Subject: RE: PUCO 14-0878-EL-REN Artemis Polymer Processing

Mark, we made a mistake in the calculation and the decimal place is in the wrong place.. It is .050394 MW. Is it possible that you can make the correction on our behalf . This is in regard to the nameplate capacity.
Thank you ,
Charlie Geiger
Artemis Polymer Processing

Subject: PUCO 14-0878-EL-REN Artemis Polymer Processing

Dear Charles Geiger:

Hello. I am sending you questions related to the review of your Application for Certification as an Ohio Renewable Energy Resource Generating Facility. The responses to these questions will make it possible for Commission Staff to perform a comprehensive and timely review of your application. Please file your responses in the PUCO [Docketing Information System](#) under case number 14-0878-EL-REN. Feel free to copy and paste the questions into a word document, and save the file as a PDF, in order to provide your answers and/or photos for the purpose of e-filing the document.

Save the document as a PDF.

Then go to following website: <http://dis.puc.state.oh.us/>

Then

- Click on subscribe and e-file
- Log-in
- Click on E-File a document
- Choose your case number, add it, and click continue
- Choose the parties for the filing, and click continue
- Select type of document, Reply
- Complete the summary, click continue
- Choose your PDF document
- Add File, click continue
- Submit Filing

The application will be approved 60 days after the date the application and affidavit were submitted, unless it is suspended or denied by the commission, therefore please submit your responses within 5 business days to avoid the case being suspended. Make sure that you file/title your responses as 'reply

to staff inquiries'. If you have any questions, please feel free to reply to this email or call (614)644-8295.

Thank you.

**Case No. 14-0878-EL-REN
Artemis Polymer Processing
Staff Interrogatories – Initial Set**

Question 1: In section I.1 the nameplate capacity is listed as 50 MW. But in section G.1 you state the facility has 222 227W panels. Since $222 \times 227W = 50,394W$ or 0.050394 MW. Is the nameplate capacity 0.050394 MW?

Answer 1: <insert answer here>

Sincerely,

Mark Bellamy
