC3, OC12, or OC48 configuration nodes as set forth in (2) following.

(N)

(N)

OptiPoint entrance facilities are available only where facilities and operating conditions permit. The Telephone Company will work cooperatively with the customer to determine if suitable existing Telephone Company SONET based facilities are available to provide the service. The Telephone Company will not provision this service on facilities which are not suitable for OptiPoint. Where facilities and/or operating conditions do not permit the provision of OptiPoint entrance facilities, and the customer desires the Telephone Company to provision OptiPoint service, Special Construction charges, as set forth in Section 14 following, may apply.

## ACCESS SERVICE

6. Switched Access Service(Cont'd)6.2 Provision and Description of Switched Access Service Arrangement(Cont'd)6.2.9 OptiPoint Services(Cont'd)(A) Basic Service Description(Cont'd)(2) Service Configuration

There are two types of charges associated with a service configuration as described following:

- (a) Configuration Node - is an arrangement at the system level that allows an OC3 service bandwidth to add or drop lower level signals up to three DS3s or three groups of twenty-eight DS1s. An OC12 service bandwidth can add or drop lower level signals up to four OC3s or twelve DS3s or equivalent combinations of OC3s, DS3s, and DS1s. An OC48 service bandwidth can add or drop lower level signals up to four OC12s, sixteen OC3s, forty-eight DS3s, or equivalent combinations of OC12s, OC3s, and DS3s.

When the customer requests that a DS1 channel be connected to an OC48 service terminating at a Telephone Company central office, a DS3 to DS1 multiplexing arrangement, as set forth in 6.1.2(B)(5)(d) preceding, may be required.

Direct trunked transport can be connected between serving wire centers with configuration nodes at a lower OC-n speed than the channel termination, if the transport is between a lower speed configuration function and one of the following:

## (a) (Cont'd)

(N)

- another lower speed configuration function;
- another lower speed channel termination; or
- a lower speed Shared SONET Ring.

(M)

All of the above terminations must be provided at the same speed as the transport.

- (b) Configuration Card - provides for the interface at which a channelized or lower speed service terminates or originates from an OptiPoint optical line terminated at a customer designated premises or a Telephone Company central office. Lower level signals can be dropped from the STS-1 level on an OC3 or OC12 service to DS1, DS3 and OC3. On an OC48 service, lower level signals can be dropped from the STS-1 level to DS3, OC3 and OC12. When full OC3 and OC12 concatenated service is provided, no configuration node is required.

## ACCESS SERVICE

6. Switched Access Service(Cont'd)6.2 Provision and Description of Switched Access Service Arrangement(Cont'd)6.2.9 OptiPoint Services (Cont'd)(A) Basic Service Description (Cont'd)(2) Service Configuration (Cont'd)

When a customer requests an OptiPoint service configuration, both the applicable node and card rate elements will apply. The rates for the configuration node and associated card(s) apply at each end of the entrance facility when Telephone Company provided terminal equipment is provided at the customer premises.

(D)

(D)

When the customer elects to furnish its own terminal equipment at the customer premises, the rates for the configuration node and associated card(s) apply only at the end of the entrance facility where Telephone Company equipment is provided.

Due to the technical limitations of SONET equipment, additional electronics are required when OptiPoint OC48 switched transport configurations exceed 66 miles. In such situations, the customer will be charged for the additional electronics on an individual case basis.

(N)

(N)

Rates and charges for the configuration node and configuration cards are set forth in 6.8.2 following. Additional labor charges as set forth in Section 13 following will apply to configuration changes for STS level service.

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.1 Description and Application of Rates and Charges (Cont'd)(C) Nonrecurring Charges (Cont'd)(3) Service Rearrangements (Cont'd)

- For all other changes, including the addition of, or modifications to, optional features without separate nonrecurring charges, a charge equal to one half the Switched Transport nonrecurring (i.e., installation) charge will apply. When an optional feature is not required on each transmission path, but rather for an entire transmission path group, an end office or an access tandem switch, only one such charge will apply (i.e., it will not apply per transmission path).

The USOC "SWSRC" will be used to identify all of the above chargeable rearrangements.

(N)  
(N)

(4) 900 Access Service

A nonrecurring charge as specified in 6.8.5 following applies each time a change is made which involves the addition or deletion of 900 NXX codes to be routed to the customer. The charge is assessed per 900 NXX code added or deleted for each Telephone Company endoffice switch or access tandem in which translation changes are required. This charge applies to the initial loading of one or more 900 NXX codes required to establish service for the customer, and to any subsequent changes (i.e., additions or deletions) to those codes. There is also an Assembly of Route Pattern nonrecurring charge which applies once for each Telephone Company end office, but only on the customer's initial request to the Telephone Company for 900 Access Service in each state, LATA, access tandem or end office.

ISSUE DATE:  
January 21, 2000

## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.7 Rates and Regulations (Cont'd)6.7.16 Facility Hubs (Cont'd)

later date, at the option of the customer. The customer will be billed for a DS1 or DS3 Service Termination, Channel Mileage (when applicable), and the multiplexer at the time the facility is installed. Individual service rates (by service type) will apply for a Service Termination and additional Channel Mileage (as required) for each channelized service. These will be billed to the customer as each individual service is installed.

Cascading multiplexing occurs when a DS1 or DS3 facility is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a DS3 facility is de-multiplexed to twenty-eight DS1 facilities, and then one of the DS1 facilities is further de-multiplexed to individual Voice Grade channels.

When cascading multiplexing is performed, whether in the same or a different Hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different Hubbing locations, Channel Mileage charges also apply between the Hubs.

6.7.17 Switched Access Zone Density Plan

The Switched Access Zone Density Plan is applicable only to DS1, DS3, (C)  
OC3, OC12 and OC48 Entrance Facility, Direct-Trunked Transport, Tandem (N)  
Switched Transmission, Tandem Switching, DS1 to Voice Multiplexing, DS3  
to DS1 Multiplexing, and OptiPoint configuration node and configuration (N)  
card services as set forth in Section 6.1.2 and 6.2.9 preceding. (N)

The Switched Access Zone Density Plan will become effective concurrent with the first operational Expanded Interconnection arrangement, as described in Section 17.1 following, in the relevant Telephone Company study area.

## ACCESS SERVICE

7 Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Channel Types (Cont'd)

Gateway SONET Ring - A SONET-based dedicated ring with bandwidth capacities of 622.08 Mbps (OC12) and 2488.32 Mbps (OC48).

OptiPoint - A point-to-point channel providing high speed synchronous optical fiber-based full duplex data transmission capabilities at rates of 155.52 Mbps (OC3), 622.08 Mbps (OC12), or 2488.32 Mbps (OC48).

(N)

Detailed descriptions of each of the channel types are provided in 7.2 following.

The customer also has the option of ordering digital high capacity facilities (e.g., 1.544 and 44.736 Mbps) to a Telephone Company Hub for multiplexing to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing available at the Hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Descriptions of the optional features and functions available are also set forth in 7.2 following.

For example, a customer may order a 1.544 Mbps facility from a customer designated premises to a Telephone Company Hub. The 1.544 Mbps facility may be multiplexed at the same or a different Hub to Voice Grade channels or may be extended to other customer designated premises. Optional features may be added to either the 1.544 Mbps or the Voice Grade Channels.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.13 OptiPoint Services(A) Basic Service Description

OptiPoint services provide point-to-point high speed synchronous optical fiber-based full duplex data transmission capabilities. There are three levels of OptiPoint services. OptiPoint-3 (OC3) is provided at a terminating bit rate of 155.52 Mbps; OptiPoint-12 (OC12) is provided at a terminating bit rate of 622.08 Mbps; OptiPoint-48 is provided at a terminating bit rate of 2488.32 Mbps. (N)

OptiPoint services are provided for periods of three or five years. When a customer orders OptiPoint service, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the OptiPoint circuits. (N)

(I) Channel Termination

OptiPoint channel terminations may be used to connect the following: (N)

- a customer designated premises to another customer designated premises, configured at wire center locations between the two premises; or
- a customer designated premises to a Telephone Company location where service configuration is performed.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions(Cont'd)7.2.13 OptiPoint Service(Cont'd)(A) Basic Service Description (Cont'd)(1) Channel Termination(Cont'd)

- (a) Based on customer requirements, OC3 service may be provisioned in the following configurations: (T)
  - (i) OC3 - three Synchronous Transport Signals (STS1) channels which contain the following: (T)
    - one DS3 that is STS1 mapped;
    - up to 28 DS1s that are VT mapped;
    - an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network; or
  - (ii) A single concatenated STS3c channel. (T)
- (b) Based on customer requirements, OC12 service may be provisioned in the following configurations: (T)
  - (i) OC12 - twelve STS1 channels which each contain: (T)
    - one DS3 that is STS1 mapped;
    - up to 28 DS1s that are VT mapped;
    - an STS1 channel without constraint to payload mapping when the STS1 channel does not terminate via a service configuration function to DS1 or DS3 services within the network;

## ACCESS SERVICE

7. Special Access Service (Cont'd)

(N)

7.2 Service Descriptions (Cont'd)7.2.13 OptiPoint Service (Cont'd)(A) Basic Service Description (Cont'd)(1) Channel Termination (Cont'd)

## (c) (Cont'd)

(iii) Up to sixteen concatenated STS3c channels;

(iv) From one to three STS3c channels mixed with from 39 to 45 STS1 channels subject to utilization of the total OC48 capacity; or

(v) From one to three STS12c channels mixed with from four to twelve OC3 channels subject to utilization of the total OC48 capacity.

(N)

Upon ordering OptiPoint service, the customer is responsible for identifying the STS signal configuration to be contained in each OC3, OC12, or OC48 service connection and each STS1, STS3, and/or STS12 payload content. This information is used in determining the route and connection in the network. If a new configuration is requested subsequent to the initial activation, the applicable configuration and/or additional labor charges, as set forth in Sections 7.5.8 and 13 following will apply on a per service basis.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.13 OptiPoint Service (Cont'd)(A) Basic Service Description (Cont'd)(1) Channel Termination (Cont'd)

OptiPoint service is provided with electronics that automatically activate in case of failure of the primary electronics. Since OptiPoint is a point-to-point service, SONET ring survivability will not be available. Rates for additional protection options requested by the customer will be quoted on an individual case basis and are in addition to the rates for OC3, OC12, and OC48 service.

(N)

OptiPoint channel terminations provided to a customer's designated premises will be installed in a single, common space under Telephone Company control. An OptiPoint entrance facility may not be split between premises or terminated in multiple locations within a premises. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the OptiPoint entrance facility at the customer's premises location.

OptiPoint channel terminations will be provided with or without Telephone Company provided terminal equipment at the customer's premises. When a customer elects to furnish its own terminal equipment at the customer's premises, the customer will work cooperatively with the Telephone Company to provide a compatible physical interface, and will identify approved equipment types for use in conjunction with Telephone Company provided equipment. The customer is responsible for providing all facilities and cabling necessary to connect customer provided equipment to this interface.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.13 OptiPoint Service (Cont'd)(A) Basic Service Description (Cont'd)(1) Channel Termination (Cont'd)

OC3, OC12, and OC48 services may be configured for lower bandwidth services, at suitably equipped wire centers, by using appropriate OC3, OC12, or OC48 configuration nodes as set forth in (2) following. (N)

OptiPoint channel terminations are available only where facilities and operating conditions permit. The Telephone Company will work cooperatively with the customer to determine if suitable existing Telephone Company SONET based facilities are available to provide the service. The Telephone Company will not provision this service on facilities which are not suitable for OptiPoint. Where facilities and/or operating conditions do not permit the provision of OptiPoint service, and the customer desires the Telephone Company to provision OptiPoint service, Special Construction charges, as set forth in Section 14 following, may apply. ## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.13 OptiPoint Service (Cont'd)(A) Basic Service Description (Cont'd)(2) Service Configuration

There are two types of charges associated with a service configuration as described following:

- (a) Configuration Node - is an arrangement at the system level that allows an OC3 service bandwidth to add or drop lower level signals up to three DS3s or three groups of twenty-eight DS1s. An OC12 service bandwidth can add or drop lower level signals up to four OC3s or twelve DS3s or equivalent combinations of OC3s, DS3s, and DS1s. An OC48 service bandwidth can add or drop lower level signals up to four OC12s, sixteen OC3s, forty-eight DS3s, or equivalent combinations of OC12s, OC3s, and DS3s.

When the customer requests that a DS1 channel be connected to an OC48 service terminating at a Telephone Company central office, a DS3 to DS1 multiplexing arrangement, as set forth in 7.2.8(D)(2)(a) preceding, may be required.

Channel mileage can be connected between serving wire centers with configuration nodes at a lower OC-n speed than the channel termination, if the channel mileage is between a lower speed configuration function and one of the following:

## (a) (Cont'd)

(N)

- another lower speed configuration function;
- another lower speed channel termination; or
- a lower speed Shared SONET Ring.

(M)

All of the above terminations must be provided at the same speed as the transport.

- (b) Configuration Card - provides for the interface at which a channelized or lower speed service terminates or originates from an OptiPoint optical line terminated at a customer designated premises or a Telephone Company central office. Lower level signals can be dropped from the STS-1 level on an OC3 or OC12 service to DS1, DS3 and OC3. On an OC48 service, lower level signals can be dropped from the STS-1 level to DS3, OC3 and OC12. When full OC3 and OC12 concatenated service is provided, no configuration node is required.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.13 OptiPoint Service (Cont'd)(A) Basic Service Description (Cont'd)(2) Service Configuration (Cont'd)

When a customer requests an OptiPoint service configuration, both the applicable node and card rate elements will apply. The rates for the configuration node and associated card(s) apply at each end of the channel termination when Telephone Company provided terminal equipment is provided at the customer premises.

(D)

(D)

When the customer elects to furnish its own terminal equipment at the customer premises, the rates for the configuration node and associated card(s) apply only at the end of the channel termination where Telephone Company equipment is provided.

Due to the technical limitations of SONET equipment, additional electronics are required when OptiPoint OC48 channel mileage configurations exceed 66 miles. In such situations, the customer will be charged for the additional electronics on an individual case basis.

(N)

(N)

Rates and charges for the configuration node and configuration cards are set forth in 7.5.8 following. Additional labor charges as set forth in Section 13 following will apply to configuration changes for STS level service.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges(Cont'd)(3) Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.6(E) preceding or a change in the physical location of the point of termination at a customer designated premises. Changes in the type of service or service termination are treated as disconnects and starts. Changes in the physical location of the point of the termination are treated as moves and are described and charged for as set forth in 7.4.5 following.

The nonrecurring charges associated with upgrades in capacity (i.e., multiple DS0s converting to DS1s or multiple DS1s converting to DS3s) will not apply when the customer maintains the same customer premises location. Requests to add or change optional features will be subject to the nonrecurring charges associated with the features requested.

A nonrecurring service upgrade charge, as set for in Section 7.5.8 following, will apply per DS1 or DS3 upgraded when converting existing high capacity services to OptiPoint service. The charge does not apply when OptiPoint is ordered as new service and no existing high capacity services are being relocated to the OptiPoint service. However, the nonrecurring service upgrade charge will apply for each new DS1 or DS3 channel connected to OptiPoint service when existing DS1 or DS3 facilities between the points of termination are disconnected within 30 days of the order for new services.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.1 Types of Rates and Charges (Cont'd)(C) Nonrecurring Charges(Cont'd)(3) Service Rearrangements(Cont'd)

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service.

(M)  
|  
(M)

Administrative changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for the Access Service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name—e.g., AT&T-Long Lines to AT&T Communications),
- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number)
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction.

Certain material found on this page formerly appeared on 1st Revised Page 7-113.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.8 Shared Use of Digital High Capacity Service

Shared use occurs when special access service and switched access service are provided over the same high capacity DS1, DS3 or SONET based facilities through a common interface. The facility will be ordered, provided and rated as special access service (i.e., channel termination, channel mileage, multiplexing, configuration card and configuration node, if applicable; ring connection and ring transport; or entrance ring connection). The nonrecurring charge that applies when the shared use facility is installed will be the nonrecurring charge associated with the appropriate special access high capacity DS1, DS3 or SONET based service. The customer must place an order for each individual switched access or special access service utilizing the shared use facilities and specify the channel assignment for each such service. Individual service (i.e., switched or special access) nonrecurring charges will not apply to the individual channels of the shared use facility. Rating as special access will continue until such time as the customer chooses to use a portion of the available capacity for providing switched access service.

For special access high capacity DS1, DS3 or SONET based facilities, excluding Gateway SONET Ring Service, the special access channel termination, channel mileage, applicable multiplexing, configuration card and configuration node rates or ring connection and ring transport rates will be reduced by 1/24th for each DS1 channel, 1/672nd for each DS3 channel, 1/2016th for each OC3 channel, 1/8064th for each OC12 channel, or 1/32,256th for each OC48 channel activated for switched access service. Switched access rates and charges as set forth in Section 6.8 preceding will apply for each channel of shared use facility that is used to provide switched access service (i.e., 1/24th of the switched access entrance facility, direct-trunked transport, and applicable multiplexing rates will apply for each channel of a DS1 service or 1/672nd for each channel of a DS3 service activated for switched access service).

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.10 High Capacity Zone Density Plan

The High Capacity Zone Density Plan is applicable to DS1 and DS3 high capacity services as set forth in Section 7.2.8 preceding and OC3, OC12 and OC48 OptiPoint services as set forth in Section 7.2.13 preceding. The Zone Density Plan will become effective concurrent with the first operational Expanded Interconnection arrangement, as described in Section 17.1 following, in the relevant Telephone Company study area. (C)  
(N)  
(N)

The channel termination and channel mileage (fixed and per mile) rates applicable for high capacity services subject to the Zone Density Plan are dependent upon the zone in which the Telephone Company serving area is located. Channel mileage provided between wire centers in different zones will be assessed the rate for the higher zone. Specific Zone Density Charges are set forth in Section 7.5.8 following. Term Discount Plans available for services provided under zone density pricing are set forth in Section 7.5.10 following. The zones for each Telephone Company serving area are identified following:

## ACCESS SERVICE

7. Special Access Service (Cont'd)

## 7.4 Rate Regulations (Cont'd)

7.4.11 Special Access Term Discount Plan (Cont'd)(D) Service Rearrangements

When a circuit committed to a TDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 following, and will be assessed the nonrecurring installation charge associated with the month-to-month rates for that service.

(N)  
|  
(N)(E) 90 Day Review Period

No adjustments in monthly billing for a TDP, for being above or below the commitment threshold described in (B) preceding, will take place until 90 days after Telephone Company written notification to the customer that the commitment threshold has been exceeded or has not been met. This will ensure that customers will not be penalized for aberrations in channel termination and/or multiplexer counts caused by timing differentials in disconnection and installation.

Customer's bills will not be adjusted for being outside the threshold described in 7.4.11(B) preceding during the 90 day review period. Additionally, customers will continue to be billed the adjustments (following the 90 day review period) for being outside the described threshold until the commitment level is met or re-established. A new 90 day review period will be initiated if the customer's actual in-service level subsequently falls outside the described threshold.

Certain material omitted from this page now appears on 3rd Revised Page 7-139.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.11 Special Access Term Discount Plan (Cont'd)(F) Increasing the TDP Commitment Level

Customers may increase their commitment level at any time by notifying the Telephone Company in writing. An increase in the commitment level will not change the expiration date of the TDP.

When a commitment level is increased, the actual in-service channel termination and/or multiplexer level at the time of the increase will be used to calculate the new commitment threshold as described in Section 7.4.11(B) preceding.

(M)

(M)

(G) Decreasing the TDP Commitment Level and Termination Liabilities

Customers may only decrease their commitment level by paying termination liability charges on the number of channel terminations and/or multiplexers by which the commitment level is decreased. Termination liabilities will apply to applicable services covered by the TDP. For example, a customer has a commitment level of 150 channel terminations and/or multiplexers. The customer then decreases its commitment level to 125. The customer must pay a termination liability on the most recently disconnected 25 facilities, inclusive of all associated rate elements as listed above.

If a customer disconnects any portion of their TDP service prior to the expiration of the commitment period, the customer will be billed 50% of the monthly TDP charges for the remaining portion of the committed term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.11 Special Access Term Discount Plan (Cont'd)

(J) Upgrading a TDP Service (Cont'd)

When a customer upgrades a DS1 or DS3 service being billed TDP rates to a Gateway SONET Ring or OptiPoint service, the customer's DS1 or DS3 TDP commitment level will be reduced at the customer's request by an amount equal to the number of DS1 or DS3 special access circuits that are migrated to the Gateway SONET Ring or OptiPoint service. Termination liability charges will not apply to upgrades if the Gateway SONET Ring or OptiPoint service commitment period is greater than or equal to the existing TDP commitment period.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.11 Special Access Term Discount Plan(Cont'd)(K) Renewal of a TDP

At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates set forth in Section 7.5.10 following. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month digital data DS1, DS3 or Shared SONET Ring rates set forth in Sections 7.5.7, 7.5.8 and 7.5.11 following. The customer will have a 90 day grace period to renew their TDP before month-to-month rates will be assessed.

(L) Cancellation Charges

When a customer cancels an order for special access services being provided under a TDP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.

February 5, 2000

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.16 Premier Term Discount Plan

(A) General (Cont'd)

Customers who currently subscribe to the Telephone Company Term Discount Plan (TDP) or Federal Government Term Discount Plan (FGTDP), set forth in sections 7.4.11 preceding and 10.6.1(D) following, may convert to a PTDP without termination liability penalty under their existing TDP. Customers may disconnect or move special access circuits and not be subject to termination liability charges as long as the commitment levels are maintained.

(C)  
|  
(C)

(B) Commitment Level

All eligible special access rate elements for a given circuit (channel termination, channel mileage termination (fixed), channel mileage facility (per mile) and multiplexing) must be ordered for the same commitment period with the same service date for the same customer. A customer establishes a PTDP by committing all of their in service circuits eligible for the discount to a five year term. All future special access circuits ordered from the Telephone Company will be included in the plan. Circuits added to the PTDP after the plan is established will carry the plan effective date.

EFFECTIVE DATE:  
February 5, 2000

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Premier Term Discount Plan(Cont'd)(E) Termination Liability Penalty

A termination liability penalty will be assessed if the customer cancels the PTDP prior to the expiration date of the PTDP five year commitment. If shortfall penalties are assessed for six consecutive months in the same state, the PTDP will be cancelled and termination liability penalties will apply.

A termination liability penalty will be calculated by multiplying the customer's DS1 equivalent commitment level times the remaining months in the PTDP, times the termination liability charge set forth in 7.5.14(E) following.

For example, a customer has 1,000 DS1 equivalent circuits committed to a PTDP and terminates service in month 48. The customer will be charged the remaining 12 months times the 1000 DS1 equivalent circuits committed, times the termination liability charge of \$150, for a termination liability penalty of \$1,800,000.

(F) Rate Changes

In this section, the term "rate" refers to the charges associated with the entire circuit covered by the PTDP. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the plan. If a Telephone Company initiated rate increase causes PTDP rates to increase by more than 10% at any one time, the customer may cancel the PTDP without incurring termination liability charges.

## ACCESS SERVICE

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.16 Premier Term Discount Plan(Cont'd)(G) Renewal of a PTDP

At the end of the PTDP service commitment period, the customer will have 90 days to subscribe to a new PTDP at the prevailing rates set forth in Section 7.5.14 following. If the customer does not select a new PTDP, the rates will convert to the prevailing month-to-month special access rates set forth in Section 7.5 following, and will be effective as of the expiration date of the PTDP.

(H) Service Rearrangements

When a circuit committed to a PTDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 preceding, and will be assessed the nonrecurring installation charge associated with the month-to-month rates for that service.

(I) Cancellation Charges

When a customer cancels an order for special access service being provided under a PTDP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.

ACCESS SERVICE

13. Additional Labor and Miscellaneous Services(Cont'd)

13.1 Additional Labor(Cont'd)

13.1.6 Additional Installation Testing

Additional installation testing is that testing performed by the Telephone Company at the time of installation which is in addition to the normal preservice acceptance testing to ensure the satisfactory performance of Access Service ordered by the Customer. In no event shall a charge be made for Additional Labor that is related solely to testing with other telephone companies.

13.1.7 Other Labor

Other labor is that additional labor not included in 13.1.2 through 13.1.5 preceding and labor incurred to accommodate a specific customer request that involves only labor which is not covered by any other section of this tariff.

13.1.8 Charges for Additional Labor

Hourly charges are calculated from the time Telephone Company personnel are dispatched and end when the work is completed.
