PUCO

Attn: Case No. 14-1297-EL-SSO

Dear Commission Members,

I've just learned that Duke Energy, AEP, & First Energy is requesting permission to raise our electric rates to pay for improvements to their outdated coal plants. REALLY??? How ridiculous is that? Why should consumers be asked to pay for improvements to toxin-producing coal-fired plants when the emphasis should be put on developing more renewable energy in the State of Ohio!

I am ANGRY that our State Legislators have put renewable energy plans on hold in Ohio for two years — we are becoming a backwards, out-dated, insignificant State!!! And now, consumers are being asked to bear the cost of continuing to burn coal! I ask you to please turn down this request!

Sincerely,
Patricia A. Pavli

To Whom this may concern.
Reduction of air pollution, saving money
on my electric bill & urging our utilities
to provide cleaner energy sources for our
electricity is of utmost importance.
My family struggles financially as is
& helping w/ this bailout would stifle
our budget as well as our fellow Ohioans
trying to get ahead. Why can't responsible
spending & efficiency be on the agenda
of not only First energy but all other
"corporations" out there in America including
our pathetic government. Hear this
& hear this well; stop taking advantage
of the "american family". ~~who strives for a~~

ATTN: Case No 14-1297-EL-550

Dear Commission Members, In representing
The interests of the citizens of OHIO I
want to encourage the PUCO to remember
their assigned Mandate; i.e. to protect
the consumers from Greedy and unfair
charges on their utilities bills. Case No
14-1297-EL-550 as presented by Duke
Energy, AEP, and First Energy is a bold
attempt to shift the cost of operating
Toxic and inefficient power plants on the
consumers. Clearly this is an issue that
the PUCO should Deny. I'll be watching
the progress of this request (14-1297-EL-550)
and see if the PUCO is Looking out for my
interests or the interests of "BIG COAL".

Albert J. Farli

Please stop air pollution. Air pollution is a big problem in the U.S.. We need to fix that problem. The problem is it is making humans and other animals sick. A lot of birds are getting sick because the smoke and gas go up to the sky where birds fly. Air pollution isn't just hurting animals it is also hurting us. It gets in our breath and could hurt your lungs or something else important. In some cities people wear masks to protect them from breathing in air pollution.
