PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Joe Sirgo

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. *These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.*

What are you trying to do . make me move to Mexico?! Ya know. natural gas messes with the ozone. coz of the methane??? These folks make bank.. My wife and I are being squeezed to the brink of leaving the state. All the fracking in Washington county Ohio ..and our electric bills are going up..... my wife complains about me leaving the lights off in the house at night.. I'm trying to save a dime on my bill.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health *while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.*

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Jill Brothers

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Here we go again, Ohio bails to coal. This just shows other states how backward Ohio is. DO NOT BAILOUT coal! We as Ohio citizens want to see alternative energy sources which is the future not coal which is outdated and dirty. Your job is to protect and help Ohio citizens, so do your job and do not bail out coal. I am surprised that any good Republican would want this because it would be using taxpayer money to subsidize wealthy companies. Shameful!

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.
