PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
Terry Murcko

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

US coal plants are one of the major contributors to climate change and the increase in CO2 in the atmosphere. These coal plants are also the source of the Mercury in ALL THE WATERWAYS in Ohio which have mercury advisories for pregnant women and children to avoid the fish. I GUESS THE MEMBERS OF PUCO DO NOT HAVE CHILDREN OR PREGNANT RELATIVES SO IT IS OK TO PUT SOME COAL CORPORATIONS PROFITS OVER THE HEALTH OF OHIOIANS. LET'S FACE IT, UNLESS A BREATHING PERSON IS A CORPORATION WE HAVE NO REPRESENTATION. UNLESS WE HAVE MILLIONS AND KNOW SOMEONE WHO KNOWS HOW TO LAUNDER MONEY THROUGH THE POLITICAL SYSTEM, WE HAVE NO REPRESENTATION. WHAT A WASTE THE AMERICAN REVOLUTION WAS, NOW WE HAVE PARASITIC CAPITALISM WHICH ENDORSES LEGAL BRIBERY!

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants period! These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation. especially the Ohio Valley, in which I live!

This is not capitalism. Remember when we bailed out Japan and Germany after WWII? We modernized their plants and our plants did nothing to improve their plants here at home. The result, could not compete in the big picture and look at the state of those buildings today. Oh, by the way, have you seen the new building that Murray built in St. Clairsville, Ohio? Maybe if the coal industry got together and put their money where it could do the most good, into upgrading their factories, I would feel differently.

Sincerely,
Sandie Myers

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,
P. Lawrence

These monopolies don't need deserve continued corporate welfare. These subsidies need to be focused on support for renewable sources i.e., wind and solar moving away from dirty sources of power generation. Shifting away from dirty, dangerous and polluting sources will not only work to save the environment but move to a future with thousands of clean energy jobs bring created.

It's not to late to change to a future of clean energy production and improve the quality of our environment, we can leave our children a planet with an promising future. Or we can leave them an environmental mess to clean up.

The chose seems clear to me, we can continue to placate a handful of multinational corporations or cut off the corporate welfare these companies take rom our country while giving very little back in return or we can take action to assure our country has a sustainable environment for the future. My granddaughter already has breathing problems related to the pollution these companies spew into our atmosphere. I would like to see action taken so she can breath the air that we have a right to have cleaned up.

Sincerely,
Donald Jackson
