Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

L. Stanley Durkin

Protect Ohio's Clean Energy Standards

Governor Kasich,

In the six years since Ohio's Clean Energy Law (SB 221) was passed, we've seen the creation of thousands of jobs, lower energy bills, and cleaner air and water. Dismantling these standards will cause electricity bills to skyrocket and slash jobs in the clean energy industry that has helped power Ohio's economic recovery.

Ohio's clean energy laws have helped our state's new energy industry employ over 25,000 Ohioans and they've helped more than 400 companies grow. In fact, the standards have led to more than 1,000 new investments in renewable energy projects across the state — and every dollar invested in energy efficiency saves Ohio families \$3 on their bills. To date, the Energy Efficiency Standard has generated \$1 billion in energy savings for customers.

Dismantling these consumer protections will cost customers billions of dollars and lead to significant job losses in a growing industry. The current law is working, and we are relying on you to stand up for families, small businesses, schools, hospitals and local governments that can't afford to have their electricity prices increase. Governor Kasich: stand up for Ohio's Clean Energy Law and protect the good jobs, energy savings, clean air and clean water that it provides.
