Chairman Thomas W. Johnson
 OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal. Coal, which generates nearly 70 percent of electricity in Ohio causes air pollution, negatively impacts public health and is a major contributor to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air pollution in the nation. Duke Energy's request is outrageous, and will cost ratepayers more than money. It will cost us our health and right to clean air by keeping dirty coal plants online.

Please do not approve Duke Energy's request, do what is right for all Ohioans, not just the companies. Reject this proposal.

Sincerely,

Jesse Williams

Duke Energy has been running roughshod over Cincinnati's residents since they took over. When is the PUCO going to contain them? The cost of heating a home in Cincinnati is incredibly higher than it is in other places. When they tried to do this in Indiana, Indiana put a stop to it and would not allow it. When will Cincinnati do the same?

Sincerely,

Alice Murphy

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal. Coal, which generates nearly 70 percent of electricity in Ohio causes air pollution, negatively impacts public health and is a major contributor to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air pollution in the nation. Duke Energy's request is outrageous, and will cost ratepayers more than money. It will cost us our health and right to clean air by keeping dirty coal plants online.

Please do not approve Duke Energy's request, do what is right for all Ohioans, not just the companies. Reject this proposal.

The damn Kasich administration in Ohio is in bed with this utility and is doing everything possible to pass these charges on to the consumer. Kasich is trying to destroy Ohio's environment with his anti-environment agenda, all in the name of furthering the reaches of the repuke party he represents.

Sincerely,

John Dierig

These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal. Coal, which generates nearly 70 percent of electricity in Ohio causes air pollution, negatively impacts public health and is a major contributor to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air pollution in the nation. Duke Energy's request is outrageous, and will cost ratepayers more than money. It will cost us our health and right to clean air by keeping dirty coal plants online.

Please do not approve Duke Energy's request, do what is right for all Ohioans, not just the companies. Reject this proposal.

Sincerely,

Pam Abirached

Chairman Thomas W. Johnson
OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's attempt to bail out aging, outdated coal plants on my dime through a non-bypassable rider. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy. I am a part of the City of Cincinnati's electric aggregation program and am proud my monthly bill goes towards clean renewable energy and not dirty coal.
