To whom this may concern,

I am a soon to be 65 year old. I have been retired for six years. Before I retired I put a geothermal system into my retirement home. I am divorced and have one small income. When I put the system in (which by the way is 3 times more expensive then any other system)I was promised that I would have a life time all electric discount rate. So I did because I knew that as time went on this discount would mean everything to me. I do not want to pay for everyone else's mistakes. I can not afford it and I object to any raise of my electric.

Sent from my iPad.

Sincerely, Kathleen Spore 44030

Subject: first energy proposal to bailout failing power plants

please file my comments under docket for case 14-1297-EL-550. I am definitely opposed to this proposal. Enough benefits to first energy is enough. Because of the elimination of part of the all electric discount I am now paying \$300 more during the winter season from November thru march. They need to reduce overhead internal expenses such as the \$2million monthly salary being paid to their CEO. and other top executives thank you William S. Kirk.

To whom it may concern:

I am a total electric home owner for 38 years. FirstEnergy committed to a lifetime discounted rate, which we lost. Now as a retiree I'm being asked to pay and pay the most, because of my power usage, for corporate screw ups. I vehemently oppose another rate increase. It is bad enough I can't choose another electric transmission company and now I have to pay for gross company mismanagement of \$3 billion. I request that you forbid this very unfair FirstEnergy request.

Subject: Case #14-1297-EL-SSO

We are a retired couple living in an all electric home since 1979. First Energy's proposed upcoming rate increase is an excessive burden to us financially and is unacceptable.

Since we were originally promised at rate discount when we purchased this home, we are greatly effected by every increase and loss of our discount.

Thank you,

Ron and Bard Fidanza

Subject: Against rate hike

I am an all electric home owner and
I am sick and tired of all these rate
increases. I am on fixed income due to loss of job and can't afford paying more money. Thank you Steven M. Salo
