PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

Old coal plants were grandfathered in, but not always upgraded as expected.

I do not support Ohio's electric utilities' attempt to get taxpayers to bail out their old coal plants. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. It poisons streams, too. We are still paying reclamation and clean-up costs. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Alexa Ross

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Warren Dick

Dear PUCO Commissioners,

I do not want to put coal miners out of work, but I also want a responsible, sustainable environment in Ohio. The administration is headed in the wrong direction for the best interests of the public in Ohio.

Please stop now!!!!

Sincerely,
Laura Fay

Let's just call the emissions poison governor. That's the reality. And you allowed these corporations to continue to increase their poisoning of our air, water, and land, without a means of reigning them in such as requiring them to expand on renewable energy. This is morally wrong. This is also becoming a legal issue for an upwind state such as ours which can be held accountable to other states for our poison. I do not support this move.

Sincerely,
Paul Sherlock
