PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Katrin Baker

Tell them NO DICE UNLESS THEY ADD BIO-MASS LIKE ONTARIO HYDRO IS DOING..

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health.... and NO WE'RE NOT EVEN BELIEVERS IN STUPID IDEAS OF THE EPA ON CLIMATE CHANGE BEING CAUSED BY CO2... it's caused by solar sunspot activity and you haven't ghost of a chance to do anything about that...

Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of soot, smog and mercury pollution.

BESIDES, WHERE'S PUCO's PRIORITIES... THAT SUNSPOT ACTIVITY'S CYCLES ARE DUE TO SEND US -- ONE OF THESE DAYS -- A MASSIVE HIT LIKE THE ONE 150 YEARS AGO...

But 150 years ago, we simply rebuilt and repaired the telegraphic equipment that fried and weren't much more than astounded and puzzled.... IF WE WERE HIT TODAY BY THAT SAME LEVEL OF CORONAL MASS EJECTION, WE'D BE SENT BACK TO THE STONE AGE....

GET THE TRANSFORMERS HARDENED..... NOW.... if the sun doesn't hit us first, the FOOLS RUNNING THE STATE DEPARTMENT WILL TRIGGER A FULL-SCALE WAR COMPLETE WITH EMP ATTACKS AND it will be stone age time one way or another IF YOU DON'T GET THE TRANSFORMERS HARDENED FOR WHATEVER HITS US ON THAT SCALE...

THE SUN's EMP/CORONAL MASS EJECTION IS **\*\*INEVITABLE\*\*** and comes about every 150 years, so the investment in HARDENING THE TRANSFORMERS will never be considered wasteful...

Sincerely,

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

The position we are being put in in regards to bailing out coal electricity generation is a fallacy. We are proposing to use Ohio taxpayers' money to bet on old, outdated and irresponsible energy plants. If PUCO wins, Ohio citizens lose - from unnecessary pollution to supporting dirty energy to environmental destruction. Our economy also loses; as other regions invest in renewable and responsible energy, our energy generation industry is left in the dust - or perhaps coal ash would be more appropriate.

Some of Duke and AEP's coal burning plants are 70 years old and still operational. While that is somewhat impressive, they no longer meet the energy standards put in place to protect our country's future. Our society has come a very long way since these factories have been built and it isn't only in terms of energy efficiency but also in terms of a collective moral obligation towards our future as well as leaps and bounds of technological advancements. For us to ignore these accomplishments only to let dirty, old, outdated factories supply the power to our state is not only foolhardy but a major blow to the advancements in energy we have made in the 20th and 21st century.

As a nation, we are at a turning point in energy. More and more cars are moving to alternate energy sources and all are becoming more efficient and safer. Unused space in farms is being used for wind electricity generation for entire communities. Our lighting energy use has decreased by 60% or more as a country in only 5 years. Geothermal and solar systems are now affordable and common enough that they are public knowledge and not out of reach for the majority of American families. Why would we destroy this momentum to support a dirty industry that has barely changed since the 1950s? Isn't it time to start thinking responsibly about where our state's electricity comes from?

The message below was generated from Sierra Club:

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Jean Towe

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Barbara Midkiff

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Sheridan Lorraine

Subject: Support Ohioans, not Coal

Dear PUCO Commissioners,

It was disgusting to hear about the Ohio electric utilities' attempt to bail out their old coal plants and have users pay for their complacency. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation. It is time to start protecting our homes and families, not the last century ways of doing things.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is counter to all free market principles. It is also bad public policy that in effect amounts to a policy-mandated, special interest sponsored tax increase, costing Ohio electric customers more.

Staying in the past will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution. This is not the way to attract industry and jobs to the state, nor is holding onto the past a smart way to build a sound economic structure for the future.

Sincerely,  
Joseph Mucci

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I am writing to express my total lack of support for Ohio's electric utilities' attempt to bail out their old coal plants using taxpayer dollars. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water, hampering the health of Ohio's citizens.

I believe coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and contributes directly to climate disruption. Unfortunately, because of Ohio's heavy reliance on coal, we have some of the worst air quality in the nation. This is a disgrace to our fine and beautiful state.

I strongly believe that Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Anne Randolph

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Karen Arbogast

Subject: No bailouts for coal

Dear PUCO Commissioners,

You work for and are paid by the people of the State of Ohio. You do not work for big energy companies, who are soulless, non-human, legal entities! *People breathe dirty air -- corporations do not.* Your family too breathes this dirty air, so why do you forget you are human beings? Is padding your wallet worth jeopardizing your family's health? Do the right thing! Say no to dirty, coal fired power plants in Ohio!

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.
