Please do not vote for FirstEnergy's new 3-year rate plan with the PUCO that will set electric distribution prices for each of the local distribution companies. I see its purpose is to simply to cover their losses on the retail market by passing them on to their consumers, "...asking for what amounts to regulated pricing for the power generated by some of its unregulated Ohio power plants. (*Plain Dealer*, Aug 4, 2012)

From articles I've read, I've calculated my costs will increase an average of \$12 per month. At the end of a year, that would have purchased a week's worth of groceries for me and my wife.

I've watched as previous PUCO members allowed FirstEnergy to break their promise to provide a discount for all-electric home owners like myself. As a result, I've seen my electric energy costs increase over the years, and I know they will increase more as the current credits are phased out. In the long run, retirees, like myself, will see more and more of our pensions going to enrich the FEC corporate officers and their share holders.

Please do not allow that to happen again.

To Whom It May Concern:

Please put me on record as being opposed to First Energy's proposed Purchased Power Agreement to bailout their failing power plants. I am in opposition to this plan because if it were to pass, it will allow the regulated and guaranteed profits from First Energy's distribution companies to subsidize two unregulated and unprofitable power plants. This is unfair to the consumer and will completely reverse the progress made to de-regulate the generation of electricity in Ohio.

Sincerely,
Marnie McAtee
