COMPLAINT DESCRIPTION:

I understand AEP has filed a request to install, among other enhancements, "Smart meters". I'd like to file a request that residents be permitted an exception process to the installation of such meters. I understand these meters work using wireless transmission.

I believe my house is in the path of such installation request by AEP.

I have experienced sensitivity to wireless devices in my own home and manage them closely. It is difficult to avoid wireless these days, but the home is a refuge from the environment. In my own home

I've turned off wireless devices and routers. I use a cell phone, but sparingly and I constantly turn it off to avoid exposure to the EMF. When these devices are active I experience negative health effects and I understand there is a growing body of others who experience the same. I am just now becoming aware of the impact.

A smart meter installed on my house would be located directly next to my bedroom, where I cannot control it, limit it. I am concerned about long term health effects of such devices.

I urge you to provide consumers the option to opt out of smart meter installation and exposure.
