PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Tell them NO DICE UNLESS THEY ADD BIO-MASS LIKE ONTARIO HYDRO IS DOING..

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health.... and NO WE'RE NOT EVEN BELIEVERS IN STUPID IDEAS OF THE EPA ON CLIMATE CHANGE BEING CAUSED BY CO2... it's caused by solar sunspot activity and you haven't ghost of a chance to do anything about that..

Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of soot, smog and mercury pollution.

BESIDES, WHERE'S PUCO'S PRIORITIES... THAT SUNSPOT ACTIVITY'S CYCLES ARE DUE TO SEND US -- ONE OF THESE DAYS -- A MASSIVE HIT LIKE THE ONE 150 YEARS AGO...

But 150 years ago, we simply rebuilt and repaired the telegraphic equipment that fried and weren't much more than astounded and puzzled.... IF WE WERE HIT TODAY BY THAT SAME LEVEL OF CORONAL MASS EJECTION, WE'D BE SENT BACK TO THE STONE AGE....

GET THE TRANSFORMERS HARDENED..... NOW.... if the sun doesn't hit us first, the FOOLS RUNNING THE STATE DEPARTMENT WILL TRIGGER A FULL-SCALE WAR COMPLETE WITH EMP ATTACKS AND it will be stone age time one way or another IF YOU DON'T GET THE TRANSFORMERS HARDENED FOR WHATEVER HITS US ON THAT SCALE...

THE SUN'S EMP/CORONAL MASS EJECTION IS \*\*INEVITABLE\*\* and comes about every 150 years, so the investment in HARDENING THE TRANSFORMERS will never be considered wasteful...

Sincerely,

This is to certify that the images appearing are an accurate and complete reproduction of a document delivered in the regular course of business.

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

As an Ohio electric customer, I am so disappointed that my governor is blinded by the coal industry's mandate that it continue being the major supplier of our electricity. And that the PUCO is doing his bidding. Granted, coal is an important Ohio industry. However, what's more important? Coal and its negative contribution to the quality of our air, our public health, and the scientific evidence that it contributes to climate disruption? Or supporting clean energy standards and the industries that promote them?

As an Ohio electric customer, I categorically will not pay to bail out coal plants no longer economically feasible.

Thank you.

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Miklos Bosarge

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Greg Pace

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

*I firmly oppose Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and--much worse--they spew toxic pollution into our air and water.*

Coal, which generates nearly 70 percent of electricity in Ohio, causes major air pollution and assails public health, especially of those living close to coal burning sites, while contributing to climate disruption. Ohio's heavy reliance on coal produces some of the most toxic air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is inhumane public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

You have the authority--and the moral responsibility--to contribute to public and environmental health with your denial of funds to these dirty coal plants. I urge you on behalf of innocent victims of lung disease, and the plants and water that coal ash contaminates, to stop supporting these plants.

Sincerely,  
George Marsh

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Julia Johnson

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Jenny Geib

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Terra Britt

Why must Ohio stay in the stone age? Please take a look around. The world is changing & yes, global warming is real. We may feel cooler in Ohio, but people elsewhere are experiencing great change in the other direction. Right now it is the carbon that fuels like coal emit into the atmosphere which are working against us. This isn't a political platform, it's science. Science that will harm our children and their children. Why can't you pray about this and be open to another viewpoint? Or is it all just that you get your money from the coal guys and so you don't want to upset your cash cow? Don't you care about more than your wallet?
