PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Marvin Schwartz

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

Ohio's electric utilities' plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is a known cause of major air pollution and negatively impacts public health. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

A bail out of Ohio's utilities coal plants that are no longer economically feasible is bad public policy that will do at least two things:

1. cost Ohio electric customers more,
2. prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

I do not support a bail out for outdated coal plants

Sincerely,
Lois Williams

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

We already pay a ridiculous amount for our utilities and bailing them out with MY money is NOT an option! Where's my bailout when I struggle to make ends meet because I'm having to spend \$500 to \$600 a month on gas for my car just to get to work and \$230+ on electric?

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

It's time for Ohio to get out of the stone age and get smart by becoming a leader in renewable energies. NO BAILOUT!

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Dylan Dyer

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. This is very important: the utilities need to be regulated in the interest of the public, who desire electricity, not to prop up coal-fired power plants. The mission to provide *electricity and the mission to defend coal-fired power plants may have* been aligned at one time, but these interests are diverging more and more. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.
