PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
vernon gaston

James Sewell
360 Prairie Ave Apt 305
Wilmington, OH 45177-1757

Let's just call the emissions poison governor. That's the reality. And you allowed these corporations to continue to increase their poisoning of our air, water, and land, without a means of reigning them in such as requiring them to expand on renewable energy. This is morally wrong. This is also becoming a legal issue for an upwind state such as ours which can be held accountable to other states for our poison. I do not support this move.

Sincerely,
Paul Sherlock

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with *today's market prices for electricity, and they spew toxic pollution* into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Rev. Mike Wms. Glockner

Subject: Shutter Old, Dirty Coal Burners

Dear PUCO Commissioners,

OK, I've deleted the pre written message and am putting in my own words:

I am really sick and tired of living in one of the most polluted cities in the US - Cincinnati - the pollution of which I'm pretty sure is at least in some part from dirty coal. As I drove down Mehring Way last night on the way to Great American Ballpark, I saw, as I do every time I drive down there, huge piles of coal next to the power plant by to the river. No doubt the poisons from which end up in the air we breath here.

I guess Duke Energy, American Electric Power and other Ohio utility companies were successful in bullying you folks into gutting Ohio's clean air efficiency standards. So, now they want us to pay to keep older, dirtier power plants open, and for us to pay for it? NO WAY! You couldn't not know that the toxins spewed from burning coal is quite literally sickening and yes, killing, our citizens. You couldn't not know that that the added healthcare costs caused by coal burning make make it a financial disaster.

You couldn't not know that coal related jobs are in decline and that green jobs are increasing significantly. Please do what you know is right and do not let AEP win it's case to keep their dirty power plants open.

I'm sure I speak for the majority of Ohioans when I say

WE THE PEOPLE ARE MAD AS HELL AND WE WON'T TAKE IT ANYMORE!

I still think you are a good man, Governor. Please do what you know is right.

Sincerely,
John Britton

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Linda Rakowski

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Mark Kreidler

Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Phil Zeb

Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Tess Boesch

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Tara Archer

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

ROBERTA J. GIER
