Dear PUCO,

I find it very important as a home owner to receive public utilities at a rate that is affordable for working class families. Energy is crucial to our everyday life and it needs to be delivered to consumers in a manner that does not put them in a financial struggle. As a new parent we already have day to day expenses that can be quite large and would appreciate our current costs to stay reasonable and not to continue increasing. As members of society we do our best to stay energy efficient and expect the same out of those companies that are supply us with the energy resources. It is very important that we continue to do this in a safe way that does not pollute the environment; today or for generations to come.

Sincerely,

The Pinsky Family

Dear PUCO,

Please deny the rate increase to consumers buying power plants. Instead of relying upon polluting, non-renewable sources of energy, please invest in new, safe, clean technology.

Please invest in our future by taking care of our environment and our children's inheritance.

Sincerely,
Mrs. Karen Gonzales

Dear P.U.C.O.,

My family and I care about reducing toxie pollution. Factories and powerplants pollute the air and settles it in our water. This can kill animals that live and drink the water. Please invest in cleaner power sources and less pollution.

Sincerely,
Lucy Gonzalez

P.U.C.O.,

Please deny a bailout of coal companies and companies which rely heavily on coal.

A bailout of old polluting technology only benefits utility shareholders + delays inevitable investment in efficiency + renewable energy.

We need to think about tomorrow, today. Let's do the right thing. Stop the Duke Energy bailout.

Best regards,

Jorge L. González

Please do not ^{PUCO} bail out unclean and outdated power plants. Their air and water pollutants are inhibiting our immune systems and our DNA repair systems, causing a myriad of chronic diseases, including cancer.

The public is becoming more and more aware and ~~interested~~ ^{interested} in cleaner and renewable energy. Bailing out these outdated plants will only delay inevitable investment in more efficient and cleaner energy sources.

PUCO

Dear Public Utilities Commission of Ohio,

It is very disturbing to me that Duke Energy, AEP, and First Energy want to force me to pay for energy being produced from outdated power plants when these plants should have been replaced years ago. We want a more intelligent Ohio to move forward and close these inefficient plants. These companies need should have invested money in new technology a long time ago instead of filling the pockets of shareholders. The people want cleaner and cheaper energy. Please deny the rate increase. Please do not force us to pay for outdated power plants.

I am writing in reference to Duke Energy's rate increase request/pollout to update their facilities. I strongly feel this is a misguided endeavor as middle class families are strained financially already. Also, updating coal facilities rather than investing in new energy technology is a shortchanging of all our futures. Please consider the larger issue rather than Duke Energy & their shareholders gratification.

Sincerely,
James B. Ste

Dear Sirs:

2015 JAN 20 PM 4:15

12-841-EJ-550

My family and I care about ~~reducing~~ reducing toxic pollution and saving money on our electric bills by supporting clean energy.

This bailout would cause all of our rates to go up no matter what energy company we buy from.

Families should not have to pay for Duke to continue polluting our air with its outdated technology! Duke Energy needs to be accountable to its customers, not its shareholders.

Sincerely

Mrs. Marjorie Sutthelme
