file our comments into the docket for Case # 14-1297-EL-SSO.

We are senior's and cannot afford to have an increase, again! Please do not pass-on to us the cost for up-grading when you have the profits to do the work needed, and able to cut expenses.  
Thank you for your time. Mr.&Mrs.Santavicca

First it was the rescinding of the all-electric discount and a substantial increase in per kilowatt costs. (Mine increased about 40%!) And now FirstEnergy wants to pass along more mandatory costs to us with the Purchase Power Agreement. Please tell them that they should pay these costs from their very healthy profits and not pass further mandatory costs on to consumers. They have placed enough of an additional burden on us these past few years.

thanks,

Jon Peknik  
(all-electric homeowner)

**Subject:** Opposed to FirstEnergy's proposed Purchased Power Agreement to bailout their failing power plants

Dear PUCO,

Please file my following comments into the docket for Case # 14-1297-EL-SSO.

I am strongly opposed to FirstEnergy's proposed Purchased Power Agreement, which will essentially allow the regulated and guaranteed profits (which myself and other electric customers already pay) from FirstEnergy's distribution companies to subsidize two *unregulated* and unprofitable power plants. Not only is this unfair to the consumer, but it will completely reverse any progress made since 1999 to de-regulate the generation of electricity in Ohio to form a competitive market. I am an all-electric customer and myself and all all-electric customers will be the most impacted by this plan.

I understand that FirstEnergy is threatening to layoff workers at Davis Besse and WH Sammis if this rate case does not pass. I certainly don't want employees to lose jobs, but I do want FirstEnergy to foot the bill out of corporate profits to keep these plants running under regulation and not continue to pass these charges onto customers.

Thank you,

**Subject:** Docket Case #14-1297-EL-SSO

I think it's time PUCO put stop to the electric companies not trying to, but are ripping off it's customers. Years ago, I had a demand meter installed ,Ohio Edison promised a lifetime discount on electricity, at over \$2000.00 installed .When , we all lost our discount .I asked a Ohio Edison Rep ,but Ohio Edison promised us.a lifetime discount. He said DID YOU GET IT IN WRITING ? . Another rip off. Come on PUCO do what is right for the public.

We own an all electric home, both of us are over seventy and we just cant afford another increase with this first energy co. Its bad enough they took away the discounts that were promised to us. that is why we bought the all electric home 35 years ago. They need to figure out something that will not hurt the customer all of the time. Please Please do all you can to prevent them from any more rate increases to many people are hurting enough right now. and like us on fixed incomes it only makes things worse. thank you for taking the time to read this letter. sincerely bruce and karen pirosko 4402388708

**Subject:** unfair First Energy rate proposal

Dear PUCO:

**Re: Case # 14-1297-EL-SSO**

I am writing this letter to express my concern over, and opposition to, First Energy's proposed Purchased Power Agreement.

This is unnecessary, as their profits are some of the highest in the country.

This is unfair, as it very negatively impacts those of us who were duped into all electric homes years ago on the PROMISE of *ongoing* electric discount during the winter heating months. As you know, this discount has already been drastically reduced, and of course, very soon to be eliminated entirely. This just cannot allow to happen, nor can this PPA.

Like many all electric customers, we are retired on a very limited, and actually retro-grading, income. Even a "mere" \$11 per month increase is getting harder and harder to afford. It would be one thing if the utility wasn't enjoying fantastic profits in the first place, and well, let's not get into the wages and benefits they afford themselves on the backs of the poor consumer! Kind of funny, that as a whole, the blue-collar sector of this country has given up huge wage concessions, while only an elite few, doctors, lawyers, postal people, and yes, *utility employees* keep on chugging with huge wages! And, I also say, *to heck with the stockholders* who are also behind a lot of the filthy money grabbing.

So, **PLEASE PLEASE** take careful consideration in this matter, and quite frankly, the diminishing all-electric discount as a whole, as it negatively impacts thousands of households. Some might even be related to yourself!

Thank you for your consideration

Respectfully,

Tim Wrenn
