MOTION OF OHIO POWER COMPANY TO PROTECT CONFIDENTIAL INFORMATION PURSUANT TO OHIO ADMINISTRATIVE CODE SECTION 4901-1-24

Ohio Power Company ("AEP Ohio" or the "Company"), pursuant to Rule 4901-1-24(D) of the Ohio Administrative Code, respectfully requests that the Public Utilities Commission of Ohio ("Commission") issue a protective order that continues the existing confidentiality of certain information contained in the hearing transcripts and exhibits in this proceeding for 18 months from the date of the order granting this motion. A memorandum in support detailing the sensitivity and confidentiality of the information is attached.

Respectfully submitted,

/s/ Steven T. Nourse

MEMORANDUM IN SUPPORT

During the recent evidentiary hearing in this proceeding, AEP Ohio sought confidential treatment for certain information contained in hearing exhibits (including testimony and exhibits of intervenors) as well as confidential portions of transcript Volume III. Public versions of the transcripts and most of the exhibits (except as noted below) were submitted during the hearing process. AEP Ohio and the intervenors worked out mutually-agreeable protective agreements and were able to present evidence and brief the case without any disputes about confidentiality. While the Attorney Examiners granted confidential protection during the course of the hearing process, the purpose of this motion is to request 18 months of confidential protection for all of the redacted materials. For those few exhibits that did not previously have a public redacted version (AEP Ohio Ex. 10, OMA Ex. 3, OCC Ex. 4 and IEU Ex. 8), the Company is attaching a public version for each of those exhibits to this motion – in order to maximize the amount of information on the public record and minimize the portions of the record that will continue under seal. Consistent with O.A.C. 4901-1-24(D)(1), only the information that is essential to prevent disclosure of the confidential information has been redacted from the hearing transcripts and exhibits. The narrow scope of information that is redacted from the hearing transcripts and exhibits is business-sensitive confidential and proprietary trade secret data and the Commission should grant the requested protective treatment in accordance with Ohio law.

Most of the redacted information constitutes market price projections (*i.e.*, capacity and energy price projections based on proprietary information and modeling) and unit-specific cost projections (*i.e.*, fuel, operation and maintenance costs, environmental retrofit costs, etc.). The market price projections, in conjunction with the unit-specific cost estimates, are used to model

unit dispatch scenarios that ultimately yield output and \$/MWH data for each unit. Much of the business transactions involving the sale of electricity, whether wholesale or retail, is based on differing views and insights about the projected market prices and/or differences in the cost profile associated with a generation unit involved with the transaction. Thus, continued confidentiality of this data is essential to competitive transactions and must be afforded protection. This first category of confidential data is the main type of business-sensitive confidential and proprietary trade secret data involved with the evidence presented during the hearing, including as follows:

- The confidential data contained in the confidential version and redacted from the public version of hearing transcript Volume III (June 5, 2014).
- The confidential data contained in AEP Ohio Ex. 8A and redacted from the public version of AEP Ohio Ex. 8B.
- The confidential data contained in the confidential version of IEU Ex. 1A admitted during the hearing and redacted from the public version of IEU Ex. 1B (filed on June 6, 2014 by the Company).
- The confidential data contained in the confidential version of OCC Ex. 15 admitted during the hearing and redacted from the public version of OCC Ex. 15A (filed on June 6, 2014 by the Company).
- The confidential data contained in the confidential version of OCC Ex. 16 admitted during the hearing and redacted from the public version of OCC Ex. 16A.
- The confidential data contained in the confidential version of OEG Ex. 3 admitted during the hearing and redacted from the public version of OEG Ex. 3A (filed on June 18, 2014 by the OEG).
- The confidential data contained in the confidential version of AEP Ohio Ex. 10 admitted during the hearing and redacted from the public version of AEP Ohio Ex. 10 (attached to this motion).
- The confidential data contained in the confidential version of OMAEG Ex. 3 admitted during the hearing and redacted from the public version of OMAEG Ex. 3 (attached to this motion).
- The confidential data contained in the confidential version of OCC Ex. 4 admitted during the hearing and redacted from the public version of OCC Ex. 4 (attached to this motion).
- The confidential data contained in the confidential version of IEU Ex. 8 admitted during the hearing and redacted from the public version of IEU Ex. 8 (attached to this motion).

The second category of trade secret data involved in this hearing includes business-sensitive confidential and propriety terms of existing coal contracts. OCC witness Wilson discussed confidential coal contract terms in the confidential version of OCC Ex. 15 and redacted from the public version of OCC Ex. 15A, both of which were admitted at the hearing. As with the market price projections and unit-specific cost and dispatch information discussed above, the proprietary terms of coal contracts have independent economic value and cannot be derived from public sources of information; as such, the Company has taken reasonable precautions to protect the ongoing confidentiality of the information.

The confidential information in both of the two categories constitutes proprietary and business-sensitive trade secret information and will hereafter be collectively referred to as the Confidential Information. As such, AEP Ohio requests continued protection of the above-described Confidential Information for 18 months from the date of the order granting this motion. Allowing unfettered public disclosure of the Confidential Information would permit inappropriate access to competitively sensitive business information about the Company and its contracting parties. Accordingly, release of the information to the public would significantly reduce, if not eliminate, the value that the information has by being kept confidential and, thus, would cause harm to AEP Ohio.

Section 4901-1-24(D) of the Commission's rules provides that the Commission or certain designated employees may issue an order which is necessary to protect the confidentiality of information contained in documents filed with the Commission's Docketing Division, to the extent that state or federal law prohibits the release of the information and where non-disclosure of the information is not inconsistent with the purposes of Title 49 of the Revised Code. As set forth herein, state law prohibits the release of the Confidential Information.

The Commission long ago recognized its statutory obligations with regard to trade secrets. *See In re: General Telephony Co.*, Case No. 81-383-TP-AIR (Entry, February 17, 1982) (recognizing necessity of protecting trade secrets). Likewise, the Commission has facilitated the protection of trade secrets in its rules. *See* Rule 4901-1-24(A)(7), O.A.C. The definition of a "trade secret" is set forth in the Uniform Trade Secrets Act:

"Trade secret" means information, including the whole or any portion or phase of any scientific or technical information, design, process, procedure, formula, pattern, compilation, program, device, method, technique, or improvement, or any business information or plans, financial information, or listing of names, addresses, or telephone numbers, that satisfies both of the following:

(1) It derives independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use.

(2) It is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

R. C. § 1333.61(D). This definition clearly reflects the state policy favoring the protection of trade secrets such as the Confidential Information at issue here.

The Ohio Supreme Court has held that not only does the Commission have the authority to protect the trade secrets of a public utility, the trade secrets statute creates a duty to protect them. *Ohio Consumers' Counsel v. Pub. Util. Comm.* (2009), 121 Ohio St.3d 362, 2009-Ohio-604. Indeed, for the Commission to do otherwise would be to negate the protections the Ohio General Assembly has granted to all businesses, including public utilities, through the Uniform Trade Secrets Act. This Commission has previously carried out its obligations in this regard in numerous proceedings. *See, e.g., Elyria Tel. Co..* Case No. 89-965-TP-AEC (Finding and Order, September 21, 1989); *Ohio Bell Tel Co.*, Case No. 89-718-TP-ATA (Finding and Order, May 31, 1989); *Columbia Gas of Ohio. Inc.*, Case No. 90-17-GA-GCR (Entry, August 17, 1990).

In 1996, the Ohio General Assembly amended R.C. §§ 4901.12 and 4905.07 in order to facilitate the protection of trade secrets in the Commission's possession by carving out an exception to the general rule in favor of public disclosure. By referencing R.C. § 149.43, the Commission-specific statutes now incorporate the provision of that statute that excludes from the definition of "public record" records the release of which is prohibited by state or federal law.

R.C. § 149.43(A)(1). In turn, state law prohibits the release of information meeting the definition of a trade secret. R.C. §§1333.61(D) and 1333.62. The amended statutes also reference the purposes of Title 49 of the Revised Code. The protection of trade secret information from public disclosure is consistent with the purposes of Title 49 because the Commission and its Staff have access to the information; in many cases, the parties to a case may have access under an appropriate protective agreement. The protection of trade secret information, as requested herein, will not impair the Commission's regulatory responsibilities.

In *Pvromatics. Inc. v. Pettiiziello*, 7 Ohio App. 3d 131, 134-135 (Cuyahoga App. 1983), the court of appeals, citing *Koch Engineering Co. v. Faulconer*, 210 U.S.P.Q. 854, 861 (Kansas 1980), delineated factors to be considered in recognizing a trade secret: (1) The extent to which the information is known outside the business, (2) the extent to which it is known to those inside the business, i.e., by the employees, (3) the precautions taken by the holder of the trade secret to guard the secrecy of the information, (4) the savings effected and the value to the holder in having the information as against competitors, (5) the amount of effort or money expended in obtaining and developing the information, and (6) the amount of time and expense it would take for others to acquire and duplicate the information. The Ohio Supreme Court has adopted these factors as appropriate. *State ex rel. Perrea v. Cincinnati Pub. Sch.* (2009), 123 Ohio St.3d 410, 414, 2009-Ohio-4762 (2009).

Applying these factors to the Confidential Information here demonstrates that protection from disclosure is appropriate. AEP Ohio has taken steps to maintain the confidentiality of the Confidential Information. The Confidential Information is generally considered restricted access confidential due to the high level of value to competitors and is not known or easily obtainable outside of AEP Ohio's business. The Confidential Information is kept confidential in the offices of AEP Ohio. Public disclosure of such information would allow a competitor or potential supplier to learn the sources and structure of the Company's market price projections, unitspecific cost expectations and proprietary coal contract terms; such disclosure would competitively disadvantage AEP Ohio and/or its generation affiliate.

Consistent with Rule 4901-1-24(D), the Commission should maintain the confidentiality of the Confidential Information given that the information clearly falls within the definition of a trade secret subject to protection under Ohio law. Moreover, any requests under the Open Records law for disclosure of this information should be rejected under R.C. §149.43(A), as a request for records whose release is prohibited under state law. For the foregoing reasons, AEP Ohio respectfully requests that the Commission grant this motion for protective order and order that the Confidential Information be subject to confidential treatment and be kept under seal.

Respectfully submitted,

OHIO POWER COMPANY'S RESPONSE TO OHIO ENERGY GROUP'S DISCOVERY REQUEST PUCO CASE NO. 13-2385-EL-SSO et al. SECOND SET

INTERROGATORY

INT-2-007

Please provide all studies, documents and analysis in the possession of AEP Ohio which estimate the market price (in AEP Ohio's load zone) for capacity over: a) the term of ESP III; and b) any term beyond ESP III. If this information is available in electronic format please provide that. The information provided in this response should include at a minimum the information used internally by AEP Ohio and its affiliates in their internal planning studies.

RESPONSE

See OEG INT-2-007 Competitively-Sensitive Confidential Attachment 1.
