PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Ian Hackett

Subject: Coal bailouts

Dear PUCO Commissioners,

It is a travesty for Ohio's electric companies to bail out their old coal plants by increasing consumer rates when they are not even competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption.

Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

We need to enter into the 21st century and implement renewable high tech energy solutions, instead of being mired in 19th century coal burning crudity.

We laugh that birds foul their own nests, but we have polluted the air, water and earth, when there were far more sophisticated solutions.

In addition, the influence that these energy companies have on legislators has kept this state (and country) backwards technologically and befouled it's natural resources.

Please make a difference and stand up for what is right for your state and the future.

Thank you.

Sincerely,  
Cynthia Piper

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Patricia Malin

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

Ohio is in danger of being tagged with another undesirable moniker, The Carbon Belt. Lack of foresight now will mean repeating all the mistakes that brought the region the undesirable nickname we all know as the Rust Belt. This description connotes an area too long leaning on dirty, technologically backward processes that in the end will cost more to mitigate than any perceived benefit derived. This mitigation will be paid for by guess who? That's right, the taxpayer. Another sideways tax increase supporting the utilities, fossil fuel producers, and political cronies, turned into law by decision makers presenting themselves as champions of lower taxes. And so,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Lydia Bohm

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Robert Vance

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Joan Durham

Dear PUCO Commissioners,

Wrong way to go, Ohio.

I do not support Ohio's electric utilities' attempt to bail out their old coal plants. Not only are these plants not competitive with today's market prices for electricity, they spew heavy metal particulates into our air and water. Coal generates nearly 70 percent of electricity in Ohio and causes terrible air pollution and public health problems.

What we need is financial support to develop CLEAN renewable energy sources. Ohio is a beautiful state to live in and to visit, and I want to see it stay that way.

Please, put our money into our energy future and not into dragging old technologies out beyond where they can serve us well.

Sincerely,  
Deborah Kohn
