To: PUCO

For the 30 plus years I have lived in my home with all electric features, we were promised by First Energy special rates. Now the excuse because of the deregulation or separation of the generation and distribution functions of FirstEnergy which was **supposed** to be good for consumers. However now FirstEnergy argues that because its generation plants were now separate from its distribution plant, it could no longer offer all-electric customers a significant all-electric discount.

What the heck? We were promised something years ago and now First Energy wants to change the rules? That's a terrible way to run a business and why should we consumers pay the price for the ramifications First Energy ran into after the deregulation?

Please assist as am sure all records indicate First Energy profits will not be harmed.

Sincerely

Margaret Morris

Dear Sirs,

I am a residential consumer in an all electric home in northeast Ohio. I urge you to deny FES's 3 year rate plan with proposed Purchase Power Agreement. It is a bad idea that is designed to save failing power plants, by ripping off consumers. Those of us with all electric homes would be overcharged if this plan were to be approved. FES plan is unfair to consumers and should be rejected.

thank you,
Gerianne Hannibal
