NOTICE OF PROPOSED MAJOR UTILITY FACILITY

Carroll County Energy LLC ("CCE") proposes to construct an approximately 0.45 mile 345 kV transmission line ("the CCE Transmission Interconnection") to interconnect its proposed natural gas turbine electric generating facility to an existing American Electric Power ("AEP") 345 kV transmission line in Washington Township, Carroll County, Ohio. CCE has filed a Letter of Notification Application for the CCE Transmission Interconnection with the Ohio Power Siting Board ("Board") for a Certificate of Environmental Compatibility and Public Need. The new transmission line will consist of single pole construction from the generating facility and will terminate at the AEP 345 kV transmission line. Construction on the CCE Transmission Interconnection is scheduled to begin in February 2015.

The following public officials and agencies have been served with copies of the Letter of Notification Application as required by the Ohio Power Siting Board's rules: Thomas A. Wheaton, President, Carroll County Commissioner; Robert L. Wirkner, Vice President, Carroll County Commissioner; Jeffrey L. Ohler, Carroll County Commissioner; Aaron Dodd, Carroll County Regional Planning Director; Ralph Castellucci, Carroll County Environmental Services; Kevin Davis, Washington Township Trustee; Chris Keyser, Washington Township Trustee; Darrell L. Shafer, Washington Township Trustee.

A copy of the Letter of Notification Application is available for public inspection at the offices of the Ohio Power Siting Board, 180 E. Broad St., Columbus, Ohio 43215-3793, www.opsb.ohio.gov and on CCE's website at www.carrollcountyenergy.com. A copy of the Letter of Notification Application has also been sent to the Carroll County District Library, 72nd St., N.E., Carrollton, OH 44615.

A Letter of Notification Application for a certificate to construct, operate and maintain the above named electric transmission line facility is now pending before the Board. The application has been assigned Case No. 14-0591-EL-BLN and the case number should be referenced in all correspondence about this proceeding.

Under Section 4906.10(A) of the Revised Code, the Board shall not grant a certificate for the construction, operation and maintenance of a major utility facility, either as proposed or as modified by the Board, unless it finds and determines all the following:

- (1) The basis of the need for the facility if the facility is an electric transmission line or a natural gas transmission line;
- (2) The nature of the probable environmental impact;
- (3) That the facility represents the minimum adverse environmental impact, considering the state of available technology and the nature and economics of the various alternatives, and other pertinent considerations;
- (4) In the case of an electric transmission line or generat-

ing facility, that the facility is consistent with the regional plans for expansion of the electric power grid of the electric systems serving this state and interconnected utility systems and that the facility will serve the interests of electric system economy and reliability;

- (5) That the facility will comply with Chapters 3704, 3734 and 6111 of the Revised Code and all rules and standard adopted under those chapters and under sections 1501.33, 1501.34, and 4561.32 of the Revised Code. In determining whether the facility will comply with all rules and standards adopted under section 4561.32 of the Revised Code, the Board shall consult with the offices of aviation of the division of multimodal planning and programs of the department of transportation under section 4561.341 [4561.34.1] of the Revised Code.
- (6) That the facility will serve the public interest, convenience, and necessity;
- (7) In addition to the provisions contained in divisions (A)(1) to (6) of this section and rules adopted under those divisions, what its impact will be on the viability as agricultural land of any land in an existing agricultural district established under Chapter 929 of the

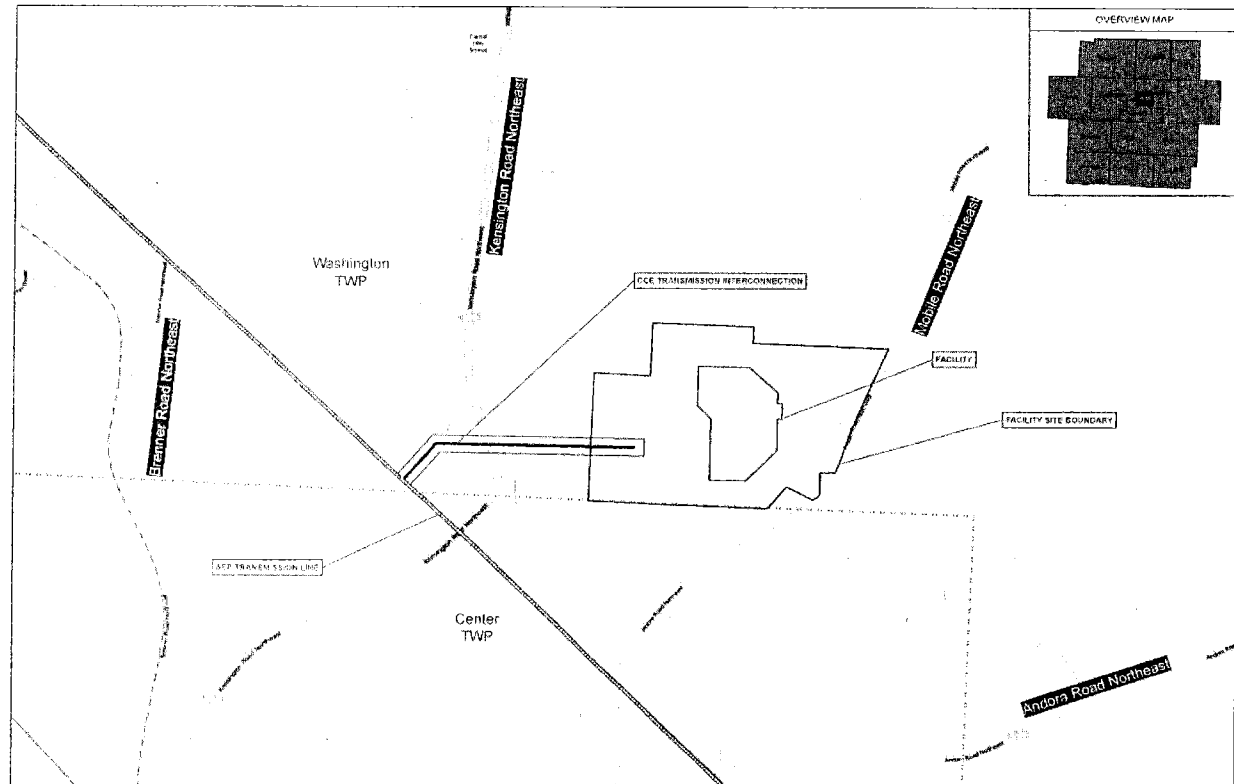

Revised Code that is located within the site and alternative site of the proposed major utility facility.

Rules adopted to evaluate impact under division (A)(7) of this section shall not require the compilation, creation, submission or production of any information, document, or other data pertaining to land not located within the site and alternative site.

- (8) That the facility incorporates maximum feasible water conservation practices as determined by the Board, considering available technology and the nature and economics of the various alternatives.

Motions to intervene and comments must be filed with the Board within 10 days following publication of this notice. Motions and comments should be addressed to the Docketing Division, the Ohio Power Siting Board, 180 E. Broad Street, 11th Floor, Columbus, Ohio 43215-3793, and cite Case No. 14-0591-EL-BLN.

The attached map shows the proposed layout and location of the CCE Transmission Interconnection, the existing AEP transmission line and the location and boundary of the natural gas turbine electric generating facility (the "Facility") which is the subject of a separate Ohio Power Siting Board proceeding, Case No. 13-1752-EL-BGN.
