To Whom It May Concern:

I want to be heard regarding Duke Energy's attempt to raise their prices in order to fund their efforts to eliminate their old coal plants. It doesn't seem fair to have the consumer pay when we already have to pay so much.

I don't like the fact that Duke continues to pollute our air because of their outdated technology. There has to be other resources other than the consumer to pay for these upgrades.

We need Duke Energy to be accountable to us the consumers rather just the bottom line which answers to the shareholders. I own stock and I understand the advantages back to us but we cannot continue to pay higher and higher utilities prices.

Thank you.

Kindest Regards,

Kenneth M Ford

ATTENTION CASE NO. 14-0841-EL-SSO 180 EAST BROAD ST

COLUMBUS, OHIO 43215

TO: Public Utilities Commission

Our family strongly objects to providing DUKE Energy with the funds to retire their old, inefficient coal plants that will ultimately raise rates for us all. As a regulated business, they have a responsibility to provide clean and efficient fuel to their customers, and should also have the resources to plan for the future. We, as consumers, should not be responsible for Duke's lack of foresight in planning for the future as well as their inability to provide a service that is both friendly to the environment and delivers clean energy to its customers. Please consider these issues in your decision making.

Sincerely,

2616 Briarcliffe Ave.

Cincinnati, Oh 45212

Public Utilities Commission of Ohio Attn: Case No. 14-0841-EL-SSO 180 East Broad Street Columbus, OH 43215

Dear PUCO,

Cleaner air should certainly be a main concern for all utilities companies. It seems like we've been fighting for that for a long time now. So it is disheartening to learn that Duke Energy is still supporting outdated technology and raising the consumer's rates in order to do so. Wow! Let's not talk out of both ends and finally move toward cleaner air for this country by cleaning up old plants with profits, not increased fees!

Sincerely,

Neil Palmer 6163 Fairway Drive

Wil Falms

Cincinnati, OH 45212

Dear PUCO,

I understand that the unfair EPA regulations are causing Duke to have to update their plants in order to be compliant. I feel this is important, but it should be done without raising rates.

I care about this issue, however not enough to have my rates raised.....

Please consider other ways to fund the replacement of these facilities without raising rates... possibly reduce their profit margin would be one way that this could be achieved.

Thank you,

In regards to Case No. 14-0841-EL-SSO,

There are many issues with coal that are only recently coming to life, most notably the huge output of pollution from this resource. The environment is a fragile subject in our world with so many view points and theories on its delicate state. Regardless, we need to preserve it to sustain our own lives. But with the harmful side effects of coal coming to light, it's not worth the energy we can pull from it. Instead, we should be focused on clean energy to fuel us. We have the means to do it (and it is a fruitful business as energy companies most certainly can profit from it). Other parts of the country, such as Washington state, have utilized cleaner energy and they have been doing just as well as states relying on fossil fuels and coal.

Not only are there huge environmental aspects to weigh, there is the cost to the individuals paying the bills. Even with the economy in its state, people will always struggle to pay their bills. This affects everyone. In this day and age, we all need electricity. And it is a well-known fact that those who cannot afford to pay their bills get their electricity shut off. This is a *constant* struggle, even with how the rates are as they are now. Increasing these rates will affect more people and less people would be able to pay for electricity (and there is no way to express just how necessary electricity is for all of us).

Duke's proposal will hurt not only the environment but everyday people as well. Everyone pays for this deal in the end.

Sincerely, Olivia Kmitta

Sincerely,

Public Utilities Commission of Ohio Attention Case No. 14-0841-EL-SSO I care about this issue because my family is using "green" products The Melalenca products that cause 1ess pollution to the planet and are better for the environment. My family and I should not have to play for Duke Energy to continue polluting our ar with 4his outdated technology while urging its customers to use less! Energy and even cut back on electricity for air conditioning during peak hot Summer weathers, , , Sincerely, 2806 Lawndale Ave. Crnoinnati, OH 45212 Public Utilities Commission of Ohio Altertion Case No. 14-0841-EL-SSO 180 East Broad Street Columbus, OH 45215

I want to reduce air pollution, save money on my electric bill and urge our utilities to provide cleaner energy sources for our electricity.

l care about reducing toxic pollution and sourge money on my electric bills by supporting clean energy instead.

This ballout bould cause all of our rates to go up. no matter what energy company we buy from.

I should not have to pay Duke to continue pollutrisf our air with outdated technology.

We need Duke Energy to be held accountable to their customers - not their share holders

Beth Egbers 3029 Mapleleaf the Cincinnati, OH 45213
