PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Kassandra Mccleery

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Wayne Toven

Subject: No bailouts for coal

Dear PUCO Commissioners,

Everything after this first paragraph is a 'canned' message. But THIS paragraph is all me, Adelaide D. Schaaf, a life-long resident of Cuyahoga County -- and an inveterate voter. Here's what I think about you and your Republican act to make the entire population of Ohio pay to keep old, increasingly dirty, increasingly polluting, increasingly deadly coal-powered electric plants going: At the cost of the lives of who-knows-how-many ordinary Ohioans, you and your lot have, once again, benefitted the wealthy. Congratulations. The people you've benefitted are, like yourself, ones who have enough money to be able to live far away from the polluting effects of these spewing coal plants. For the rest of us, the act you've gotten passed is no different than making US pay to become diseased and disabled. Ebola is a virus, an air-borne virus, in its way no different than the lung diseases caused by air-borne coal pollution. What you've done with this act is no different, really, than saying to Ohioans "Here's a really deadly disease. What we demand of you, now, is that you pay these few really, really rich guys so that they can deliver this deadly disease to you. Now, that's fair, isn't it?" The answer to which, of course, is "No, it's NOT fair. It's not fair and it's not right and it's not the best thing for Ohio families and the Ohio economy, not now and not going forward into the future." Sacrificing the health of the many to the benefit of the few is not just immoral, it's economically foolish.

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Kathleen Faist

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Lynn Bozich Shetzer

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Phil Zeb

Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Tom PASCAL

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Wendy Flesch

Protect Ohio's Clean Energy Standards

Governor Kasich,

In the six years since Ohio's Clean Energy Law (SB 221) was passed, we've seen the creation of thousands of jobs, lower energy bills, and cleaner air and water. Dismantling these standards will cause electricity bills to skyrocket and slash jobs in the clean energy industry that has helped power Ohio's economic recovery.

Ohio's clean energy laws have helped our state's new energy industry employ over 25,000 Ohioans and they've helped more than 400 companies grow. In fact, the standards have led to more than 1,000 new investments in renewable energy projects across the state — and every dollar invested in energy efficiency saves Ohio families \$3 on their bills. To date, the Energy Efficiency Standard has generated \$1 billion in energy savings for customers.

Dismantling these consumer protections will cost customers billions of dollars and lead to significant job losses in a growing industry. The current law is working, and we are relying on you to stand up for families, small businesses, schools, hospitals and local governments that can't afford to have their electricity prices increase. Governor Kasich: stand up for Ohio's Clean Energy Law and protect the good jobs, energy savings, clean air and clean water that it provides.

Stop The Coal Plant Bailout

Dear Gov. Kasich and Chairman Johnson,

I do not support Ohio's electric utilities' attempt to bail out aging, outdated coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. We should not have to pay more for dirty energy.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out obsolete coal plants that are no longer economically viable is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,

Tina Platt

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Pamela Cramer
