Chairman Thomas Johnson

Dear Chairman Johnson,

I do not support American Electric Power's attempt to bail out aging, outdated coal plants on my dime. These plants harm public health and contribute to global warming. If they cannot compete with today's market prices for electricity, Ohio's should not be asked to foot the bill.

The Zimmer, Stuart, Cardinal and Conesville facilities are a public health nightmare. According to the Clean Air Task Force, these four plants together were responsible for over 2,600 asthma attacks and nearly 300 heart attacks in 2012 alone.

Bailing out obsolete is bad public policy that will harm health and lock in decades of additional pollution.

Please deny their proposal and encourage investor owned utilities to invest in clean sources of energy like wind and solar.

Sincerely,

Mindy Stoltz

November 14, 2014

Dear Chairman Johnson,

Ohio is facing a period of unprecedented uncertainty related to the future supply of low-cost reliable energy. Several key factors have drastically changed the generation landscape, including flawed capacity markets that have created depressed market prices and increasingly difficult environmental regulations.

Since 2012, investor-owned utilities in Ohio have announced the retirement of over 5,500 MW of generation by mid-2015. The majority of these retirements were announced in response to several new regulations imposed by the EPA. However, current market conditions are such that even plants that will be environmentally compliant and are equipped to run reliably for many more years may be forced to shutter for economic reasons. As a result, Ohio will be a large importer of energy for the foreseeable future.

One of those plants is Conesville in Coshocton County. This plant provides valuable employment and significant economic benefit to the communities I serve. Last year alone, this plant employed 260 people and another 150 contractors and truck drivers, bringing in more than \$18,544,000 of income combined. In addition, it provided an economic benefit of \$3.1 million in property taxes while generating more than 4.7 MWh of electricity for Ohio residents and businesses.

The loss of this facility that is efficient and environmentally compliant and provides reliable and affordable electricity is unacceptable. AEP Ohio's Power Purchase Agreement proposal is not a bailout as others would suggest. It is a plan that protects Ohio's economy by keeping hundreds of Ohioans employed and millions of dollars of annual economic benefit in place while helping shield AEP Ohio's customers from market volatility. It is a good plan and I encourage you to approve the plan as it is filed in Case No. 14-1693-EL-RDR and Case No. 14-1694-EL-AAM. Please docket this letter in support of AEP Ohio's plan and as part of the record in this proceeding.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dalton Summers", written over a horizontal line.

Mr. Dalton Summers
Superintendent

Chairman Thomas Johnson

Dear Chairman Johnson,

I do not support American Electric Power's attempt to bail out aging, outdated coal plants on my dime. These plants harm public health and contribute to global warming. If they cannot compete with today's market prices for electricity, Ohio's should not be asked to foot the bill.

The Zimmer, Stuart, Cardinal and Conesville facilities are a public health nightmare. According to the Clean Air Task Force, these four plants together were responsible for over 2,600 asthma attacks and nearly 300 heart attacks in 2012 alone.

Bailing out obsolete is bad public policy that will harm health and lock in decades of additional pollution. Because of concern for the future for all of us, we currently receive power from the AEP 100% Wind program, and this step backwards is going to end that, and may end my dealing with any dirty energy producer at all.

Please deny their proposal and encourage investor owned utilities to invest in clean sources of energy like wind and solar.

Sincerely,

Thomas Collins
