COMMENT DESCRIPTION:

I would like to comment and testify in regard to Case # 14-1027--EL-ATA, FirstEnergy's Experimental LED Street Light Rate. In particular, "The Remaining Costs of Existing InfraStructure" section. The fee does not appear unreasonable. However, it appears discriminatory to the entities that utilize the customer owned street lighting option within the street light tariffs. Under that provision, removal costs of existing lights is much higher. How much does it really cost to remove a light? Why does one section of the same rate class pay so much more?

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
