RE: Case Number 14-1297-EI SSO

Sirs:

My family and I care about our planet and especially this part of it in Ohio and  
are very concerned about what pollution is doing to beautiful Ohio!

We wish to reduce toxic pollution along with saving money on our electric bills.

Please consider helping us to work toward an investment in efficiency and renewable  
energy. It may be more costly to you in the beginning, but in the end it will pay us all  
back with cleaner, more healthy environment.

Please listen to our plea.

Sincerely,

  
The Williams Family  
Hudson, Ohio

To Those Concerned,

I'm writing to implore the PUCO to deny the rate increase that would force consumers to buy power from Ohio's most polluting coal plants. It makes no sense – either economically or environmentally – to use our state's oldest, dirtiest technology instead of moving forward with efficient and renewable energy..

Lets begin using greener energy sources ... and stop bailing out old and discredited technologies. Please, get on the responsible side of this issue, and take a stand for our environment that the next generation will be proud of.

Sincerely yours,

Virginia Wilson

Public Utilities Commission of Ohio

(Case number  
14-1297-EL-SSO)

I am against the First Energy bailout ↓  
because it is a temporary solution to a  
bigger problem. Bailing out the old, dilapidated  
technology ~~is~~ does not benefit ~~consumers~~  
~~taxpayers~~ taxpayers and only the shareholders  
responsible for ~~them~~ the facilities. It also  
goes against the EPA's pressuring companies  
to shift to 25% renewable energy, when  
the numbers are far below that. Long  
run carbon emissions will be noticed by the  
EPA and more taxes will be piled on to  
taxpayers without anything to show. ~~We need~~  
~~to switch to renewable energy~~ We need  
to start the process of switching to Renewable  
energy to avoid needless, unnecessary taxation  
when there is a clear, long term alternative.

Sincerely,

  
Zane DeLong

180 East Broad St  
Columbus, OH 43215

As a concerned taxpayer from the state of Ohio, I am writing to you today to address the need to stop the First Energy bailout in the State of Ohio. First Energy, American Electric Power and Duke Energy have submitted plans to the Public Utilities Commission of Ohio (PUCO) for financial bailouts of some of their most outdated and expensive coal plants. First Energy want to force us ( the tax payers) to buy the power from these old expensive plants for the next 15 years. This plan is a subsidy that flies in the face of the state policy to promote competition. Their proposal protects the utilities from risk, while placing all of the risk on the Taxpayers and at the same time delaying inevitable investment in efficient and renewable energy. The Ohio legislature passed a two year "freeze" on Ohio's renewable energy standards, which have saved customers \$1.03 billion in just the first five years. First Energy and Duke say they need time to "study" the issue, but in reality they just want to kill the program. We demand our legislators end the freeze and help us keep saving money.

I support Ohio Citizen Action's clean air campaign to.

- 1) Stop the financial bailout of Ohio's outdated, least efficient coal plants, which would be funded by customers.
- 2) Demand to end the freeze on Ohio's renewable energy and energy efficiency standards for utilities, which have saved Ohio businesses and consumers \$1.03 billion since 2009.

Keep Ohio Strong and Growing in the right direction by do the right thing for the taxpayers of Ohio and stop the bailout of these monopoly companies and placing the burden on the people of Ohio.

Concerned Voter and Taxpayer

To Whom It May Concern,

I do not want our hard earned money going to go to using antiquated and dirty coal plants as our source of power. My family and I care about the environment and about reducing toxic pollution as much as possible - and we also care about saving money on our electric bills. We care about this issue because coal plants are part of the problem causing such a havoc to our environmental health. A bail out of old, polluting technology would only benefit utility shareholders and delays inevitable investment in renewable energy and efficiency. We can't afford for that to happen. Not for us, our health, and most importantly OUR CHILDREN!!

Thank you,

Meghan Jenkins, Craig  
Jenkins, & Claire & Drew  
477 Timeway Dr.

re: bailout of outdated coal plants  
First Energy 14-1297-EL-550

To Whom It May Concern, Public Utilities Commission of OH

I am concerned that PUCO plans to bail out our out-dated coal plants. Those should have been closed long ago or converted to cleaner power, such as gas, solar or wind.

Please deny the rate increase for customers. I am retired & power is expensive enough for those of us on a fixed income.

I breathe the air & enjoy being outside. We've been working on reducing toxic pollution for many years. It's about time the problem is solved for real.

Bailing out old plants is senseless. Let's get going on efficient & renewable energy.

Yours truly,

  
Jane Huml

To whom it may concern,

I do not agree to rate increases that are "bailouts" to companies who have been polluting our environment for years without consequences. I believe that it is the responsibility of companies to be good stewards in their respective communities and to bear any burdens of commerce economically themselves. There are many businesses that take less profit to put back into their business for upgrades to remain competitive and do it without passing the cost on to their customers. The public utility companies should care less about profit and more about the impact they have on our world. We have suffered as a people the consequence of increased respiratory problems, i.e. asthma in children, from the increased emissions of nitric dioxide and sulfur dioxide long enough. They have no right to infringe on our right to a healthy environment and need to fix what they should not have been allowed to do in the first place, pollute. It is time for them to be responsible for their own carbon footprint like the rest of us.

Stop the FirstEnergy bailout and lets get going on alternative source of clean energy.

Sincerely,

Jacqueline Ginley

December 2, 2014

Public Utilities Commission of Ohio:

Ohio's three biggest energy providers are asking the residents of Ohio (via the state) for an increase in their profits, via surcharges passed down to consumers.

This is wrong, for several reasons. First, the 3 energy companies involved need to assume responsibility for their out of date plants and not ask consumers to bail them out.

Secondly - This is bad for Ohio - bad for the citizens, - and bad for the environment. These plants are outdated and do not run efficiently.

Do not allow the energy companies to burden the residents of Ohio!

COLS, OH 43215

DEAR SIRs,

PLEASE DENY THIS RATE INCREASE TO LOCK CONSUMERS INTO BUYING POWER FROM OHIO'S OLDEST, DIRTIEST COAL PLANTS. A BAILOUT OF OLD, POLLUTING TECHNOLOGY CAN ONLY BENEFIT UTILITY SHAREHOLDERS AND IT ALSO DELAYS INVESTMENT IN RENEWABLE ENERGY.

I CARE ABOUT SAVING MONEY ON MY ELECTRIC BILL AND ALSO ABOUT REDUCING TOXIC POLLUTION. FIFTEEN YEARS LATER THESE UTILITY COMPANIES ARE AGAIN ASKING CONSUMERS TO PAY CHARGES RELATED TO POWER PLANTS.

THANK YOU FOR YOUR TIME.

CASE # 14-1297-EL-SSO

Porc

8-15

Columbus, OH 43215

To whom this letter reaches,

I am in my 30's and worry everyday about the future of the city, state, country and planet I call my own. I went to school under the assumption that companies were throwing out jobs to college graduates. I took loans and work hard to get through school only to find the job I had before I went to school waiting for me. This was a decision made to the fact society was evolving and it was time to change. This was a risk I had to take in attempt to better my life.

It's unacceptable to bail out billion dollar corporations just because they choose not to look towards the future, but only look at the current economy and what will sustain their strangle hold on society. First energy has enough money to give the Browns 6 million a year for 17 years, but they need a bail out to help sustain their current business plants, which seem as outdated as their plants.

I make enough to get by and am willing to say that I would pay more if it were for cleaner more efficient energy that was not destroying our plant. Please take this into consideration for when making your decision on the bailout.

PUCO,

We care about reducing pollution and saving  
money on our electric bills.

Thanks!
