ON Sunday Morning FEBRUARY 9 AT ABOUT 4 AM
my Family & I Awoke to a power outage in our
home. The home was full of smoke. 8 breakers in
our 200 Amp. Box popped off. We thought our
home might be on fire. I took a spotlight outside
to look for smoke or fire. I didn't see any.
I looked at the electric meter. It was dead.
So we called AEP. You see we haven't switched
providers. We stick with AEP. They were quick
to respond. Our Power was back on Sunday Morn.
Then we discovered the scope of the damages.

We need to have an electrician check our complete
electric circuit to assure us we are now safe.

Here is a list of items we currently know
are not operating. (2 Flat Screen T.V.'s 42")
(Nintendo Wii Game System) (DVD Player)
(Heated Mattress Pad) (2 Electric Heaters) (Monster Surge
Protector) (2 Motion lights) (Electric Smooth Top Range)
(Humidifier) (Rudd Furnace) (2 Duct Boost Fans)
(Central A.C. ?) (Kenmore Frig. + Freezer) ^{NOISE} when kicks on

These items need replaced. Could future items
go bad?
