Docketing Case No.:14-1297-EL-SSO

Notes:

Please docket the attached in the case number above.

PLEASE FILE OPPOSITION COMMENT UNDER CASE #: 14-1297-EL-SSO.

I am concerned about the Davis-Besse Nuclear Power Plant and would like to see it put out of commission.

The main reason I am concerned is that nuclear energy is not a viable energy for the present or future. We do not have a safe way of disposing of the waste (and Davis-Besse has been using even more awful waste, "high burnup" nuclear fuel). It's just way too dangerous a way to obtain electricity considering the problems in Fukushima.

With Davis-Bessie in particular, I'm concerned that it has had a number of "significant accident sequence precursors"--6 out of 34 in the U.S. Davis Besse has had several problems that could cause a meltdown. This is more than enough to make one close it down.

And it's scary--the recent findings that the concrete shield building around the reactor is cracking.

We have plenty of capability to use wind and sun to generate enough

electricity for our needs and more and this is where we are to focus our efforts, really.

Thank you,
Kathy Smith, Ohioan
