**Inland-Jordan Q11 & Q14 138 kV Transmission Line Loops to CH Substation
Project Engineering Change
Case No. 12-2397-EL-BLN**

Dear Mr. O'Dell:

This letter will serve as notice of an engineering design change for the Inland-Jordan Q11 & Q14 138 kV Transmission Line Loops to CH Substation Project. Based upon the engineering design, it is necessary to use 795 kcmil ACSS/TW Type 16 (20/7 Strand) conductor in place of the 795 kcmil 36/1 ACSR proposed in the original LON filing. Other structures and features of the Project are not affected by this engineering change.

Should the Ohio Power Siting Board desire further information or discussion of this submittal, please contact me at (330) 384-5955.

Sincerely,

Jessica Thacker
Engineer
Energy Delivery Transmission and Substation
Design
FirstEnergy Service Company
