Chairman Thomas Johnson

Dear Chairman Johnson,

American Electric Power's proposal to charge Ohioans \$117 million to extend the life of two aging coal plants would take Ohio in the wrong direction. I strongly urge you and the Public Utilities Commission to reject their proposal.

The Kyger Creek and Clifty Creek plants are well past their expiration dates and are responsible for unacceptable levels of pollution. Kyger Creek alone emitted more than 6.2 million metric tons of carbon pollution into the atmosphere in 2012 alone, according to Environmental Protection Agency figures. If these plants cannot compete on the open market, they should be shut down and replaced with cleaner cheaper options.

Instead of investing in polluting and obsolete sources of energy, I urge you and your commission to support energy efficiency and renewable energy sources that do not pollute our air and water. Energy efficiency in particular has been a boon for Ohio. Thanks to utility-run efficiency programs, Ohioans have saved more than 5 million megawatt-hours of electricity enough to power the cities of Cincinnati, Cleveland and Dayton for a year.

American Electric Power's proposal is a bad deal for Ohioans and the quality of Ohio's air and water. Please support clean energy and efficiency over obsolete and polluting power sources.

Sincerely,

Geri Braun

COMMENT DESCRIPTION:

PLEASE FILE OPPOSITION COMMENT UNDER CASE #: 14-1297-el-sso.

The PUCO needs to get out of the way of market economics and not support a bailout to Duke, Davis Bessie and AEP. In bailing out these utilities we are bailing out companies that are killing us and robbing of us of future. Global warming threatens the future of our race and many other species on the earth. The air pollutants from these plants have a huge impact on our health and health care costs. The entire cost of these pollutants to the future and to the present health of the people of Ohioans outweighs any of the proposed benefits. Economically a bailout is not defensible. Please do not move forward with actions that will slow the progress of renewable energy and efficiency in Ohio. Funding the bailouts is supporting profits to these companies and their shareholders at the expense of our health and the health of our earth. Stop the bailout and allow renewables and energy efficiency to move us to a safer and healthier future.

Chairman Thomas W. Johnson
OH

Chairman Johnson, Chairman Johnson,

I do not support Duke Energy's request for a non-bypassable rider on transmission costs. It is an attempt to make ratepayers foot the bill to bail out aging, outdated coal plants. These plants are not competitive with today's market prices for electricity, and stands to undermine the past fifteen years of the Commission's work to create a competitive wholesale market with a diversity of supplies and suppliers. My family should not have to pay more for dirty energy. Duke Energy's request to bail out obsolete coal plants that are no longer economically viable is bad public policy that will cost Ohio electric customers more. Please do your job and do what is right for Ohioans by rejecting this proposal.

Sincerely,

Richard Hendren

COMMENT DESCRIPTION:

PLEASE FILE OPPOSITION COMMENT UNDER CASE #: 13-2385-EL-SSO.

Deny the coal plant bailout requests from AEP, and from FirstEnergy (Kyger Creek, Sammis, and Davis-Besse nuclear plant)and from Duke.

Please don't make me (an AEP customer) and other Ohioans pay more for dirty energy we don't want. Don't continue to raise my AEP Ohio electricity bill rates. Invest in renewable energy,like solar and wind. And invest in measures to increase energy efficiency, for homes and businesses - support rebates & incentives for (retrofitting more insulation,improved HVAC and water heating systems, etc.) Denying these bailouts (from off the backs of public customers) and retiring dirty coal plants and outdated dangerous deteriorating nuclear plants will help clean up our air, water, reduce pollution-related illness, and encourage electric suppliers to utilize more modern cleaner proven power generation systems.

Ohio's utilities don't need a dirty energy bailout and we customers definitely should not be financing it.

Thank you for your consideration.
