Ms. Daisy Crockron - Chief
Docketing Department
The Public Utilities Commission of Ohio
180 East Broad Street - 10th Floor
Columbus, OH 43215-3793

Transmittal Letter
Revised Tariff Sheets Filed Pursuant to the
Commission's Order in Case No. 83-464-TP-COI
and
Case No. 90-5023-TP-TRF

RECEIVED
JAN 26 1999
PUBLIC UTILITIES COMMISSION
COLUMBUS, OHIO

Dear Ms. Crockron:

Revised tariff sheets have been filed with the FCC to amend GTOC Tariff FCC No. 1, Facilities for Interstate Access, in which GTE North Incorporated concurs for intrastate applications.

In accordance with your Commission's Order in Case No. 83-464-TP-COI, we are filing four (4) copies of these revised tariff sheets.

Transmittal No. 1239 - Effective January 14 & January 28, 2000.

The first portion of this filing is being made on not less than one day's notice under the Federal Communications Commission's pricing flexibility guidelines and will establish Customer Network Control for AT&T Wireless in California under Individual Case Basis (ICB) Rates and Charges. This filing also provides for Special Construction of DS1 facilities for GST Telecom in California under Section 10, Special Construction. This portion of the filing is scheduled to become effective January 14, 2000.

The second part of this filing is being made on 15 days' notice under the Commission's streamlined filing procedures and provides for the promotional waiver of nonrecurring charges for Frame Relay Service, High Capacity Broadband Access (HiBAC) Service and ATM Network Service for orders received on February 1, 2000 through April 30, 2000. In addition, this filing adds a billing code, makes minor text changes and corrections; and removes several ICBs for which a general tariff offering is now available. This portion of the filing is scheduled to become effective January 28, 2000.

Acknowledgement and date of receipt of this filing is requested.

Sincerely,

John W. Kennedy
Assistant Vice President-Regulatory
and Governmental Affairs

FACILITIES FOR INTERSTATE ACCESS

5. SPECIAL ACCESS (Cont'd)5.9 Individual Case Basis Rates and Charges (Cont'd)

<u>Customer Name</u>	<u>Description and Location</u>	<u>MTL/NRC MRC</u>	<u>GTOC</u>	<u>Termination Liability Period</u>
AT&T Wireless ID# CA9903392	Provide Customer Network Control (CNC) for connection to customer's Telephone Company provided DS1 and DS3 services.		GTE California Incorporated	3 years beginning January 14, 2000.

(N)

<u>USOC</u>	<u>Rate Elements</u>	<u>NRC</u>	<u>Three Year MRC</u>
(1ZZC5)	CNC Controller Connect	\$0	\$1,300.00
(1ZZC4)	DS3 Port Control-Per DS3 Port	0	98.00
(1ZZC3)	DS1 Port Control-Per DS1 Port	0	14.00

In addition to the applicable conditions set forth elsewhere in this tariff, the following conditions shall apply to this service:

- (a) The tariff rates for DS3 and DS1 services apply in addition to the rate elements above.
- (b) Termination liability charges include charges for the individual service elements shown above. The termination liability for subsequent installations begins on the date of installation. In the event the customer discontinues one or all of the service elements prior to the end of the Termination Liability Period, the customer shall pay 50% of all remaining monthly charges for the service element involved.
- (c) Termination liability charges, when applicable, are due in full within thirty (30) days of the date of termination of the service.
- (d) Should a general tariff offering for this service become available prior to the end of the Termination Liability Period set forth above, and the customer elects to convert to the general tariff rates, no termination liability charges will apply. The customer will be required to convert to the general tariff rates at the end of one year from the effective date of the general tariff, or discontinue the service without liability.

FACILITIES FOR INTERSTATE ACCESS

16. ADVANCED COMMUNICATIONS NETWORKS (Cont'd)16.7 Asynchronous Transfer Mode Network Service (Cont'd)(F) Rate Regulations (Cont'd)(3) Rate Application (Cont'd)

- Level 4: Up to 25% of port bandwidth may be utilized for Constant Bit Rate (CBR) and/or Variable Bit Rate-real time (VBR-rt) Quality of Service (QoS) priority processing and network transmission. Remaining bandwidth may be utilized for VBR-nrt, ABR or UBR services.
- Level 5: All PVCs ingressing the port require Variable Bit Rate-non real time (VBR-nrt). Available Bit Rate (ABR) and/or Unspecified Bit Rate (UBR) Quality of Service (QoS) processing and network transmission.

An ASR is required for programming and activation of PVCs and PVPs. PVCs will be considered a single virtual circuit extending from ingress port to egress port through the network. There are two classes of NRCs for the activation of a PVC or PVP. The "First PVC or PVP Activation" charge will apply for the first PVC or PVP activation ordered by a customer. If multiple PVC or PVP activations are requested on the same ASR, the "First PVC or PVP Activation" charge is assessed for the first PVC or PVP and the "Additional PVC or PVP Activation" charge will be assessed for each additional PVC or PVP. These charges will also apply for PVCs or PVPs rerouted or changed.

Additional PVCs or PVPs will not be added if the sum of the port bandwidth utilized by existing and additional PVCs or PVPs for Constant Bit Rate (CBR) and Variable Bit Rate-real time (VBR-rt) services exceeds the bandwidth allotted for these services within the subscribed Level of Service for that port. (The Level of Service will have to change to support the required bandwidth).

For purposes of determining the Level of Service required for a port and calculating the sum of port bandwidth utilized through the port, each CBR PVC and CBR PVP is to be added to the total at 100% of the bit rate utilized, and each VBR-rt PVC is to be added to the total at 100% of the peak cell rate (converted to Bits Per Second).

The derived total bandwidth utilized by the above described PVCs and PVPs is then divided by the port bandwidth to determine the percentage of port bandwidth utilized. This percentage should then be compared to the Level of Service definitions in 16.7.(F)(3) to determine the Level of Service required.

Example:

$$\frac{\text{Sum CBR PVC and PVP Bit Rates} + [\text{Sum VBR-rt PVC Peak Cell Rates} \times 53 \times 8]}{\text{ATM Port Bit Rate}}$$

ATM port bit rates are defined as follows:

- DS1 = 1.544 megabits per second (T)
- DS3 = 44.736 megabits per second
- OC3c = 155.52 megabits per second (D)
- OC12c = 622.06 megabits per second

The bandwidth consumed or assigned to a PVP will be considered to be "real time" regardless of the actual QoS value established for the PVP, and will be treated in port bandwidth consumption calculations in the same manner as CBR or VBR-real time PVCs. Therefore, "real time" bandwidth calculations involving PVPs will result in a minimum Level 4 Network Level of Service requirement, but higher Levels of Service may be required, depending on actual bandwidth consumed by the PVPs assigned through any individual port.
