PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Robert Griffin

It's not only bad for business! Think about the health hazards involved to everyone from the negative emissions that coal produces. Not only should Ohio electric utilities be stopped from this ludicrous plan. But they need to be forced into producing electric energy in a clean manner. At a far faster rate than is scheduled at present. Green energy production has to be mandated and all fossil fuel outlawed. We are fast coming upon the point of no return from pollution. Which means that if we don't stop polluting now this planet we call earth will be uninhabitable in the future. It'll be just another lifeless rock orbiting the sun. Mankind's reign is fast coming to an end.

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Our government leaders need to be doing everything possible to transition our communities to clean, renewable power. It is very disappointing that our clean energy requirements in Ohio have been gutted. We are moving in the wrong direction and need to move away from fossil fuels as quickly as possible. Clean energy will create far more jobs than traditional dirty energy sources and those jobs will be created in other states with leaders who embrace clean energy.

The power companies that want to continue to use outdated coal plants and have ratepayers cover the huge costs involved are on the wrong side of history and our state will be taking a big step backwards if we allow their proposal to be accepted.

I strongly urge PUCO and Governor Kasich to oppose this costly and ill-conceived proposal.

Sincerely,

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Paul Voytas

Dear PUCO Commissioners,

Why do we praise our institutions of higher learning and then ignore what the scholars say? Why do we listen to for-profit companies' "facts" over independent scientists?

WE HAVE TO START SWITCHING TO RENEWABLE SUSTAINABLE
CLEAN ENERGY RIGHT NOW!!!!

YOU HAVE INCREDIBLE POWER TO INFLUENCE THIS!!

Please use your power to help direct this shift!!! You are of the people, and you me not hear from a majority of citizens on this subject, but from everything I read, this is the path that is in favor of the human race.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution. Lebanon, OH 45036

ATTN: Ohio Public Utilities Commission,

Utilities in Ohio should be investing in clean sources of energy that can power our economy without making local residents sick. Please reject the proposals to force Ohio families to bail out some of the oldest and dirtiest coal plants in the state.

Sincerely,

KAtE and Eric Helt
