Lake Village Club, Inc., aka Lake Village Campground is a member owned campground and one of two customers of Camplands Water. The members have asked that the directors present to the PUCO information that may help with their decision on the filing of the water rate increase proposed by Camplands Water (Case# 13-1690-WW-AIR).

The directors of Lake Village Club would like to present facts we feel pertinent for the commission to understand Lake Village Campground's position and for the commission to come to an equitable consideration. Lake Village Club is a nonprofit organization owned by members who purchase lots to place their campers and then pay annual membership dues. Lake Village Club has approximately 350 total members.

We feel that Lake Village Campground is not a major consumer of the water produced by Camplands Water. The water service to the majority of the campground is turned off about October 15 and turned on about April 15. Water service is only available at the clubhouse during this time. Lake Village Campground has been paying a flat rate each month for their water usage. We agree with the staff recommendation that an equitable portion of the usage for Lake Village should be reduced to 18%. Our estimate, by taking into account the size of our membership, is that a more accurate assessment of usage would be about 10-12%. We also feel the recommendation of the staff

for the installation of a functioning water meter is correct and should be installed or repaired by Camplands Water. This would allow for Camplands Water to get a better assessment as to the water usage of Lake Village Campgrounds and Holiday Camplands.

Two directors from Lake Village Club will be attending the hearing on March 13, 2014 to answer questions or concerns that the commission or the staff might have.
