PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Laurie Loveman

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants at ratepayer/taxpayer expense. These plants are not competitive with today's market prices for electricity, and they release toxic pollution into our air and water, damaging resources that will most likely require taxpayer cleanup spending for decades to come.

Coal, which generates nearly 70% of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Because of Southeast Ohio employment in the coal industry, the state as a whole has held back when it needs to go forward, depriving these workers of the opportunity to transition to new industry and jobs and saddling the rest of the state and the nation with dirty air that we will be ultimately be responsible for cleaning up. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution and harms Ohio workers who remain locked in these dangerous jobs that are a declining part of a clean air and water future and the current Ohio strategy is not fair for them.

Sincerely,
Kevin Cronin

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Mary Keefe
