Dear Commissioners,

I ask you to reject FirstEnergy's request to force its ratepayers to pay for the company's dirty merchant coal plants. FirstEnergy wanted a competitive, unregulated market until they realized they were losing money on merchant coal plants that can't compete with other energy generation. Ratepayers should not be forced to bail out FirstEnergy's coal and nuclear plants.

Gentlemen

As a medical doctor, I am alarmed at the callousness First Energy of Ohio has for our people
They are dragging their feet at shifting from fossil fuels including frocking, to clean, renewable energies.

Last year, I changed my vendors from First Energy due to this fact.

A critical problem is the fact that global warming is melting the permafrost THis is already causing
METHANE to This THis is so dangerous, that unless we stop immediately our use of fossil fuels, there
will be no future for our children.

I trust you will take my complaint to First Energy, and heed this dire warning

COMMENT DESCRIPTION:

RE: #14-1297-EL-SSO I am writing to oppose any bail out of First Energy. The bad business decisions made by a highly profitable corporation are not the fault of the public. Customers should not have to pay more for energy because of their failures. Had First Energy been reasonable and embraced transitioning to renewable energy, rather than spending millions of dollars to fight common sense preparations for a future powered by renewable energy, they would probably not need to make this request for a bail out.

PLEASE FILE OPPOSITION COMMENT UNDER CASE #: 14-1297-EL-SSO

In light of the raise in prices for energy in recent years in addition to the bailout recently received by FirstEnergy, I must INSIST that it is great importance that you take action and invest in sustainable resources. Realizing that there are going to be losses in investment and jobs, you must realize that the problem will only become WORSE if it is continued in this way.

I urge that you will be a leader for not just Ohio, but the U.S., and by extension, our planet. Please carefully consider sustainable energy for the sake of not just our planet, not just your customers budgets, and not just the leadership that would be exemplified, but also the future of your enterprise, for a finite resource cannot be sold indefinitely.

Thank you.

Genesky, Donielle

Dear PUCO:

Please do not approve the First Energy's recent request to reduce energy efficiency programs it already had in place.

I feel very strongly about this issue for a variety of reasons. The most significant of these is that I want energy pollution reduced and I also want Ohio utilities to provide cleaner energy sources. I am the parent of three young children who should not have to deal with the continued debasement of their environment so that First Energy can earn additional profits. Additionally, I should not have to pay for First Energy to continue polluting our air with outdated coal burning technology.

I strongly urge you not to approve First Energy's recent request.

Very truly yours,

A handwritten signature in black ink, appearing to read 'JFK', with a long horizontal line extending to the right.
