Tell AEP "No" to passing on repair costs through yet another rate hike.

AEP made \$1.9 Billion in profit last year. Paying for repairs won't hurt their bottom line, and if they were updating infrastructure the way that they should, a lot of the damage could have been avoided. Customers are already burdened with extremely high electric bills, with cost of our electric bills, the distribution cost is almost the same as our bill, plus, transmission customer charge, retail stability rider, Preferred Asset Phone-in-rider, Phone-in Recovery Rider, it's too much and with the economy in its current state, customers can't afford to pay for repairs that are AEP's responsibility.
