Notes:

Section I and II are Pursuant to Chapter [4901:1-6 OAC](#)

Section III – Carrier to Carrier is Pursuant to [4901:1-7 OAC](#), and Wireless is Pursuant to [4901:1-6-24 OAC](#).

Section IV – Attestation

- (1) Indicate the Carrier Type and the reason for submitting this form by checking the boxes below.
- (2) For requirements for various applications, see the identified section of Ohio Administrative Code Section 4901 and/or the supplemental application form noted.
- (3) Information regarding the number of copies required by the Commission may be obtained from the Commission's web site at www.puco.ohio.gov under the docketing information system section, by calling the docketing division at 614-466-4095, or by visiting the docketing division at the offices of the Commission.
- (4) An Incumbent Local Exchange Carrier (ILEC) offering basic local exchange service (BLES) outside its traditional service area should choose CLEC designation when proposing to offer BLES outside its traditional service area or when proposing to make changes to that service.

All Filings that result in a change to one or more tariff pages require, at a minimum, the following exhibits.

Exhibit	Description:
A	The tariff pages subject to the proposed change(s) as they exist before the change(s)
B	The Tariff pages subject to the proposed change(s), reflecting the change, with the change(s) marked in the right margin.
C	A short description of the nature of the change(s), the intent of the change(s), and the customers affected.
D	A copy of the notice provided to customers, along with an affidavit that the notice was provided according to the applicable rule(s).

Section IV. – Attestation

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

AFFIDAVIT
Compliance with Commission Rules

I am an officer/agent of the applicant corporation, Mary C. latek, and am authorized to make this statement on its behalf.

(Name) Mary C. Latek

Please Check ALL that apply:

☒ I attest that these tariffs comply with all applicable rules for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

☐ I attest that customer notices accompanying this filing form were sent to affected customers, as specified in Section II, in accordance with Rule 4901:1-6-7, Ohio Administrative Code.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on (Date) June 30, 2014, at (Location) Chicago, IL

*(Signature and Title) /s Mary C. Latek,
Manager

(Date) June 30, 2014

- *This affidavit is required for every tariff-affecting filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

VERIFICATION

I, Mary C. Latek verify that I have utilized the Telecommunications Filing Form for most proceedings provided by the Commission and that all of the information submitted here, and all additional information submitted in connection with this case, is true and correct to the best of my knowledge.

*(Signature and Title) /s/Mary C. Latek, Manager

(Date) June 30, 2014

**Verification is required for every filing. It may be signed by counsel or an officer of the applicant, or an authorized agent of the applicant.*

Make such filing electronically as directed in Case No 06-900-AU-WVR

Exhibit A

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic

A. Scope

This section only applies to toll VoIP-PSTN traffic exchanged between the Company and the customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. Toll VoIP-PSTN traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol-compatible customer premises equipment.

1. This section governs the identification of originating and terminating intrastate toll VoIP-PSTN traffic and facilities to which interstate switched access rates apply (unless the parties have agreed otherwise) in accordance with the transitional Intercarrier Compensation framework for toll VoIP-PSTN traffic adopted by the Federal Communications Commission in its Report and Order, FCC Release No. 11-161 (Nov. 18, 2011) ("FCC Order"). Specifically, this section establishes the method that will be used to identify the percentage of the customer's intrastate access traffic, that will be treated as intrastate toll VoIP-PSTN traffic (referred to in this tariff as " Relevant Toll VoIP-PSTN Traffic"),
2. This section applies to originating and terminating intrastate switched access minutes of use ("MOU") and facility rate elements of all Access customers.
3. The customer shall not modify its reported PIU factor to account for the toll VoIP-PSTN Traffic for MOU and facility rate elements.

B. Rating of Toll VoIP-PSTN Traffic*

The Relevant Toll VoIP-PSTN Traffic terminating from, or originating to the customer, or from the Company or other provider and facility rate elements identified in accordance with this tariff section will be billed at rates equal to the Company's applicable tariffed interstate switched access rates as specified at <http://serviceguide.att.com/ABS/ext/TariffDetails.cfm>, if those interstate rates are lower than their respective Ohio state access rates (Access Services Tariff). Conversely, if the Ohio state access rates are lower, then this traffic will be billed utilizing the rates from the Access Services Tariff. Hereafter, these billed rates will be referred to as the relevant VoIP rates.

* (Section 2.3.10-B) describing the method of identifying and rating, originating VoIP minutes of use will become effective on July 1, 2014. The advanced filing of this tariff change prior to July 1, 2014, effective date, is strictly for the benefit of our customers in providing advanced notice of these FCC mandated changes and ample time to submit their new VoIP factors

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic (Continued)

- C. Calculation and Application of Percent-VoIP-Usage Factors (T)
- The Company will determine the number of Relevant Toll VoIP-PSTN Traffic originating MOU and the originating facility rate elements, if applicable, to which VOIP rates will be applied under subsection (B) above, by applying the Percent VoIP Usage ("PVU") factor to the intrastate access originating MOU exchanged and facilities between the Company and the customer. The PVU factors will be derived and applied as follows: (T)
1. The customer will calculate and furnish to the Company a factor (the "PVUC") on an ACNA basis which would aggregate traffic from all Carrier Identification Code(s) ("CIC") or Operating Company Numbers ("OCNs") associated with the ACNA. This PVUC represents the percentage (whole number) of the originating intrastate access MOU that the customer receives from the Company end users in the state which is sent from the Company that is terminated in IP format at the customer's end user. This PVUC shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information satisfactory to the Company. (T)
2. The Company will calculate and periodically update a factor (the "PVUT") representing the percentage (whole number) of the total intrastate access MOU that the Company exchanges with the Customer's end users in the state which is received from the Customer and terminated in IP format at the end user. This PVUT shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. (T)

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic (Continued)

C. Calculation and Application of Percent-VoIP-Usage Factors
(Continued)

3. The Company will develop a Customer Percent VoIP Usage ("PVU") factors combining the Customer's PVUC factor with the Company's PVUT factor.

a. The PVU calculation below is applied when the Company does not bill based on actual call detail records for the intrastate Company's IP traffic at VOIP rates.

(T)

PVU = PVUC + [PVUT x (1-PVUC)] is applied to the Company's end user's originating intrastate MOU and facility rate elements

(T)

(T)

Example: The customer reported that their PVUC as 40%. The Company's PVUT is 10%. This results in the following:

PVU = 40% plus (10% times (1-40%)) = 46%

This means that 46% of the originating Intrastate MOU exchanged between the Company's end users and the customer will be rated at VOIP rates.

(T)

(T)

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic (Continued)

C. Calculation and Application of Percent-VoIP-Usage Factors
(Continued)

- b. The PVU calculation below is applied when the Company bills are based on the actual originating call detail records for the intrastate Company's IP traffic at VOIP rates. (T)

The formula for usage will be as follows:

$PVU = PVUC \times (1 - PVUT)$ applied to the Company's TDM end user's total intrastate MOU. (T)

$PVU = PVUC + [PVUT \times (1 - PVUC)]$ is applied to the facility rate elements (T)

Example: The Company has identified that there were 10,500 originating Intrastate MOU that were identified and exchanged between the Company's IP end users and the customer. The Customer reported that their PVUC as 40%. The Company's PVUT is 10%. This results in the following: (T)
(T)
(T)

$PVU = 40\% \text{ times } (1 - 10\%) = 36\%$

This means that 36% of the originating Intrastate MOU exchanged between the Customer and the Company's TDM end users will be rated at VOIP rates and the terminating intrastate 10,500 MOU will also be rated at VoIP rates. (T)
(T)
(T)

For the facility rate elements the formula that is applied to the intrastate dedicated facilities is as follows:

$PVU = 40\% \text{ plus } (10\% \text{ times } (1 - 40\%)) = 46\%$

Therefore 46% of the Intrastate facilities will be rated at VOIP rates.

4. If the customer does not furnish the Company with a PVUC pursuant to the preceding paragraph (C) (1), the Company will utilize a customer PVUC of 0%.

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic (Continued)

D. PVU Factor Updates

The customer and the Company must update the PVUC factor using the method set forth in subsection (C) (1) through (4), above. The customer shall forward to the Company, no later than September 15, 2012, this new PVUC factor.

Prospectively, the customer may update the PVUC factor quarterly using the method set forth in subsection (C)(1) through (4) above. If the customer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first day of January, April, July and/or October of each year, a revised PVUC factor based on data for the prior three months, ending the last day of December, March, June and September, respectively. The Company will use the revised PVUC to calculate a revised PVU. The revised PVU factor will only apply prospectively and serve as the basis for billing until superseded by a new PVU.

E. PVU Factor Verification

Not more than twice in any year, either party may ask to verify the PVU factor furnished. Both parties shall comply and shall reasonably provide the records and other information used to determine their PVU, as specified in section (C) (1) and (4) above. Both parties shall retain and maintain (for verification purposes) the records and other information used to determine the PVU for at least 12 months after the PVU is filed (or longer if any other section of the Company's tariffs or applicable law requires a longer period). The verification process shall be conducted consistent with the provisions in the AT&T's Federal Access Tariff, Section 2.3.10. Any billing disputes related to PVU factors will be addressed using the existing claim process outlined in the Company's FCC Access Services Tariff, Section 2.4.2-2.

(T)

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic (Continued)

F. Verification Process

The Company will review these Customers provided PVUC records referenced in E. above. If the review results represent what the Company considers to be a substantial deviation from the customer's previously reported PVUC or if the PVUC appears unreasonable as compared to other related types of data, the Company will contact the customer within 30 days. This deviation issue will be dealt within one of the following ways. The current PVUC will continue to be utilized until resolution from either of the 2 methods below.

1. The Company and the customer will come to an agreement as to an appropriate PVUC within 30 days of receipt of the customer's PVUC records, bringing the issue to the customer's attention.
2. Within 45 days of the receipt of these records by the Company, either the Company or the customer may make the customer's PVUC records available to an independent auditor (no less reputable than the firm that such party would use in the normal course of business for its annual report) for review and to determine the PVUC. The party requesting the independent audit will be responsible for all costs associated with the audit. If these PVUC records are not available or these records are not reasonable enough for the auditor to calculate the PVUC, then a PVUC factor of zero will be assigned if this is the customer's initial factor. If this is an update to a previous factor, the previous factor will be utilized until either a PVUC can be agreed upon between the Company and the customer or an audit can be completed utilizing records acceptable for determination of a PVUC by the auditor. When an auditor determines a PVUC, that PVUC will be employed until the next customer-provided PVUC is available as referenced in the (D) or (F) procedures above. The Company will apply the auditor-determined PVUC retroactively to the date when the reviewed PVUC was submitted by the Customer.

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic (Continued)

F. Verification Process (Continued)

3. If the review of the Company's PVUT factor represents what the customer considers to be a substantial deviation from the Company's previously applied PVUT, or if the PVUT appears unreasonable as compared to other related types of data, the customer will notify the Company within 30 days of receipt and the question of reasonableness and acceptance will be resolved.
 - a. The Company will provide the records within 10 days after notice, and the Company and the customer may agree to an appropriate PVUT within 30 days of the provision of the PVUT records.
 - b. Within 45 days of the receipt of these records by the customer, either the Company or the customer may make the Company PVUT records available to an independent auditor (no less reputable than the firm that such party would use in the normal course of business for its annual report) for review and to determine the PVUT. The party requesting the independent audit will be responsible for all costs associated with the audit. The Company will apply the auditor-determined PVUT retroactively to the date when the customer's most recent PVUT was submitted.

G. Initial PVU Factor

If the PVU factors are not available and/or cannot be implemented in the Company's billing system by January 1, 2012, when the factors are available and can be implemented in the Company's billing systems, the Company will adjust the customer's bills to reflect the PVU factors retroactively to January 2012 usage and facilities. In calculating the initial PVUC factors, the Company will employ the customer-specified PVUC retroactively to January 2012 usage and facilities, provided that the customer provides the factor to the Company no later than 30 days from the effective date of this tariff. Otherwise, it will set the initial PVU factors, as specified in subsection (C) (4) above.

Exhibit B

2. GENERAL REGULATIONS

2.3 OBLIGATIONS OF THE CUSTOMER (Continued)

2.3.16 Identification and Rating of Toll VoIP-PSTN Traffic

This section applies to toll VoIP-PSTN traffic exchanged between the Company and the customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. Toll VoIP-PSTN traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol-compatible customer premises equipment. The transitional Intercarrier Compensation framework for VoIP-PSTN traffic adopted by the Federal Communications Commission in its Report and Order, Release No. 11-161 (Nov. 18, 2011) ("FCC Order") directed that this intrastate VoIP-PSTN traffic be billed employing interstate rates. The intrastate switched access rates in this tariff are the same as the interstate rates for Switched Access rate elements. Thus, no modifications to the rates and/or billing are necessary as a result of the VoIP-PSTN provisions of the FCC Order.
