PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Myron Mohr

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

Ohio is in danger of being tagged with another undesirable moniker, The Carbon Belt. Lack of foresight now will mean repeating all the mistakes that brought the region the undesirable nickname we all know as the Rust Belt. This description connotes an area too long leaning on dirty, technologically backward processes that in the end will cost more to mitigate than any perceived benefit derived. This mitigation will be paid for by guess who? That's right, the taxpayer. Another sideways tax *increase supporting the utilities, fossil fuel producers, and political cronies*, turned into law by decision makers presenting themselves as champions of lower taxes. And so,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Jul 29, 2014

PUCO Commissioners

Subject: Coal bailouts

Dear PUCO Commissioners,

It is a travesty for Ohio's electric companies to bail out their old coal plants by increasing consumer rates when they are not even competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

We need to enter into the 21st century and implement renewable high tech energy solutions, instead of being mired in 19th century coal burning crudity.

We laugh that birds foul their own nests, but we have polluted the air, water and earth, when there were far more sophisticated solutions. In addition, the influence that these energy companies have on legislators has kept this state (and country) backwards technologically and befouled it's natural resources.

Please make a difference and stand up for what is right for your state and the future.

Thank you.

Sincerely,
Cynthia Piper

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Fetica Costiana

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Keith Culley

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Keary Missler

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Thank you for your time and consideration.

Sincerely,
Adam Savett

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Carol Triefer

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

Everything after this first paragraph is a 'canned' message. But THIS paragraph is all me, Adelaide D. Schaaf, a life-long resident of Cuyahoga County -- and an inveterate voter. Here's what I think about you and your Republican act to make the entire population of Ohio pay to keep old, increasingly dirty, increasingly polluting, increasingly deadly coal-powered electric plants going: At the cost of the lives of who-knows-how-many ordinary Ohioans, you and your lot have, once again, benefitted the wealthy. Congratulations. The people you've benefitted are, like yourself, ones who have enough money to be able to live far away from the polluting effects of these spewing coal plants. For the rest of us, the act you've gotten passed is no different than making US pay to become diseased and disabled. Ebola is a virus, an air-borne virus, in its way no different than the lung diseases caused by air-borne coal pollution. What you've done with this act is no different, really, than saying to Ohioans "Here's a really deadly disease. What we demand of you, now, is that you pay these few really, really rich guys so that they can deliver this deadly disease to you. Now, that's fair, isn't it?" The answer to which, of course, is "No, it's NOT fair. It's not fair and it's not right and it's not the best thing for Ohio families and the Ohio economy, not now and not going forward into the future." Sacrificing the health of the many to the benefit of the few is not just immoral, it's economically foolish.

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.
