

Application to Commit
Energy Efficiency/Peak Demand
Reduction Programs
(Mercantile Customers Only)

**Case No.: 14-0134-EL-EEC** 

Mercantile Customer: Key Center Properties LLC - Public Square North

Electric Utility: The Cleveland Electric Illuminating Company

Program Title or

Key Tower Lighting Upgrades/Replacements

Description:

Rule 4901:1-39-05(F), Ohio Administrative Code (O.A.C.), permits a mercantile customer to file, either individually or jointly with an electric utility, an application to commit the customer's existing demand reduction, demand response, and energy efficiency programs for integration with the electric utility's programs. The following application form is to be used by mercantile customers, either individually or jointly with their electric utility, to apply for commitment of such programs in accordance with the Commission's pilot program established in Case No. <u>10-834-EL-POR</u>

Completed applications requesting the cash rebate reasonable arrangement option (Option 1) in lieu of an exemption from the electric utility's energy efficiency and demand reduction (EEDR) rider will be automatically approved on the sixty-first calendar day after filing, unless the Commission, or an attorney examiner, suspends or denies the application prior to that time. Completed applications requesting the exemption from the EEDR rider (Option 2) will also qualify for the 60-day automatic approval so long as the exemption period does not exceed 24 months. Rider exemptions for periods of more than 24 months will be reviewed by the Commission Staff and are only approved up the issuance of a Commission order.

Complete a separate application for each customer program. Projects undertaken by a customer as a single program at a single location or at various locations within the same service territory should be submitted together as a single program filing, when possible. Check all boxes that are applicable to your program. For each box checked, be sure to complete all subparts of the question, and provide all requested additional information. Submittal of incomplete applications may result in a suspension of the automatic approval process or denial of the application.

Any confidential or trade secret information may be submitted to Staff on disc or via email at ee-pdr@puc.state.oh.us.

Revised April 9, 2014 -1-

## **Section 1: Mercantile Customer Information**

Name: Key Center Properties LLC - Public Square North

Principal address:127 Public Square Suite 2727 Cleveland, OH 44114

Address of facility for which this energy efficiency program applies:127 Public Square Cleveland, OH 44114

Name and telephone number for responses to questions: Curt Sonntag 216-687-0500 ext. 202

2											
Elec	tricit	y use by the customer (check the box(es) that apply):									
		The customer uses more than seven hundred thousand kilowatt hours per year at the above facility. (Please attach documentation.)									
		The customer is part of a national account involving multiple facilities in one or more states. (Please attach documentation.)									
		Section 2: Application Information									
A)	The	customer is filing this application (choose which applies):									
		Individually, without electric utility participation.									
		Jointly with the electric utility.									
B)	The	electric utility is: The Cleveland Electric Illuminating Company									
C)	The	customer is offering to commit (check any that apply):									
		Energy savings from the customer's energy efficiency program. (Complete Sections 3, 5, 6, and 7.)									
		Capacity savings from the customer's demand response/demand reduction program. (Complete Sections 4, 5, 6, and 7.)									
		Both the energy savings and the capacity savings from the customer's energy efficiency program. (Complete all sections of the Application.)									

Revised June 24, 2011 -2-

# **Section 3: Energy Efficiency Programs**

A)	The	customer's energy efficiency program involves (check those that apply):
		Early replacement of fully functioning equipment with new equipment. (Provide the date on which the customer replaced fully functioning equipment, and the date on which the customer would have replaced such equipment if it had not been replaced early. Please include a brief explanation for how the customer determined this future replacement date (or, if not known, please explain why this is not known)). If Checked, Please see Exhibit 1 and Exhibit 2
		Installation of new equipment to replace equipment that needed to be replaced The customer installed new equipment on the following date(s):
		Installation of new equipment for new construction or facility expansion. The customer installed new equipment on the following date(s):
		Behavioral or operational improvement.
В)	Ene	rgy savings achieved/to be achieved by the energy efficiency program:
	1)	If you checked the box indicating that the project involves the early replacement of fully functioning equipment replaced with new equipment, then calculate the annual savings [(kWh used by the original equipment) – (kWh used by new equipment) = (kWh per year saved)]. Please attach your calculations and record the results below:
		Annual savings: 330,110 kWh
	2)	If you checked the box indicating that the customer installed new equipment to replace equipment that needed to be replaced, then calculate the annual savings [(kWh used by less efficient new equipment) – (kWh used by the higher efficiency new equipment) = (kWh per year saved)]. Please attach your calculations and record the results below:
		Annual savings:kWh
		Please describe any less efficient new equipment that was rejected in favor of the more efficient new equipment. <b>Please see Exhibit 1 if applicable</b>

Revised June 24, 2011 -3-

3) If you checked the box indicating that the project involves equipment for new construction or facility expansion, then calculate the annual savings [(kWh used by less efficient new equipment) – (kWh used by higher efficiency new equipment) = (kWh per year saved)]. Please attach your calculations and record the results below:

Annua	l savings:	kWh

Please describe the less efficient new equipment that was rejected in favor of the more efficient new equipment. **Please see Exhibit 1 if applicable** 

4) If you checked the box indicating that the project involves behavioral or operational improvements, provide a description of how the annual savings were determined.

Revised June 24, 2011 -4-

# **Section 4: Demand Reduction/Demand Response Programs**

A)	The	customer's program involves (check the one that applies):
		Coincident peak-demand savings from the customer's energy efficiency program.
		Actual peak-demand reduction. (Attach a description and documentation of the peak-demand reduction.)
		Potential peak-demand reduction (check the one that applies):
		☐ The customer's peak-demand reduction program meets the requirements to be counted as a capacity resource under a tariff of a regional transmission organization (RTO) approved by the Federal Energy Regulatory Commission.
		☐ The customer's peak-demand reduction program meets the requirements to be counted as a capacity resource under a program that is equivalent to an RTO program, which has been approved by the Public Utilities Commission of Ohio.
B)	On	what date did the customer initiate its demand reduction program?
	2/1	<u>/12</u>
C)		at is the peak demand reduction achieved or capable of being achieved ow calculations through which this was determined):
		<u>58</u> kW

Revised June 24, 2011 -5-

## Section 5: Request for Cash Rebate Reasonable Arrangement (Option 1) or Exemption from Rider (Option 2)

Under this section, check the box that applies and fill in all blanks relating to that choice.

Note: If Option 2 is selected, the application will not qualify for the 60-day automatic approval. All applications, however, will be considered on a timely basis by the Commission.

A)	The custor	ner is applying for:							
	Optio	on 1: A cash rebate reasonable arrangement.							
	OR								
		on 2: An exemption from the energy efficiency cost recovery anism implemented by the electric utility.							
	OR								
	Com	mitment payment							
В)	The value	of the option that the customer is seeking is:							
	Option 1:	A cash rebate reasonable arrangement, which is the lesser of (show both amounts):							
		A cash rebate of \$12,079. (Rebate shall not exceed 50% project cost. Attach documentation showing the methodology used to determine the cash rebate value and calculations showing how this payment amount was determined.)							
	Option 2:	An exemption from payment of the electric utility's energy efficiency/peak demand reduction rider.							
		An exemption from payment of the electric utility's energy efficiency/peak demand reduction rider for months (not to exceed 24 months). (Attach calculations showing how this time period was determined.)							
		OR							
		A commitment payment valued at no more than \$ (Attach documentation and calculations showing how this payment amount was determined.)							

Revised June 24, 2011 -6-

Ongoing exemption from payment of the electric utility's energy efficiency/peak demand reduction rider for an initial period of 24 months because this program is part of the customer's ongoing efficiency program. (Attach documentation that establishes the ongoing nature of the program.) In order to continue the exemption beyond the initial 24 month period, the customer will need to provide a future application establishing additional energy savings and the continuance of the organization's energy efficiency program.)

#### **Section 6: Cost Effectiveness**

OR

The program is cost effective because it has a benefit/cost ratio greater than 1 using the (choose which applies): Total Resource Cost (TRC) Test. The calculated TRC value is: (Continue to Subsection 1, then skip Subsection 2) Utility Cost Test (UCT). The calculated UCT value is: See Exhibit 3 (Skip to Subsection 2.) Subsection 1: TRC Test Used (please fill in all blanks). The TRC value of the program is calculated by dividing the value of our avoided supply costs (generation capacity, energy, and any transmission or distribution) by the sum of our program overhead and installation costs and any incremental measure costs paid by either the customer or the electric utility. The electric utility's avoided supply costs were \_\_\_\_\_. Our program costs were \_\_\_\_\_. The incremental measure costs were \_\_\_\_\_.

Revised June 24, 2011 -7-

### Subsection 2: UCT Used (please fill in all blanks).

We calculated the UCT value of our program by dividing the value of our avoided supply costs (capacity and energy) by the costs to our electric utility (including administrative costs and incentives paid or rider exemption costs) to obtain our commitment.

Our avoided supply costs were See Exhibit 3

The utility's program costs were **See Exhibit 3** 

The utility's incentive costs/rebate costs were **See Exhibit 3** 

### Section 7: Additional Information

Please attach the following supporting documentation to this application:

- Narrative description of the program including, but not limited to, make, model, and year of any installed and replaced equipment.
- A copy of the formal declaration or agreement that commits the program or measure to the electric utility, including:
  - 1) any confidentiality requirements associated with the agreement;
  - 2) a description of any consequences of noncompliance with the terms of the commitment;
  - 3) a description of coordination requirements between the customer and the electric utility with regard to peak demand reduction;
  - 4) permission by the customer to the electric utility and Commission staff and consultants to measure and verify energy savings and/or peak-demand reductions resulting from your program; and,
  - 5) a commitment by the customer to provide an annual report on your energy savings and electric utility peak-demand reductions achieved.
- A description of all methodologies, protocols, and practices used or proposed to be used in measuring and verifying program results. Additionally, identify and explain all deviations from any program measurement and verification guidelines that may be published by the Commission.

Revised June 24, 2011 -8-

#### Notes

(2) The eligible rebate amount is based upon 75% of the rebates offered by the FirstEnergy Commercial and Industrial Energy Efficiency programs or 75% of \$0.08/kWh for custom programs for all energy savings eligible for a cash rebate as defined in the PUCO order in Case NO.10-834-EL-EEC dated 9/15/2010, not to exceed the lesser of 50% of the project cost or \$250,000 per project. The rebate also cannot exceed \$500,000 per customer per year, per utility service territory.

<sup>(1)</sup> Customer's usage is adjusted to account for the effects of the energy efficiency programs included in this application. When applicable, such adjustments are prorated to the in-service date to account for partial year savings.

#### **Exhibit 3 Utility Cost Test**

#### **Notes**

- (A) From Exhibit 2, = kWh saved / 1000
- (B) This value represents avoided energy costs (wholesale energy prices) from the Department of Energy, Energy Information Administration's 2009 Annual Energy Outlook (AEO) low oil prices case. The AEO represents a national average energy price, so for a better representation of the energy price that Ohio customers would see, a Cinergy Hub equivalent price was derived by applying a ratio based on three years of historic national average and Cinergy Hub prices. This value is consistent with avoided cost assumptions used in EE&PDR Program Portfolio and Initial Benchmark Report, filed Dec 15, 2009 (See Section 8.1, paragraph a).
- (C) = (A) \* (B)
- (D) Represents the utility's costs incurred for self-directed mercantile applications for applications filed and applications in progress. Includes incremental costs of legal fees, fixed administrative expenses, etc.
- (E) This is the amount of the cash rebate paid to the customer for this project.
- (F) Based on approximate Administrator's variable compensation for purposes of calculating the UCT, actual compensation may be less.
- (G) = (D) + (E) + (F)
- (H) = (C) / (G)

# Project Estimated Annual Savings Summary

Lighting	
Estimated Annual kWh Savings	111,828
Total Change in Connected Load	11.40
Annual Estimated Cost Savings	\$11,182.80
Annual Operating Hours	8,760
Interior Lighting Incentive @ \$0.05/kWh (excluding retrofit CFLs, sensors, or LED exit signs)	\$5,591.40
Exterior Lighting Incentive @ \$0.05/kWh (excluding retrofit CFLs, sensors, or LED exit signs)	\$0.00
Total retrofit CFL Incentive @ \$1/screw-in CFL lamp; \$15/hard- wired CFL lamp (includes all retrofit CFLs, both interior and exterior)	\$0.00
Total retrofit LED Exit Incentive @ \$10/exit sign	\$0.00
Total Lighting Controls Incentive @ \$25/occupancy sensor and \$25/daylight sensor (includes all Lighting Controls, both interior and exterior)	\$0.00
Total Calculated Incentive	\$5,591.40
Total Fixture Quantity excluding retrofit CFLs and LED Exit Signs	139

Total Lamp Quantity for retrofit Screw-In

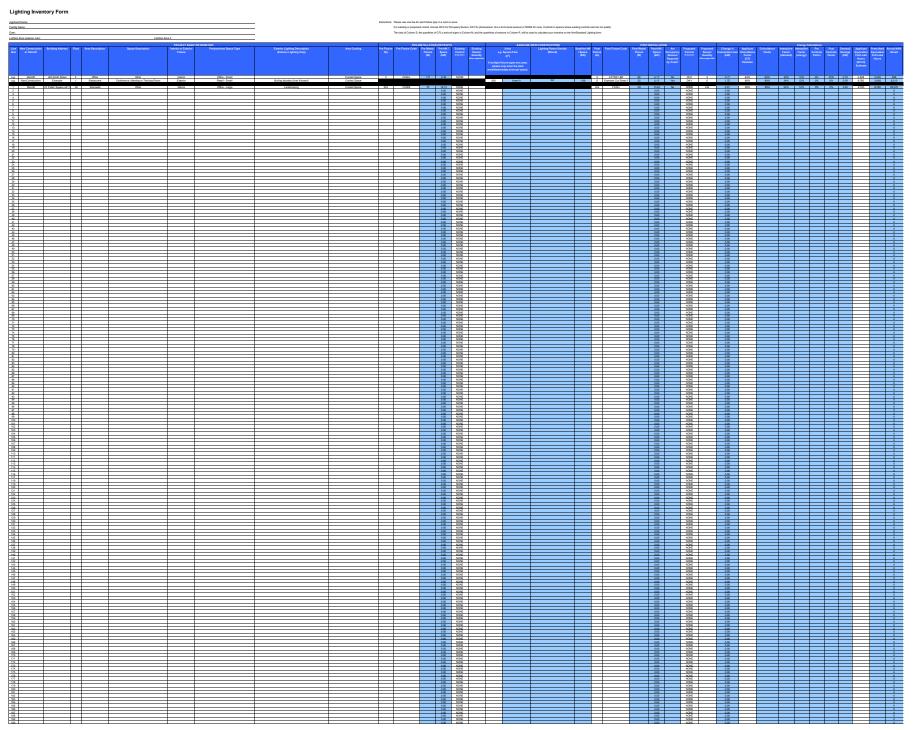

Proget 47: Main Tower Tobby

Total Lamp Quantity for retrofit Hard-Wired CFLs	0,
Total Fixture Quantity for retrofit LED Exit	0
Total Quantity for Occupancy Sensors	0
Total Quantity for Daylight Sensors	0

Please briefly describe how you estimated your coincidence factor (CF) and applicant equivalent full-load hours (EFLH) for facility type "Other" indicated on the Lighting Form tab

Demand Savings (For Internal Use Only)

12.98

- safe, dependable illumination while
- celling or wall mounting Bl-level fixtures operate at a low standby light level, offering safety and security with full light output Instantly upon occupancy with areas fully lit only as needed

conserving energy. Suitable for

features

A unique bl-level luminaire

controlled by an integral ultra-sonic

motion sensor, designed to provide

- Ideal for stairwells, restrooms, laundry rooms and other areas where maximum light levels are not required on a constant basis
- The ultra-sonic sensor features enhanced sensitivity and a lamp conditioning circuit (patented) that keeps new lamps on for 100 hours to assure long lamp life and proper operation
- For safety and compliance purposes In areas designated as emergency egress, we recommend choosing a standby light level that will provide minimum code compliant light levels while in the standby mode. In most municipalities, this is 1 FC average (2 FC in NYC). See back for options

- Housings are die-formed of code gauge steel, with riveted socket supports
- Quality construction throughout for long-term dependable service
- New York City Department of Buildings calendar number #43525
- Ends are die formed for a clean, smooth look
- Ample knockouts are provided for convenient mounting with recessed or surface power feeds
- Meets ADA requirements for wall mounting
- All fixtures are U.L. listed and IBEW union made

### diffuser

- One-piece extruded linear ribbed clear, light stabilized acrylic is standard, 100% DR acrylic available
- Features a linear refractive pattern for even illumination
- Grooved formation on the edges allow for a tight, no light leak attachment to the body
- Optional white powder coated perforated steel diffuser

#### electrical

- All electrical components are U.L. listed
- Ballasts are class P, thermally protected T8 Electronic
- Optional battery backup available for one or two light emergency operation at various output levels. Please consult factory for your specific emergency pack requirements

#### flalsh

- Prior to painting, all metal parts are treated with a multi-stage phosphate bonding process to ensure adhesion and inhibit rusting
- Painted with a lighting grade baked white enamel, having a reflectance factor exceeding 87% for premium quality and durability

#### sensor

- High frequency, extremely sensitive ultra-sonic, internally mounted
- LED status indicator light
- Exclusive lamp conditioning circuit (patented)
- Fall-safe feature switches light level to high (100%) if sensor is physically damaged
- S minute walk-test feature, easy-set time and sensitivity controls, compact design

All units are U.L. listed as emergency power and lighting equipment (U.L.-924) when equipped with optional bottery back up and meet requirements of the life safety code/NFPA101, NEC/OSHA and most state and local codes.

Philips A-shape Dimmable LED Lamp

Ideal for decorative and ambient lighting in retail outlets, hotels, restaurants, government buildings, and multi-unit residences

# Attractive, dimmable LED alternative to popular incandescents

Philips A-shape Dimmable LED Lamps are the smart LED alternative to standard incandescent A-shape lamps. The unique lamp design provides omni-directional light with excellent dimming performance.

#### High efficacy LED accent light

- First 60W incandescent equivalent A19 LED bulb to be ENERGY STAR® Qualified
- New 8W design is ENERGY STAR® Qualified, and replaces a 40W incandescent equivalent A19 LED bulb!
- 17W A21 ENERGY STAR® Qualified bulb replaces a 75W standard incandescent equivalent A21 bulb\*\*
- 22W A21 bulb replaces a 100W standard incandescent equivalent A21 bulb
- Smooth dimming to 10% of full light levels\*
- 25,000 hour rated average life<sup>2</sup>
- Emits virtually no UV/IR light in the beam
- Contains no mercury
- · Remote phosphor (yellow) disappears when energized to create even, soft, white light

#### Easy to experience

- Long life properties—lowers maintenance costs by reducing re-lamp frequency
- Will not fade colors, avoids inventory spoilage
- · 3-year or 5-year limited warranty depending upon operating hours

#### Philips A-shape Dimmable LED Lamp

- When comparing this 8W LED A19 having 470 lumens to the standard 40W incandescent A19 having 400 lumens.
   Rated average life is based on engineering testing and probability analysis.

- Based on photometric testing consistent with IES UN-79.
   Dimmable when using leading edge dimmers (see Philips Website: www.philips.com/ledtechguide for compatible leading edge dimmers).
- \*\* When comparing this 17W LED A21 having 1100 lumens to the standard 75W incandescent A21 having 1100 lumens.
  † When comparing this 22W Philips LED A21 having 1780 to the standard 100W incandescent A21 having 1440 lumens
- This lamp is ENERGY STAR® Qualified.

### Energy Efficiency

Present Wattage	100 W
x Annual Operating Hours	4,000 hrs
	= 400,000 watt-hours
÷1,000	= 400 kWh per year
x kWh rate of \$0.11	= \$44.00 per year
× 100 lamps per space	= \$4,400 annual energy cost per spa
ammeng dampé aneg mbé a:	augus an chair an
Present Wattage	
x Annual Operating Hours	4,000 hrs
	= 88,000 watt-hours
÷1,000	= 88 kWh per year
	= \$9.68 per year

93/437/00

This energy saving example shows an application of 100 lamps in a space currently using 100 incandescent 100W, 1780 lumen A21 lamps, operating 4,000 hours per year at a cost of \$0.11 per kWh.† Your actual savings may vary depending on the energy costs in your geographic location.

Replacing 100 standard incandescent 100W 1780 lumen A-lamps with Philips 22W Philips LED A21 lamps can provide significant energy cost savings of \$3,432,00 per year! Potential savings from the reduction in HVAC costs as a result of using a lower wattage lamp that emits less heat is an additional benefit not included in this example.

Total Estimated Annual Savings

#### WARNINGS AND CAUTIONS

- Suitable for damp locations.
- · Not for use in totally enclosed luminaires (fixtures).
- · This device is not intended for use with emergency exit fixtures or emergency lights.
- Before replacing, turn off power and let lamp cool to avoid electrical shock or burn.

www.philips.com

CAUTION: Risk of electric shock. Do not use where directly exposed to water.

NOTES: This device complies with Part IS of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference that may cause undesired operation. This Class B digital apparatus complies with Canadian ICES-003.

<sup>†</sup> Light output of the 22W Philips A21 1780 lumens compares to the 100W standard ncandescent A21 at 1780 lumens

<sup>&</sup>lt;sup>6</sup> Based on 100 lamps per space operating at 4,000 hours per year.

Ployed 3 Cut Sheet

By High-Efficiency Electronic Ballast

ATTACHMENT A.3 GE BALLASTS

TRANSFORMING THE POWER OF LIGHT" BREAKTHROUGH TECHNOLOGY THAT DRAMATICALLY IMPROVES EFFICIENCY, SIMPLIFIES INSTALLATION AND DELIVERS OPTIMAL LAMP PERFORMANCE.

The right ballast. The right performance. The right light.

# **GE** revolutionizes lighting again with new, breakthrough technology.

In the GE labs, our engineers have developed a new breed of ballasts to make lighting systems that save more energy, are more adaptable, and deliver optimal lamp performance. The innovative, patented

There's more to technology in our new UltraMax™ electronic ballasts exceeds expectations, and is like nothing else available.

# Multi-Voltage technology means a single UltraMax<sup>™</sup> model handles voltage from 120 through 277.

UltraMax™ Ballasts can virtually "read" the incoming voltage and adapt automatically to any voltage from 108V to 305V. The benefits of Multi-Voltage Control (MVC) are obvious:

· Fewer models handle more jobs, eliminating inventory hassles.

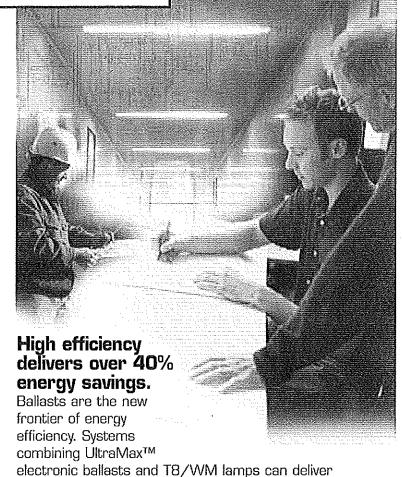

One patented GE ballast handles 120V to 277V

- MVC simplifies installation and eliminates guesswork at the iob site.
- MVC compensates for incoming voltage fluctuations or variations from unreliable power.

# UltraMax is the only full line of T8 ballasts with a UL Type CC Anti-Arc Rating.

UL Type CC Rating is a stringent designation of protection against arcing in electrical devices. GE's Arc-Guard design eliminates the damaging effects arcing can have on lamps, ballasts and sockets.

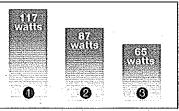

over 40% energy savings over standard electromagnetically ballasted T12 systems. Since energy costs are typically 80% of the overall cost of light, a more efficient system can pay for itself in a very short time and provide an excellent return on investment.

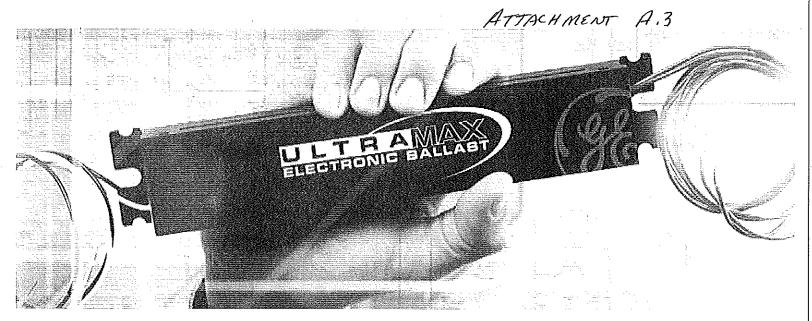

# UltraMax is ultra lamp friendly.

With an industry low lamp current crest factor (LCCF) of 1.4, UltraMax ensures optimal lamp operation and maximum lamp life, which can save on lamp and maintenance costs and ensures GE's Ultra System warranty.

#### COMPARE THE ENERGY USE OF A THREE LAMP FIXTURE

- STANDARD T12/WM SYSTEM
- STANDARD ELECTRONIC T8 SYSTEM
- GE ULTRAMAX L SYSTEM WITH F28T8/UMX LAMPS

# Active Current Regulation (ACR) technology is a patented advantage.

UltraMax's patented ACR modular design means individual inverter modules regulate the output current to each lamp. So, unlike conventional ballasts, if one lamp fails, the remaining lamps are not forced to operate at a higher current. This ensures optimal lamp performance.

# Anti-Striation Control for better light quality, with no striations.

UltraMax is the only line of T8 ballasts with Anti-Striation Control. This advanced technology eliminates the maintenance issues caused by striating lamps, often referred to as spiraling or swirling. This provides a flicker- and worry-free environment.

# Fully parallel independent lamp operation makes system easier to maintain.

If one lamp fails, all the others in the system stay lit. That means system maintenance is easier to manage.

# UltraMax is Ultra Cool. Electronic Ballast

Ultra/Max's high efficiency design results in ultra-cool operation that can provide additional AC energy savings, especially during peak demand periods. Combine GE's Ultra ballasts with cool running fixtures to achieve maximum system performance in hot temperatures. GE provides the UltraCool system certification with high grade fixture systems which means a 5 year 55C max ambient warranty.

# A big idea in a small package.

The UltraMax™ housing is smaller, lower-profile and lightweight. That can be a big help in retrofits. It also means future fixture designs can be more compact and streamlined.

# Every unit is tested and proven before it's shipped.

GE does 100% burn-in on every UltraMax™ ballast using our extreme open/short test, which simulates undesirable and harsh-use situations, so you are assured of a system you can rely on right out of the box.

# GE Six Sigma quality backed by a full 5-year ballast warranty.

UltraMax ballasts are designed by GE's expert engineers and custommanufactured to our exacting Six Sigma specifications, all backed by a full 5-year warranty. And, when used with GE T8 lamps you get our Ultra System warranty, (see GE lighting.com system warranty page for details).

# A FULL FAMILY OF HIGH EFFICIENCY MULTI-VOLTAGE BALLASTS FOR ALL T8 APPLICATIONS.

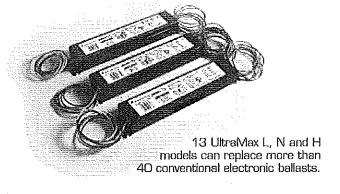

The Low watt option for Max energy savings. With a ballast factor of .77, the L line is the most energy efficient choice. It provides adequate illumination for most applications. For 1, 2, 3, and 4 T8 lamps in 2', 3', and 4' lengths.

High-Efficiency Electronic Ballast

The Normal light option balances efficiency and illumination. The most-used type of ballast, the N line saves energy without sacrificing lumens. A ballast factor of .87 meets most application needs. For 1, 2, 3, and 4 T8 lamps in 2', 3', 4', and 8' lengths.

High-Efficiency Electronic Ballast

The choice for High light output. With a ballast factor of 1.15, UltraMax™ H delivers the most lumens for maximum light or when you want more savings using fewer lamps. This is the first high-efficiency high-light output line for 2, 3 and 4 T8 lamps.

See for yourself how different UltraMax™ ballasts perform.

**GE Lighting** 

TRANSFORMING THE POVVER OF LIGHT™

**GE Lighting Web Center** 

GE is taking the lead in developing innovative uses of e-business technology to provide to you product and application information that can help you achieve your business goals. From interactive catalogs that deliver lamp and system performance information to Design Wizards that help in lamp and ballast selection and application, GELighting.com is the lighting site you will want to visit frequently.

www.GELighting.com

in fixture watts represent typical field operating conditions with ballast and lamps in fixture/luminaire. Open fixture denotes non-lensed fixture/luminaire.

Enclosed fixture denotes lensed fixture/luminaire.

# V180

# Revolutionary 180° LED module low profile lighting system

- Even Illumination with less modules
- Versatile low profile modules
- Ingress Protection 68 rating (IP68)
- Constant Current Technology
- UL and cUL recognized, CE, CSA Certified
- RoHS and WEEE compliant

# MODW 60 Watt

# **IP68 Rated**

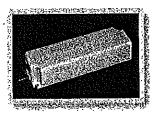

APOLLO ~ 56 GRENT WHITE - 2.5 1180, = 30

- · Ingress Protection 68 Rated (IP68)
- Operating temperatures -40° C to 60° C
- Auto-resetting
- No fuses to replace or circuit breaker to reset
- Short circuit protection automatically resets when short condition is corrected
- Modular design
  - Cluster with standard J-boxes to create multiple 60 W legs
- · UL, cUL, CSA, TUV, CE certification
  - · UL classified for field retrofits
- · RoHS and WEEE compliant

# Self-Contained 20

- Small compact size
- Operating temperatures -30°C to 60°C
- · UL-rated for dry and damp locations
- RoHS and WEEE compliant

eW Blast Powercore

2700 K, 21° Frosted Lens

Energy-efficient, high-intensity white LED floodlight

Higher Output eW<sup>®</sup> Blast Powercore is an LED floodlight providing a high-intensity wash of white light while consuming less energy than comparable non-LED light fixtures. Rated for outdoor use, eW Blast Powercore offers the efficiency and costeffectiveness of Powercore® technology in a rugged die-cast aluminum housing, eW Blast Powercore is ideal for applications as diverse as highlighting architectural features, general site illumination, and lighting signage and retail spaces.

- Integrates patented Powercore technology-Powercore technology rapidly, efficiently, and accurately controls power output to eW Blast Powercore fixtures directly from line voltage, supporting long fixture runs and eliminating the need for external power supplies. Contractorfriendly installation using standard mounting and Wiring dramatically simplifies installation and helps lower total system cost,
- Supports new applications for white light-Long-life LEDs (up to 70,000 hours at 70% lumen maintenance) can significantly reduce or eliminate maintenance problems, allowing the use of white lighting in spaces where lamp maintenance may be impossible. For example, eW Blast Powercore can effectively illuminate building features from positions accessible only
- High-intensity, energy-efficient white light -With an output of up to 2390 lumens, eW Blast Powercore offers high-intensity illumination at a significantly lower power draw than comparable non-LED fixtures.
- Versatile lighting options eW Blast Powercore is available in two color temperatures, a warm 2700 K and a cool 4000 K, and four solid colors (Red, Green, Blue, and Amber). A 21° frosted glass lens for a softedge beam and a 10° clear lens for extended light projection support a wide range of white lighting applications. Rugged die-cast aluminum housing is available in white or black.

- Flexible light positioning --- Fixtures can be mounted to a junction box on a wall, ceiling or floor for maximum flexibility. Locking base swivel offers friction-free rotation of up to 350°, and 110° fixture tilting provides quick fixture positioning without special tools.
- Support for multiple voltages -- eW Blast Powercore accepts power input of 100, 120, 240, and 277 VAC, allowing installation and operation from line voltage in a variety of
- Dimming capability Patented DIMand® technology offers smooth dimming capability with many ELV-type dimmers.

For detailed product information, please refer to the eW Blast Powercore Product Guide at www.colorkinetics.com/lefessentialwhiteley/blastpl

### 26667 - F32T8/SP35/ECO

GE Ecolux® Starcoat® T8

· Passes TCLP, which can lower disposal costs.

High Color Rendering Meets Federal Minimum Efficiency Standards

#### **GENERAL CHARACTERISTICS**

Lamp type	Linear Fluorescent - Straight Linear
Bulb	T8
Base	Medium Bi-Pin (G13)
Primary Application	Full Wattage
Rated Life	30000 hrs
Rated Life (instant start) @ Time	21000.0 h @ 3.0 h 30000.0 h @ 12.0 h
Rated Life (rapid start) @ Time	30000.0 h @ 3.0 h 36000.0 h @ 12.0 h
Bulb Material	Soda lime
Starting Temperature (MIN)	10 °C(50 °F)
LEED-EB MR Credit	36 picograms Hg per mean lumen hour
Additional Info	TCLP compliant

Initial Lumens	2450
Mean Lumens	2300
Nominal Initial Lumens per Watt	77
Color Temperature	3500 K
Color Rendering Index (CRI)	78
S/P Ratio (Scotopic/Photopic Ratio)	1.4

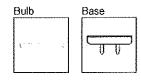

#### **ELECTRICAL CHARACTERISTICS**

Wattage	32
Open Circuit Voltage (rapid start) Min @ Temperature	315.0 @ 10.0 V
Cathode Resistance Ratio - Rh/Rc (MIN)	4.25
Cathode Resistance Ratio - Rh/Rc (MAX)	6.5
Current Crest Factor (MAX)	1.7

## 72266 - GE232MAX-N/ULTRA

GE LFL UltraMax™ Electronic High Efficiency Multivolt Instant Start Ballast

- · Energy saving high efficiency instant start electronic ballast (> 90%)
- · Multi-Voltage Technology handles voltage from 120 to
- · UL Type CC Rating provides protection against arcing in electrical devices.
- Active Current Regulation regulates the output to each lamp with individual lamp inverter modules.
- · Anti-Striation Control for better light quality, with no striations.
- Cold temperature -20F Minimum Starting Temperature

## **GENERAL CHARACTERISTICS**

Application	2 or 1- F32T8 120 to 277 "N".87 BF
Category	Linear Fluorescent
Ballast Type	Etectronic - High Efficiency Multivolt Instant Start
Starting Method	Instant start
Lamp Wiring	Parallel
Line Voltage Regulation (+/-)	10 %
Case Temperature (MAX)	70 °C(158 °F)
Ballast Factor	Normal
Power Factor Correction	Active
Sound Rating	A (20-24 decibels)
Additional Info	Anti-striation control, Auto-restart Thermally protected

# Mercantile Customer Project Commitment Agreement Cash Rebate Option

THIS MERCANTILE CUSTOMER PROJECT COMMITMENT AGREEMENT ("Agreement") is made and entered into by and between The Cleveland Electric Illuminating Company, its successors and assigns (hereinafter called the "Company") and Key Center Properties LLC, Taxpayer ID No. 20-3942248 its permitted successors and assigns (hereinafter called the "Customer") (collectively the "Parties" or individually the "Party") and is effective on the date last executed by the Parties as indicated below.

## WITNESSETH

WHEREAS, the Company is an electric distribution utility and electric light company, as both of these terms are defined in R.C. § 4928.01(A); and

WHEREAS, Customer is a mercantile customer, as that term is defined in R.C. § 4928.01(A)(19), doing business within the Company's certified service territory; and

WHEREAS, R.C. § 4928.66 (the "Statute") requires the Company to meet certain energy efficiency and peak demand reduction ("EE&PDR") benchmarks; and

WHEREAS, when complying with certain EE&PDR benchmarks the Company may include the effects of mercantile customer-sited EE&PDR projects; and

WHEREAS, Customer has certain customer-sited demand reduction, demand response, or energy efficiency project(s) as set forth in attached Exhibit 1 (the "Customer Energy Project(s)") that it desires to commit to the Company for integration into the Company's Energy Efficiency & Peak Demand Reduction Program Portfolio Plan ("Company Plan") that the Company will implement in order to comply with the Statute; and

WHEREAS, the Customer, pursuant to the Public Utilities Commission of Ohio's ("Commission") September 15, 2010 Order in Case No. 10-834-EL-EEC, desires to pursue a cash rebate of some of the costs pertaining to its Customer Energy Project(s) ("Cash Rebate") and is committing the Customer Energy Project(s) as a result of such incentive.

WHEREAS, Customer's decision to commit its Customer Energy Project(s) to the Company for inclusion in the Company Plan has been reasonably encouraged by the possibility of a Cash Rebate.

WHEREAS, in consideration of, and upon receipt of, said cash rebate, Customer will commit the Customer Energy Project(s) to the Company and will comply with all other terms and conditions set forth herein.

NOW THEREFORE, in consideration of the mutual promises set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties, intending to be legally bound, do hereby agree as follows:

1. Customer Energy Projects. Customer hereby commits to the Company and Company accepts for integration into the Company Plan the Customer Energy Project(s) set forth on attached Exhibit 1. Said commitment shall be for the life of the Customer Energy Project(s). Company will incorporate said project(s) into the Company Plan to the extent that such projects qualify. In so committing, and as evidenced by the affidavit attached hereto as Exhibit A, Customer acknowledges that the information provided to the Company about the Customer Energy Project(s) is true and accurate to the best of its knowledge.

- a. By committing the Customer Energy Project(s) to the Company, Customer acknowledges and agrees that the Company shall control the use of the kWh and/or kW reductions resulting from said projects for purposes of complying with the Statute. By committing the Customer Energy Project(s), Customer further acknowledges and agrees that the Company shall take ownership of the energy efficiency capacity rights associated with said Project(s) and shall, at its sole discretion, aggregate said capacity into the PJM market through an auction. Any proceeds from any such bids accepted by PJM will be used to offset the costs charged to the Customer and other of the Company's customers for compliance with state mandated energy efficiency and/or peak demand requirements
- b. The Company acknowledges that some of Customer's Energy Projects contemplated in this paragraph may have been performed under certain other federal and/or state programs in which certain parameters are required to be maintained in order to retain preferential financing or other government benefits (individually and collectively, as appropriate, "Benefits"). In the event that the use of any such project by the Company in any way affects such Benefits, and upon written request from the Customer, Company will release said Customer's Energy Project(s) to the extent necessary for Customer to meet the prerequisites for such Benefits. Customer acknowledges that such release (i) may affect Customer's cash rebate discussed in Article 3 below; and (ii) will not affect any of Customer's other requirements or obligations.
- c. Any future Customer Energy Project(s) committed by Customer shall be subject to a separate application and, upon approval by the Commission, said projects shall become part of this Agreement.
- d. Customer will provide Company or Company's agent(s) with reasonable assistance in the preparation of the Commission's standard joint application for approval of this Agreement ("Joint Application") that will be filed with the Commission, with such Joint Application being consistent with then current Commission requirements.
- e. Upon written request and reasonable advance notice, Customer will grant employees or authorized agents of either the Company or the Commission reasonable, pre-arranged access to the Customer Energy Project(s) for purposes of measuring and verifying energy savings and/or peak demand reductions resulting from the Customer Energy Project(s). It is expressly agreed that consultants of either the Company or the Commission are their respective authorized agents.
- 2. Joint Application to the Commission. The Parties will submit the Joint Application using the Commission's standard "Application to Commit Energy Efficiency/Peak Demand Reduction Programs" ("Joint Application") in which they will seek the Commission's approval of (i) this Agreement: (ii) the commitment of the Customer Energy Project(s) for inclusion in the Company Plan; and (iii) the Customer's Cash Rebate.

The Joint Application shall include all information as set forth in the Commission's standard form which, includes without limitation:

- i. A narrative description of the Customer Energy Project(s), including but not limited to, make, model and year of any installed and/or replaced equipment;
- ii. A copy of this Agreement; and
- A description of all methodologies, protocols, and practices used or proposed to be used in measuring and verifying program results.

- 3. Customer Cash Rebate. Upon Commission approval of the Joint Application, Customer shall provide Company with a W-9 tax form, which shall at a minimum include Customer's tax identification number. Within the greater of 90 days of the Commission's approval of the Joint Application or the completion of the Customer Energy Project, the Company will issue to the Customer the Cash Rebate in the amount set forth in the Commission's Finding and Order approving the Joint Application.
  - a. Customer acknowledges: i) that the Company will cap the Cash Rebate at the lesser of 50% of Customer Energy Project(s) costs or \$250,000; ii) the maximum rebate that the Customer may receive per year is \$500,000 per Taxpayer Identification Number per utility service territory; and iii) if the Customer Energy Project qualifies for a rebate program approved by the Commission and offered by the Company, Customer may still elect to file such project under the Company's mercantile customer self direct program, however the Cash Rebate that will be paid shall be discounted by 25%; and
  - b. Customer acknowledges that breaches of this Agreement, include, but are not limited to:
    - Customer's failure to comply with the terms and conditions set forth in the Agreement, or its equivalent, within a reasonable period of time after receipt of written notice of such non-compliance;
    - Customer knowingly falsifying any documents provided to the Company or the Commission in connection with this Agreement or the Joint Application.
  - c. In the event of a breach of this Agreement by the Customer, Customer agrees and acknowledges that it will repay to the Company, within 90 days of receipt of written notice of said breach, the full amount of the Cash Rebate paid under this Agreement. This remedy is in addition to any and all other remedies available to the Company by law or equity.
- 4. Termination of Agreement. This Agreement shall automatically terminate:
  - a. If the Commission fails to approve the Joint Agreement;
  - b. Upon order of the Commission; or
  - c. At the end of the life of the last Customer Energy Project subject to this Agreement.

Customer shall also have an option to terminate this Agreement should the Commission not approve the Customer's Cash Rebate, provided that Customer provides the Company with written notice of such termination within ten days of either the Commission issuing a final appealable order or the Ohio Supreme Court issuing its opinion should the matter be appealed.

- 5. Confidentiality. Each Party shall hold in confidence and not release or disclose to any person any document or information furnished by the other Party in connection with this Agreement that is designated as confidential and proprietary ("Confidential Information"), unless: (i) compelled to disclose such document or information by judicial, regulatory or administrative process or other provisions of law; (ii) such document or information is generally available to the public; or (iii) such document or information was available to the receiving Party on a non-confidential basis at the time of disclosure.
  - a. Notwithstanding the above, a Party may disclose to its employees, directors, attorneys, consultants and agents all documents and information furnished by the other Party in connection with this Agreement, provided that such employees, directors, attorneys,

consultants and agents have been advised of the confidential nature of this information and through such disclosure are deemed to be bound by the terms set forth herein.

- b. A Party receiving such Confidential Information shall protect it with the same standard of care as its own confidential or proprietary information.
- c. A Party receiving notice or otherwise concluding that Confidential Information furnished by the other Party in connection with this Agreement is being sought under any provision of law, to the extent it is permitted to do so under any applicable law, shall endeavor to: (i) promptly notify the other Party; and (ii) use reasonable efforts in cooperation with the other Party to seek confidential treatment of such Confidential Information, including without limitation, the filing of such information under a valid protective order.
- d. By executing this Agreement, Customer hereby acknowledges and agrees that Company may disclose to the Commission or its Staff any and all Customer information, including Confidential Information, related to a Customer Energy Project, provided that Company uses reasonable efforts to seek confidential treatment of the same.
- Taxes. Customer shall be responsible for all tax consequences (if any) arising from the payment of the Cash Rebate.
- 7. Notices. Unless otherwise stated herein, all notices, demands or requests required or permitted under this Agreement must be in writing and must be delivered or sent by overnight express mail, courier service, electronic mail or facsimile transmission addressed as follows:

#### If to the Company:

FirstEnergy Service Company 76 South Main Street Akron, OH 44308 Attn: Victoria Nofziger Telephone: 330-384-4684

Fax: 330-761-4281

Email: vmnofziger@firstenergycorp.com

If to the Customer:

Key Center Properties LLC 127 Public Square Suite 2727 Cleveland, Ohio 44114 Attn:Curt Sonntag Telephone:216-687-0500 x202 Fax:216-687-1227 Email:CSonntag@JRESGroup.com or to such other person at such other address as a Party may designate by like notice to the other Party. Notice received after the close of the business day will be deemed received on the next business day; provided that notice by facsimile transmission will be deemed to have been received by the recipient if the recipient confirms receipt telephonically or in writing.

- 8. Authority to Act. The Parties represent and warrant that they are represented by counsel in connection with this Agreement, have been fully advised in connection with the execution thereof, have taken all legal and corporate steps necessary to enter into this Agreement, and that the undersigned has the authority to enter into this Agreement, to bind the Parties to all provisions herein and to take the actions required to be performed in fulfillment of the undertakings contained herein.
- 9. Non-Waiver. The delay or failure of either party to assert or enforce in any instance strict performance of any of the terms of this Agreement or to exercise any rights hereunder conferred, shall not be construed as a waiver or relinquishment to any extent of its rights to assert or rely upon such terms or rights at any later time or on any future occasion.
- 10. Entire Agreement. This Agreement, along with related exhibits, and the Company's Rider DSE, or its equivalent, as amended from time to time by the Commission, contains the Parties' entire understanding with respect to the matters addressed herein and there are no verbal or collateral representations, undertakings, or agreements not expressly set forth herein. No change in, addition to, or waiver of the terms of this Agreement shall be binding upon any of the Parties unless the same is set forth in writing and signed by an authorized representative of each of the Parties. In the event of any conflict between Rider DSE or its equivalent and this document, the latter shall prevail.
- 11. Assignment. Customer may not assign any of its rights or obligations under this Agreement without obtaining the prior written consent of the Company, which consent will not be unreasonably withheld. No assignment of this Agreement will relieve the assigning Party of any of its obligations under this Agreement until such obligations have been assumed by the assignee and all necessary consents have been obtained.
- 12. Severability. If any portion of this Agreement is held invalid, the Parties agree that such invalidity shall not affect the validity of the remaining portions of this Agreement, and the Parties further agree to substitute for the invalid portion a valid provision that most closely approximates the economic effect and intent of the invalid provision.
- 13. Governing Law. This Agreement shall be governed by the laws and regulations of the State of Ohio, without regard to its conflict of law provisions.
- 14. Execution and Counterparts. This Agreement may be executed in multiple counterparts, which taken together shall constitute an original without the necessity of all parties signing the same page or the same documents, and may be executed by signatures to electronically or telephonically transmitted counterparts in lieu of original printed or photocopied documents. Signatures transmitted by facsimile shall be considered original signatures.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed by their duly authorized officers or representatives as of the day and year set forth below.

Affidavit of Key	Center 1	Properties	LLC-	Exhibit	Α

STATE OF OHIO	)		
	)	. SS	:
COUNTY OF CUYAHOGA	)		

- I, Curt Sonntag ,being first duly sworn in accordance with law, deposes and states as follows:
  - 1. I am the Chief Engineer, as Agent of Key Center Properties LLC ("Customer") As part of my duties, I oversee energy related matters for the Customer.
  - The Customer has agreed to commit certain energy efficiency projects to The Cleveland Electric Illuminating Company ("Company"), which are the subject of the agreement to which this affidavit is attached ("Project(s)").
  - 3. In exchange for making such a commitment, the Company has agreed to provide Customer with Cash ("Incentive"). This Incentive was a critical factor in the Customer's decision to go forward with the Project(s) and to commit the Project(s) to the Company.
  - All information related to said Project(s) that has been submitted to the Company is true and accurate to the best of my knowledge.

FURTHER AFFIANT SAYETH NAUGHT.
