PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Linda Kozak

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Dustin Jenkins

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Ryan Cek

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Colleen Kuminski

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Eloise Zarecki
