

Case Number 14-1297-EL-SSO

I pay my bill to the Illuminating Company and I would not appreciate having to pay more money then I already do. I also care about this issue because our children deserve to grow up with clean air.

Dear PUCO,

I care about this issue because it's my kids future.

I want to reduce air pollution, save money on my electric bill and urge our utilities to provide cleaner energy sources for our electricity. My family and I care about reducing toxic pollution and saving money on our electric bills by supporting clean energy instead.

This bail out plan from the most outdated and expensive coal plants would make our rates go up for our energy bills, especially when my family and I take extra measures to save on our bills and cutting down on polluting the air we breathe in.

First Energy should be held accountable to their customers - not their shareholders. My family and I should not have to pay for First Energy to continue polluting our air with this outdated technology
