PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Michelle Tarian

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I am writing in opposition to Ohio's electric utilities' attempt to bail out their old coal plants with hard earned money from Ohioans. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water, causing a myriad of health problems for Ohioans as well as contributing to climate change. Ohio has some of the worst air in the country, thanks to our reliance on coal.

I believe Ohio's utilities' request to bail out coal plants that are no longer economically feasible is not only bad public policy, it will cost Ohio electric customers more money and will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution. Let's keep Ohioans safe and refuse to bail out the coal industry!

Thank you for your consideration of my letter.

Sincerely,
Anne Randolph

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Steven Eustathios

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water. Furthermore, these companies are currently making record profits, so they can easily afford to update their facilities. They do not need my tax dollars!

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.
