RE: Case No. 14-1297-EL-SSO - Electric Security Plan of Ohio Edison Company, the Cleveland Electric and Illuminating Company, and the Toledo Edison Company

Dear Chairman Johnson:

I am a life-long resident of Northwest Ohio and have been an employee at the Davis-Besse Nuclear Power Station for nearly 30 years. As such, I have personally experienced the many changes and challenges faced by both the utility industry and electric consumer as a result of the transition to a competitive market, and the more recent financial instability and decrease in product demand resulting from our depressed economy.

Of issue is the need to sustain the reliable and affordable availability of electricity. We have seen the closing of a series of base-load generation stations, first with coal plants resulting from obsolescence and the demands instituted by more aggressive air quality requirements, and more recently, nuclear facilities, which in some cases have become no longer viable as market value of generation decreases. These closures not only impact the affected utilities, but more importantly, the economic stability of the communities supported by them. This economic impact comes not only in the form of a loss in availability of reliable electric supply, but also in surrender of thousands of well-paying, highly skilled jobs.

This is why I write this letter asking for your consideration for the Economic Stability Program. The program is estimated to preserve approximately \$1 billion annually in statewide economic benefits, sustaining nearly 3000 jobs, and more than \$52 million in annual and state and local property and income taxes. This will help keep both the Davis-Besse power station, and the Sammis Plant, in Stratton, Ohio, serving as strong, Ohio-based sources of electricity and employment throughout the 15-year duration of the program and beyond. The Program will also better assure energy cost stability and affordable service for the tens of thousands of First Energy customers.

Thank you for your time and consideration.

Sincerely,

Patrick McCloskey

Subject: File into Docket for Case #14-1297-EL-SSO.

To Whom it may concern at PUCO,

This is to advise you that my wife and I **are strongly opposed to FirstEnergy's proposed Purchase Power Agreement to bailout their failing power plants**

We own an all Electric Home, have suffered already because Ohio Edison and First Energy has reneged on a reduced rate agreement several years ago, and now we are paying this higher rates because, they (Ohio Edison and First Energy) were allowed to do so. Now they want to come back want us to pay for their deteriorating power plants. They should be required to make these repairs out of their profits and not be able to pass on to those customers who were already being treated unfairly.

Since we live in an all electric home, our electric bill is not 750 kwh per month, the average in the winter but about 2600 kwh or about \$11:00 more per month, under this proposal and would be being punished for being an all electric home. And would be paying more than their fair share.

It was not too long ago, that First Energy was allowed to make naming rights for the Cleveland Browns Stadium. This was a total waste of profit dollars that could have helped pay for the repairs.

Thank you for reading this e mail.

Please file our comments into the docket for Case # 14-1297-EL-SSO.

To Whom It May Concern:

My husband and I would like to go on record that we are opposed to First Energy's proposed Purchase Power Agreement to bailout their failing power plants. We are against their plan of control, as we are an all-electric home and expected discounting and fairness from the time we purchased our home back in 1991. Our realtor told us we would ALWAYS have the discount, so First Energy's games and claims sicken us. Please stop them from asking us to foot their bill; their HIGH corporate profits can well ensure jobs for those they are claiming are losing theirs.

If you need anything more, please contact us; we will be happy to stand up in opposition.

Regards,

Ron and Marita Kontur

Subject: Opposition to Paying for Power Plant upgrades

I am opposed to owners of all electric homes and condos having to pay for upgrades of power plants owned by Ohio Edison. The stockholders should be paying for these upgrades. This is covered in case#14-1297-El-SSO.
