Unjust Enrichment

It seems that Ohio Edison has great difficulty in being able to tell the truth. As for their allegation that the period from January 20, 2014 through February 20, 2014 is the determined usage is just one more untruth. According to their own records, the February reading was estimated so that would make their back-billing a lie. To this date, my meter reading has only been 1945 kWh in five months of current usage with the first four months being the coldest in recent history.
