Intervener Status

Hardin County Wind Complex of Invenergy

To whom it may concern:

I am applying with this formal letter to be an intervener in the Invenergy Wind Complex which will encircle my family's home.

I am seeking the above status as per the following;

- 1- The great concern of harmful and unhealthy effects upon my family's health.
- 2- The close proximity of the 500 feet towers and their ice-throw capabilities.
- 3- The possibility of not acknowledging the new set-back measurements which Ohio has passed into law in 2014.
- 4- The sweeping shadows on my private land which is known as the "flicker effect."
- 5- The horrific sounds of being encircled, which will be heard.
- 6- The destruction and maiming of Hardin County's protective species, namely the birds of prey...ie- the Bald Eagles known to inhabit the area.
- 7- The adverse effects of "ultra-sound"
- 8- The over-all decreased ability to pursue my family's property as livable and un-impacted in any negative ways.
- 9- The decrease in property value due to these towering turbines.
- 10- The loss of local control to problems which will arise and which will need to be timely addressed.

I would like to apologize for my early application to be an intervener in this process. I, nor my neighbors, have received a letter from Invenergy which is required by the siting board. I did not want to let this slip by as it did so unannounced in the fall of 2009 for the January 2010 siting board hearing.

Please send all future contact and confirmation to the above address.

Thank you very much.

Sincerely,

Ed Rogers
