CASE NO. 14-2273-GA-BNR
PROJECT CONSTRUCTION ACCESS PLAN
GROUP 3 LINE #12273 PROJECT,
JACKSON TOWNSHIP, STARK COUNTY, OHIO
HIGH PRESSURE STORAGE LINE

The following information is being provided in accordance with the Ohio Power Siting Board Staff Report of Investigation dated February 10, 2014. This submission pertains to the items requested in Conditions (1) through (6).

Condition (1) states that Dominion East Ohio (“DEO”) must obtain and comply with all applicable permits, and submit copies of said permits and authorizations to the staff. At this time, DEO has received all applicable permits and copies have been filed with the board.

Permit Type	Submitted	Approval
PCN	11/19/13 revised submitted 01/08/14	1/31/2014
401 WQC	NA	
ODNR	01/09/13	02/13/13
USFWS Consultation	01/09/14	1/27/2014
NPDES NOI	01/09/14	1/30/2014
County NOI	1/13/2014	2/19/2014
City NOI	NA	
HTNOI	TBD	

Condition (2) states that DEO must conduct a pre-construction meeting with staff prior to vegetation clearing and construction. The first pre-construction meeting was held on March 6, 2014 for the clearing of potential bat trees to meet permit requirements. An additional pre-construction meeting will be held on April 7, 2014 at 10:00 a.m. to review construction and the remainder of the tree clearing.

HIGH PRESSURE STORAGE LINE

Condition (3) states that DEO must adhere to seasonal cutting dates for removal of suitable Indiana Bat Habitat Trees. All necessary potential Indiana Bat tree were cleared prior to April 1, 2014, therefore condition (3) has been completed. No additional potential Indiana Bat trees will be cleared as part of this project, and any bat trees that may still be within the right-of-way extents will be flagged appropriately in the field to avoid.

Condition (4) states that DEO shall not complete any in-water work from March 15 to June 30 unless coordination efforts with Ohio Department of Natural Resources (“ODNR”) reflect a different course of action. DEO submitted to ODNR and the U.S. Army Corps of Engineers an in-water work waiver for work on Nimisilla Creek during this time period. The response is still outstanding and will be forwarded once received.

Condition (5) states that the applicant shall institute a public information program to include notification to property owners a minimum of 30 days in advance of construction. Letters have been sent to all impacted landowners and those surrounding the construction area. Additional letters were sent out 30 days in advance of construction to give a more precise date on when construction will start. The land agent has been in contact with many of the affected landowners to answer any questions and find out if the trees to be cleared should stay on site or be removed.

Condition (6) asks DEO to coordinate all traffic related issuers with the appropriate entities. DEO has a contract with Area Wide Services(or Area Wide Protective?) to provide traffic control on an as needed basis. In addition permits to open cut the roads on this project have been received.

A construction access plan map is attached in attachment A, this map shows access routes, clearing extents, fences, and environmentally sensitive areas. Information on how DEO will
