January 2, 2015

Dear PUCO:

I am writing in reference to Case # 14-0841EL-SS0. My family and I care about reducing toxic pollution, and saving money on our electric bills. A bailout of old, polluting technology only benefits utility shareholders and delays the inevitable investment in efficiency and renewable energy. Please deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants.

Sincerely,

Brian K. Young

To whom it may concern,

I pay my bill to Duke Energy and I care about this issue because if our rates are going to increase then I would hope that the facilities would be up to standards, if not then where is our money going for the increase in payment? I also care about this because I have small children and if these plants aren't up to date then who knows what effect this may have for the future of our planet for our children. I would rather pay more knowing it is going towards renewable energy than pay less for outdated facilities, and I cannot fathom paying more for the same services and facilities to be used for the energy we already have.

Thank you,

Concerned Citizen

Rob Brooks

Columbus, Ohio 43215

Dear PUCO,

Please, STOP the Duke Energy Bailout!
Just how stupid does Duke Energy think
the consumer is? Renewable energy is
here to stay — Duke just isn't up to
speed on this alternative energy source.
This bailout is a "no-win" for everyone,
why fund outdated, inefficient and dirty
coal plants? I'll tell you why, Duke
Energy has been milking the consumer
cow for cash, for too long! And it is
too easy for Duke to get ~~away~~ away
with this unconscionable action.
The PUCO should prove it's worth as
an entity for the good of all!

Sincerely,
Paula Pickerill

Dear member of the Public Utilities Commission of Ohio,

WAVN CASE# 14.0841.EL330

I am a concerned citizen of West Chester Ohio, and I would urge you to deny the proposed price increases to cover the costs of unsustainable (both economically and ecologically) and inefficient coal plants. Not only do these plants contribute to climate change and environmental degradation (which carry their own added costs), but forcing these prices upon consumers who choose other providers effectively takes that choice away from them.

Fossil fuels have had (and still enjoy) more than their fair share of economic advantage in what should be a free energy market, and allowing further competitive advantage to old, dirty technology only continues a trend of disincentive for the use and development other sources of energy (i.e. clean and renewable sources).

Finally, these price increases make little sense given the economic developments in the solar and wind industries as of late. Clean sources of energy have reached parity with fossil fuels, despite decades of subsidies and tax breaks keeping the price of fossil fuels artificially low. I cannot help but wonder how many years earlier this would have happened in a truly free energy market, and I am dismayed by the global ecological damage and Ohio's missed economic opportunities that have come about from these unfair advantages.

Renewable and clean energy is growing at an explosive rate, and though we cannot undo the damage done to the development of these technologies over the last 60 years of market manipulation in favor of fossil fuels, we can prevent further inhibition to these promising (and finally economically viable) sources of energy.

Please deny this request on behalf of the citizens of Ohio.

Thank you,

Dear Commissioners -

Please deny the rate increases being proposed which will lock me into buying power from outdated, polluting coal plants. I care about the environment and am very concerned about the toxic pollution generated by these old plants. More efficient plants would also reduce our electric bills. It's time to serve the consumer rather than utility shareholders. It's time to invest in efficient renewable energy.

Pay my bill to Duke Energy and, again, for the health of all in the area, let's "Thank God for Energy"!

Thank you for Doing What's Right.

RE: Case No. 14-0841-EL-SSO

Dear PUCO,

I care about this issue for two key reasons:

1. I am interested in reducing air pollution, save money on my electric bill and urge our utilities to provide cleaner energy sources for our electricity.
2. We need Duke to be held accountable to their customers and the environment - not just their shareholders.

Regards,

To Whom It May Concern,

I feel passionately about reducing toxic pollution in our community and country. I would love to see efforts to clean our oldest coal plants. I am sure the goal is to move away from coal but if necessary update these plants. The renewable sources of energy sound great but I don't wish to support a "Solarize" scheme. Please be responsible when making decisions.

Sincerely,

Paula Melton
