PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

I also highly object to the coal companies around here making demands on their employees as to how to vote, threatening lay off if they do not as was done in the last presidential election.

Sincerely,  
Linda Reynolds

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Dawn Stanko

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

AEP is trying to increase its customers' electric bills to pay for aging coal plants that are not competitive with market. We strongly oppose the attempt by Ohio's electric utilities to bail out their old coal plants and have us pay for it. These plants cannot compete with today's market prices for electricity. They continue their legacy of toxifying our air and water with coal byproducts.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and to negatively impact public health. It is also known to contribute to climate disruption. Due to Ohio's heavy reliance on coal, we have about the worst air in the nation.

Ohio's utilities' request to bail out coal plants. These plants are no longer economically feasible. Their existence constitutes counterproductive, bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Brian Derico

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

As an Ohio electric customer, I am so disappointed that my governor is blinded by the coal industry's mandate that it continue being the major supplier of our electricity. And that the PUCO is doing his bidding. Granted, coal is an important Ohio industry. However, what's more important? Coal and its negative contribution to the quality of our air, our public health, and the scientific evidence that it contributes to climate disruption? Or supporting clean energy standards and the industries that promote them?

As an Ohio electric customer, I categorically will not pay to bail out coal plants no longer economically feasible.

Thank you.

Sincerely,  
Jane Toth
